Contents--continued

C--Employment, Earnings and Hours, Upstate Areas

Due to federal funding cutbacks, the number of employees on nonagricultural payrolls by place of work will no longer be compiled for the Glens Falls MSA.

C-1. Albany-Schenectady-Troy MSA 29
C-2. Binghamton MSA 30
C-3. Buffalo-Niagara Falls CMSA 31
C-4. Buffalo PMSA 33
C-5. Niagara Falls PMSA 34
C-6. Elmira MSA 35
C-7. Orange County PMSA 36
C-8. Poughkeepsie MSA 37
C-9. Rochester MSA 38
C-10. Syracuse MSA 40
C-11. Utica-Rome MSA 41

D--Employment of Women Workers

D-1. New York State 42
D-2. New York Combined Area 43
D-3. Upstate Areas 45

Explanation of Data i

List of Publications v

MONTH IN REVIEW
July 1988

Sub-state labor force estimates beginning with data for April 1988 were developed under a new methodology required by the U.S. Department of Labor and are not comparable to data released previously. Sub-state estimates for a year ago in this report have been developed using the new methodology but have not been validated as the official estimates of the U.S. Department of Labor. More-over, they cannot be used in the allocation of federal funds. They are presented in this report for analytical purposes only.

Civilian Labor Force

The unemployment rate in New York state increased sharply in July 1988 to 4.2 percent, up 0.8 of a percentage point from June. Despite the over-the-month rise in unemployment, employment set a new all-time high. The July unemployment rate was very low when judged by historic standards and was the lowest rate on record for the month (The historical series began in January 1970.) Since July 1987, the unemployment rate has declined 0.3 of a percentage point.

Resident employment in the state expanded 84,000 in July to 8,350,000, surpassing 8.3 million for the first time. Although the July gain was below seasonal expectations, it followed a June increase which was the largest single month advance on record. Over the year, resident employment was up 83,000.

The number of unemployed persons moved up 76,000 in July to 365,000, reflecting an increase in unemployed job losers (following record hiring in June) and job leavers (persons seeking better jobs). Unemployment was down 28,000 since July 1987.

Nonfarm Employment

Nonagricultural employment (which excludes agricultural workers, the self-employed, unpaid family workers and domestic workers in private households) was at a record high for the month of July in spite of summer-related cutbacks. The state's nonfarm job count fell 64,700 from an all-time high in June 1988 to 8,210,900 in July with unpaid furloughs of workers in local education and the manufacturing sector accounting for the bulk of the downturn.

The job counts in construction, finance, insurance and real estate, and services exceeded all previous levels. Construction employment (+6,600) continued to approach its seasonal peak (August-September) with most of the activity in the special trade contractor and housing industries. The housing industry is expected to have a strong year despite a projected rise in lending rates. All segments of the finance, insurance and real estate group (+5,500) contributed toward the upturn, with hires by realtors responsible for over half of the job increase. The beleaguered financial sector experienced slight gains in employment for the second month in a row, following a 5-month decline. Services jobs rose 5,300 as seasonal staff buildup by the majority of services industries, especially the lodging and recreational services industries, more than offset temporary summer furloughs in private education.

Despite seasonal job losses, government and trade employment were above previous July job levels. The decline in public employment (-43,300) could be traced to local education where non-salaried personnel were on unpaid summer vacation. Hires in local noneducation, particularly summer youth funded by the Job Training Partnership Act, softened the government decrease. Job losses in trade, totaling 11,800, were reported by both wholesalers and retailers with the largest portion of the job increase in restaurant positions.

Factory employment was down 19,000 in July, a decline that was not as severe as in prior years. Fewer workers on unpaid vacation this year was the reason for the smaller decrease. Approximately 55 percent of the manufacturing job reduction occurred in the nondurable goods segment. The apparel industry dominated the decrease in nondurable goods jobs, while the electrical machinery industry posted the largest decrease among hard goods components. Transportation and public utilities employment declined 8,200 reflecting summer cutbacks in the school bus industry.

Compared with a year ago, the number of nonfarm jobs in July 1988 was higher by 146,800 or 1.8 percent. Over half of the job growth occurred in the services division.

EXPLANATION OF DATA

EMPLOYED AND UNEMPLOYED

Employed and Unemployed. Employment and unemployment estimates prepared by the New York State Department of Labor are developed under a cooperative federal-state program administered by the Bureau of Labor Statistics (BLS) of the U.S. Department of Labor. The Current Population Survey (CPS)--the official survey instrument for measuring labor force attachment in the United States--is a monthly survey of about 54,000 households conducted throughout the nation by trained interviewers. Employment and unemployment data for New York State and New York City are based directly on responses of households within the state and city which are represented in the CPS sample.

The size of the CPS sample is not sufficient to provide reliable estimates for labor areas in the "balance of state" (state less New York City). In these areas, a series of factors are applied to administrative statistics from state unemployment insurance (UI) operations and to payroll statistics from establishment surveys to provide data on resident employment and unemployment. Data for these labor areas are adjusted so they add to "balance of state" totals.

These revised procedures, which were put into effect in January 1978, are designed to make the estimates more comparable from state to state and to incorporate more current data in the estimating process.

Employed. Employed persons are all those who during the week including the 12th of the month, (a) did any work at all as paid employees or in their own business or profession, or farm or who worked 15 hours or more as unpaid workers in an enterprise operated by a member of the family, or (b) did not work but who had jobs or businesses from which they were temporarily absent because of illness, bad weather, vacation, labor-management dispute, or personal reasons, whether or not they were paid by their employers for the time off, and whether or not they were seeking other jobs. Each employed person is counted only once.

Unemployed. Unemployed persons are all those persons who did not work during the week including the 12th of the month, who made specific efforts to find a job within the past four weeks, and who were available for work during the week except for temporary illness. Also included as unemployed are those who did not work at all, were available for work, and (a) were waiting to be called back to a job from which they had been laid off, or (b) were waiting to report to a new wage or salary job with 30 days.

Civilian Labor Force. The civilian labor force comprises all civilians classified as employed or unemployed in accordance with the criteria described above. The civilian labor force participation rate is the ratio of the civilian labor force to the civilian noninstitutional population.

Rate of Unemployment. The rate is the total number of unemployed persons expressed as a percentage of the employed and unemployed, i.e., as a percentage of the civilian labor force.

Not in the Labor Force. Not in the labor force includes all persons 16 years of age or older who are not classified as employed or unemployed.

NONAGRICULTURAL EMPLOYMENT, HOURS AND EARNINGS

Benchmark. Represents a comprehensive count of employment for the various nonagricultural industries as of the first quarter of each year. The primary source of benchmark information is employment data received from establishments covered by the New York State Unemployment

Insurance Law. Benchmark data for the remainder are obtained from the records of other private and governmental agencies. Employment estimates for the latest benchmark year and for the previous year are normally subject to revision annually. Current estimates are based on the March 1987 benchmark level for each industry.

Hours and earnings data are analyzed each year to maintain continuity of series.

Earnings, Average. For manufacturing, the averages cover production and related workers only. For the remaining industries, averages cover all nonsupervisory employees and working supervisors unless otherwise specified.

--**Earnings, Average Hourly.** Represents payrolls divided by total number of hours worked or paid for (including paid holiday, vacation, sick leave hours) during period reported. Total payroll includes both straight-time and premium pay. The averages are influenced by the amount of premium pay, as well as by changes in composition of labor force, changes in wage rates, upgrading of employees, etc., and consequently should not be interpreted as wage rates.

--**Earnings, Average Weekly.** Derived by multiplying average weekly hours by average hourly earnings. Includes premium wages for overtime and night shift work and payments made on piecework or incentive basis. The averages are affected by changes in length of workweek, part-time work, stoppages for varying causes, labor turnover, and absenteeism.

Employment, Nonfarm. Estimates include all nonfarm wage and salary workers who received pay for any part of the pay period including the 12th of the month. Persons on paid sick leave, paid holiday or paid vacation are included, but those on leave without pay for the entire payroll period are excluded. Persons on the payroll of more than one establishment during the period are counted each time reported. Self-employed persons, unpaid family workers, and domestics are excluded.

Historical Continuity. Historical continuity of statistics of average hours and earnings of manufacturing production workers has been interrupted for a number of industry groups because of changes in the composition of reporting samples or changes in the relative weight of individual industries in group totals. The starting month of a revised series is identified in a footnote in the issue in which the revision is introduced. Some series have been discontinued pending improvement in the reporting samples.

Hours, Average Weekly. See *Earnings, Average* for description of workers covered. The averages represent total number of hours worked (including overtime) or paid for (including paid holiday, vacation, and sick leave hours) during week divided by number of employees. The averages are affected by amount of labor turnover during week, changes in amount of overtime hours, and by changes in ratio of full-time or part-time eployment.

--**Hours, Average Weekly Overtime.** Represents total number of overtime hours worked by production workers during the week divided by total number of production workers. Overtime hours include those for which premiums were paid because those hours were in excess of the number of hours of either the straight-time workday or the workweek. Hours worked on Saturday, Sunday or holidays are included only if premium wage rates were paid.

Nonagricultural Establishments. All employing units except commercial and noncommercial farms, international government and private households.

Production Workers. Includes working foremen and all nonsupervisory workers (including leadmen and trainees) engaged in fabricating, processing, assembling, inspection, receiving, storage, handling, packing, warehousing, shipping, maintenance, repair, janitorial and watchman services, product development, auxiliary production for plant's own use (e.g., power plant), and in record-

keeping and other services closely associated with the above production operations. Excludes supervisory employees (above the working foremen level) and their clerical staffs, routemen, salesmen and force-account construction workers.

Reference Week of the Month. Employment, payrolls, hours, and earnings data are based on reports from firms covering a pay period, usually the week, including the 12th of the month.

METROPOLITAN STATISTICAL AREA

A metropolitan statistical area (MSA) is defined according to a set of detailed standards prepared by the Federal Committee on MSAs. Under these standards, which were revised in 1980, areas are designated as an MSA in one of two ways: If there is a city of at least 50,000 population, or an urbanized area of at least 50,000 with a total metropolitan population of at least 100,000. In New York State, MSAs are defined in terms of entire counties. In addition to the county containing the main city, an MSA also includes additional counties having strong economic and social ties to the central county.

Most MSA definitions are not subject to change until after the next national census. However, supplemental announcements of a few new MSAs may be issued in the spring of each year, generally because additional cities have reached the 50,000 level according to official population estimates.

If an area has more than 1 million population and meets certain other specified requirements, it will now be termed a Consolidated Metropolitan Statistical Area (CMSA), consisting of major components recognized as Primary Metropolitan Statistical Areas (PMSAs).

A number of areas in the state do not meet the criteria for recognition as an MSA but estimates are published for them. These areas are called Labor Market Areas (LMAs).

The geographic compostion of the areas (which differ from the administrative jurisdictions of the unemployment insurance and job service program) is given below.

Albany-Schenectady-Troy MSA. Albany, Montgomery, Greene, Rensselaer, Saratoga and Schenectady counties.
Binghamton MSA. Broome and Tioga counties.
Buffalo-Niagara Falls CMSA. Erie and Niagara counties.
Buffalo PMSA. Erie County.
Elmira MSA. Chemung County.
Nassau-Suffolk PMSA. Nassau and Suffolk counties.
New York City. Bronx, Kings, New York, Queens and Richmond counties.
New York Combined Area. Bronx, Kings, Nassau, New York, Queens, Richmond, Putnam, Rockland, Suffolk and Westchester counties.
New York PMSA. New York City and Putnam, Rockland and Westchester counties.
Niagara Falls PMSA. Niagara County.
Orange County PMSA. Orange County.
Poughkeepsie MSA. Dutchess County.
Rochester MSA. Livingston, Monroe, Ontario, Orleans and Wayne Counties.
Rockland LMA. Rockland County.
Syracuse MSA. Madison, Onondaga and Oswego counties.
Utica-Rome MSA. Herkimer and Oneida counties.
Westchester LMA. Westchester County.

INDUSTRIAL CLASSIFICATION

Data are classified in accordance with the 1972 edition of the *Standard Industrial Classification (SIC) Manual* prepared by the U.S. Office of Management and Budget. Coverage of the classification *services and miscellaneous* varies geographically. For New York State and New York City, this classification includes: the services industry division; forestry, fisheries and selected services relating to agriculture; and nonclassifiable establishments. For space requirements on the statistical tables, the formal SIC title for most of the industry groups have been replaced by the short SIC title as contained in Appendix B of the 1972 edition of the *SIC Manual-List of short SIC titles*. SIC titles used for groupings of two or more two-digit manufacturing industries reflect, to the extent possible, the respective components.

MISCELLANEOUS EXPLANATIONS

Effect of rounding. Detail figures may not add to total because of rounding.

Revisions. Revised figures are preceded by an "r" when first published.

KEY

Blank or-	Series not available due to inadequate sample size or other technical reasons.
n.a.	Data not available at date of publication.
n.c.	Not comparable with current data due to a break in series.
d	Figures withheld to avoid disclosure of data of individual reporting units.
*	Less than 0.05 percent.
r	Revised.

OTHER RECURRENT REPORTS

1. **Employment Trends.** Monthly for New York State. Highlights current developments in employment and unemployment.

2. **Labor Area Summary.** Monthly for the 11 major labor areas of the state. Includes analysis of employment and unemployment developments. Obtainable from district offices of the Bureau of Labor Market Information.

3. **Annual Labor Area Report.** Economic developments and outlook, population and labor force characteristics and trends, employment developments and outlook by industry and occupation, trends in employment and unemployment. Fiscal year reports are available for the state, selected major labor areas and New York City.

4. **Unemployment Insurance Tax Rates.** Annual. Rates by industry and size of firm and effects of factors that entered into determination of rates.

5. **Occupational Employment Statistics.** Series of individual triennial reports analyzing and detailing occupational patterns by industry sector: manufacturing, selected nonmanufacturing, wholesale and retail trade, regulated industries, and federal, state and local government.

6. **Collective Bargaining Settlements in New York State.** Quarterly. Summarizes each settlement (changes in wages and fringe benefits) affecting 250 or more workers.

7. **Calendar of Collective Bargaining, New York State, 1988.** This report lists all agreements covering 500 or more workers known to the Division of Research that expire or are subject to a wage reopening in 1988. The report is organized by month of expiration or reopening and, within each month, by industry.

8. **Statistics on Work Stoppages, New York State.** Annual. Data on the number of strikes, the number of workers involved and man-days idle; describes major work stoppages.

9. **Work Stoppages in New York State.** Monthly. Listing gives parties, number of workers directly affected, locations and dates.

10. **Consumer Price Index, Selected Areas and Population Groups.** This bimonthly report presents tabular material on the Consumer Price Index for the United States, New York City SMSA, Buffalo SMSA, and by selected urban population size class. Data are presented for all urban consumers, and wage earners and clerical workers.

SPECIAL REPORTS

Special Reports 13, 14, 17 and/or 18 may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Publications Unit.

11. **Occupational Brief.** Occupational briefs are available for: *Computer Programmer, Cosmetologist, General Duty (Registered) Nurse, Licensed Practical Nurse, Occupational Therapist and Assistant, and Physical Therapist and Assistant.* The booklets, intended primarily for use by youth and counselors, include typical job duties performed, earnings expected, typical hours and days worked, working conditions, educational requirements, job locations, opportunities for advancement, employment outlook, and other related information.

12. **Affirmative Action Data, Total, Female and Minority Population: 1980.** This booklet provides data from the 1980 Census for New York State, standard metropolitan statistical areas (SMSA's), counties, and subdivisions with population of 25,000 or more, for use in preparing or assessing affirmative actions plans. Tables show total population, and populations of females and minorities, with distributions by race and Hispanic origin. March 1982.

13. **High-Technology Industries in New York State.** Acting on a commission from the NYS Science and Technology Foundation, the Battelle Corporation identified 52 high-technology industries which are both desirable and feasible for New York State. The industries in which New York has the best competitive position are the subject of this report. The report includes information on employment and wages in these 52 industries, detailed by four-digit-SIC industry code and by area. Where possible, comparisons have been made with high-technology industries nationwide. April 1983. Price $5.00.

14. **Occupations in High-Technology Industries in New York State.** This report contains information on the occupations found in 52 high-technology industries selected for their potential for long-term growth in the state; it complements *High-Technology Industries in New York State*. The report includes sections covering occupational staffing patterns, significant occupations, apprenticeship occupations, assemblers, educational requirements, occupational supply and demand, and occupational outlook. July 1983. Price $5.00

15. **Total and Civilian Labor Force Summary, Selected Demographic Groups, New York State, Counties, and SMSA's, 1980.** This booklet contains labor force data from the 1980 Census for New York State, its standard metropolitan statistical areas, counties, and New York City, for use in developing and assessing affirmative action plans. Tables include: total and civilian labor force; employment, unemployment, and the unemployment rate for all persons 16 years of age and older and for females, blacks, American Indians, Eskimos, and Aleuts, Asians and Pacific Islanders, and persons of Hispanic origin. Percent distributions are also shown. March 1983.

16. **Civilian Labor Force by Occupation, Selected Demographic Groups, 1980.** These tables, which contain data from the 1980 Census, can be used in developing and assessing affirmative action plans. They show civilian labor force data by occupation for persons aged 16 and over. Data are also included for females, minorities, Hispanics, blacks, and other races. Tables are available for New York State, Standard Metropolitan Statistical Areas, and counties. February 1984.

17. **The Jobseeker.** A 106-page guide designed primarily to assist young people entering the job market. Contains sections on the explanation of the job market/labor force, kinds of employers, kinds of occupations, how to choose an occupation, chances of finding a job, what to do to find a job, how to prepare a resume, how to complete an employment application, how to do well at a job interview. Also contains occupational profiles on 133 occupations of interest to youth, with information on each regarding: number of employed, where found, job outlook, education needed, personal characteristics, and earnings. (First five copies are free. Additional copies are available at 50 cents per copy.) February 1986.

18. **Occupations Licensed or Certified by New York State.** This publication contains licensing requirements for 65 occupations (training, tests and fees) as well as information on employment outlook, earnings, and working conditions for these occupations. The report also includes a list of apprenticable occupations. May 1987. Price $10.00.

B-PUBLICATIONS

235. **A History of Unemployment Insurance Legislation in the United States and New York State, 1935-1983.** A report on the background of the unemployment insurance system and changes in federal and state legislation from 1935 to 1983.

SPECIAL BULLETINS

Special Bulletins may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Office of Communications, New York State Department of Labor, W. Averell Harriman State Office Building Campus, Albany, New York 12240.

254. **Directory of Labor Unions and Employee Organizations in New York State, 1987-88.** This edition lists names and addresses of principal or executive officers of over 5,000 local, state and national or international employee organizations representing workers in New York State. Both public employee and private industry unions are included in the directory. Price $10.00.

LABOR RESEARCH REPORTS

85-4. **Statistics Relative to the New York State Unemployment Insurance Fund, 1936-1984.** This publication brings together updated historical statistics pertaining to the New York State Unemployment Insurance Fund. Data in each table extend as far back over the history of the UI program as they are available.

87-2. **Unemployment Insurance Beneficiaries in New York State, Benefit Year Ending in 1985.** Describes personal characteristics, work background, and benefit experience of unemployed workers who drew benefits in 1985.

88-1. **Occupational Injuries and Illnesses Survey, State and Local Government, New York State, 1986.** An annual survey by the Labor Department of work-related fatalities, injuries and illnesses in the public sector. The survey is required by the New York Public Employee Safety and Health Act of 1980.

Explanation of Data i

List of Publications v

MONTH IN REVIEW
August 1988

Sub-state labor force estimates beginning with data for April 1988 were developed under a new methodology required by the U.S. Department of Labor and are not comparable to data released previously. Sub-state estimates for a year ago in this report have been developed using the new methodology but have not been validated as the official estimates of the U.S. Department of Labor. Moreover, they cannot be used in the allocation of federal funds. They are presented in this report for analytical purposes only.

Civilian Labor Force

The unemployment rate in New York State in August 1988 was unchanged from July at 4.2 percent, and was the lowest rate on record for the month. The state's unemployment rate has been at or below 5.0 percent since April 1987. In August 1987, the jobless rate was 4.3 percent.

Resident employment in the state expanded 25,000 between July and August to 8,375,000 and set an all-time high for the second consecutive month. Over the year, the number of employed New Yorkers has grown by 95,000.

The number of unemployed persons, at 367,000, was virtually unchanged over the month. Since August 1987, unemployment was down 9,000.

Nonfarm Employment

Nonagricultural employment (which excludes agricultural workers, the self-employed, unpaid family workers and domestic workers in private households) expanded 13,700 from July to 8,224,600 in August 1988, a new high for the month. Factory workers, returning to their jobs after unpaid vacations, led the employment upturn.

Manufacturing employment rose 12,800 in August with 9,400 or nearly three-quarters of the upturn in the nondurable goods segment. The nondurable goods job growth was sparked by increases in apparel and food processing employment. Compared with a year ago, the current manufacturing job count was essentially unchanged, reflecting the recent stability in this sector.

Employment in construction and services surpassed all previous records. Construction continues to be the fastest growing major industry in the state. In August, hiring by special trade contractors and general building contractors caused the 6,700 upturn in construction jobs. Employment in the services division (+2,400) presented a mixed picture with job gains outweighing job losses. Business services reported the largest increase, while the largest job decrease occurred in private education as summer education programs ended. The return to work of striking television and motion picture script writers bolstered the pickup in services jobs.

Three industry divisions--trade, finance, insurance and real estate, and government--set employment highs for the month of August. Seasonal hiring at restaurants, which accounted for two-thirds of the job gain, dominated the increase in trade employment (+3,900). Despite employment losses, both finance, insurance and real estate (-500) and government (-11,600) jobs remained above previous August job levels. Continued retrenchment in the banking and brokerage industries more than offset gains by other industries in the finance, insurance and real estate group. Employment in the banking and brokerage industries combined was down 13,200 since one year ago. The bulk of the decline in public employment occurred in local education as some summer education programs ended. Employment in the transportation and public utilities division was unchanged over the month.

Since August 1987, the number of jobs on nonfarm payrolls has increased 146,400, or 1.8 percent. Nearly 60 percent of the growth in nonfarm employment occurred in the services division.

EXPLANATION OF DATA

EMPLOYED AND UNEMPLOYED

Employed and Unemployed. Employment and unemployment estimates prepared by the New York State Department of Labor are developed under a cooperative federal-state program administered by the Bureau of Labor Statistics (BLS) of the U.S. Department of Labor. The Current Population Survey (CPS)--the official survey instrument for measuring labor force attachment in the United States--is a monthly survey of about 54,000 households conducted throughout the nation by trained interviewers. Employment and unemployment data for New York State and New York City are based directly on responses of households within the state and city which are represented in the CPS sample.

The size of the CPS sample is not sufficient to provide reliable estimates for labor areas in the "balance of state" (state less New York City). In these areas, a series of factors are applied to administrative statistics from state unemployment insurance (UI) operations and to payroll statistics from establishment surveys to provide data on resident employment and unemployment. Data for these labor areas are adjusted so they add to "balance of state" totals.

These revised procedures, which were put into effect in January 1978, are designed to make the estimates more comparable from state to state and to incorporate more current data in the estimating process.

Employed. Employed persons are all those who during the week including the 12th of the month, (a) did any work at all as paid employees or in their own business or profession, or farm or who worked 15 hours or more as unpaid workers in an enterprise operated by a member of the family, or (b) did not work but who had jobs or businesses from which they were temporarily absent because of illness, bad weather, vacation, labor-management dispute, or personal reasons, whether or not they were paid by their employers for the time off, and whether or not they were seeking other jobs. Each employed person is counted only once.

Unemployed. Unemployed persons are all those persons who did not work during the week including the 12th of the month, who made specific efforts to find a job within the past four weeks, and who were available for work during the week except for temporary illness. Also included as unemployed are those who did not work at all, were available for work, and (a) were waiting to be called back to a job from which they had been laid off, or (b) were waiting to report to a new wage or salary job with 30 days.

Civilian Labor Force. The civilian labor force comprises all civilians classified as employed or unemployed in accordance with the criteria described above. The civilian labor force participation rate is the ratio of the civilian labor force to the civilian noninstitutional population.

Rate of Unemployment. The rate is the total number of unemployed persons expressed as a percentage of the employed and unemployed, i.e., as a percentage of the civilian labor force.

Not in the Labor Force. Not in the labor force includes all persons 16 years of age or older who are not classified as employed or unemployed.

NONAGRICULTURAL EMPLOYMENT, HOURS AND EARNINGS

Benchmark. Represents a comprehensive count of employment for the various nonagricultural industries as of the first quarter of each year. The primary source of benchmark information is employment data received from establishments covered by the New York State Unemployment

Insurance Law. Benchmark data for the remainder are obtained from the records of other private and governmental agencies. Employment estimates for the latest benchmark year and for the previous year are normally subject to revision annually. Current estimates are based on the March 1987 benchmark level for each industry.

Hours and earnings data are analyzed each year to maintain continuity of series.

Earnings, Average. For manufacturing, the averages cover production and related workers only. For the remaining industries, averages cover all nonsupervisory employees and working supervisors unless otherwise specified.

--**Earnings, Average Hourly.** Represents payrolls divided by total number of hours worked or paid for (including paid holiday, vacation, sick leave hours) during period reported. Total payroll includes both straight-time and premium pay. The averages are influenced by the amount of premium pay, as well as by changes in composition of labor force, changes in wage rates, upgrading of employees, etc., and consequently should not be interpreted as wage rates.

--**Earnings, Average Weekly.** Derived by multiplying average weekly hours by average hourly earnings. Includes premium wages for overtime and night shift work and payments made on piecework or incentive basis. The averages are affected by changes in length of workweek, part-time work, stoppages for varying causes, labor turnover, and absenteeism.

Employment, Nonfarm. Estimates include all nonfarm wage and salary workers who received pay for any part of the pay period including the 12th of the month. Persons on paid sick leave, paid holiday or paid vacation are included, but those on leave without pay for the entire payroll period are excluded. Persons on the payroll of more than one establishment during the period are counted each time reported. Self-employed persons, unpaid family workers, and domestics are excluded.

Historical Continuity. Historical continuity of statistics of average hours and earnings of manufacturing production workers has been interrupted for a number of industry groups because of changes in the composition of reporting samples or changes in the relative weight of individual industries in group totals. The starting month of a revised series is identified in a footnote in the issue in which the revision is introduced. Some series have been discontinued pending improvement in the reporting samples.

Hours, Average Weekly. See *Earnings, Average* for description of workers covered. The averages represent total number of hours worked (including overtime) or paid for (including paid holiday, vacation, and sick leave hours) during week divided by number of employees. The averages are affected by amount of labor turnover during week, changes in amount of overtime hours, and by changes in ratio of full-time or part-time eployment.

--**Hours, Average Weekly Overtime.** Represents total number of overtime hours worked by production workers during the week divided by total number of production workers. Overtime hours include those for which premiums were paid because those hours were in excess of the number of hours of either the straight-time workday or the workweek. Hours worked on Saturday, Sunday or holidays are included only if premium wage rates were paid.

Nonagricultural Establishments. All employing units except commercial and noncommercial farms, international government and private households.

Production Workers. Includes working foremen and all nonsupervisory workers (including leadmen and trainees) engaged in fabricating, processing, assembling, inspection, receiving, storage, handling, packing, warehousing, shipping, maintenance, repair, janitorial and watchman services, product development, auxiliary production for plant's own use (e.g., power plant), and in record-

keeping and other services closely associated with the above production operations. Excludes supervisory employees (above the working foremen level) and their clerical staffs, routemen, salesmen and force-account construction workers.

Reference Week of the Month. Employment, payrolls, hours, and earnings data are based on reports from firms covering a pay period, usually the week, including the 12th of the month.

METROPOLITAN STATISTICAL AREA

A metropolitan statistical area (MSA) is defined according to a set of detailed standards prepared by the Federal Committee on MSAs. Under these standards, which were revised in 1980, areas are designated as an MSA in one of two ways: If there is a city of at least 50,000 population, or an urbanized area of at least 50,000 with a total metropolitan population of at least 100,000. In New York State, MSAs are defined in terms of entire counties. In addition to the county containing the main city, an MSA also includes additional counties having strong economic and social ties to the central county.

Most MSA definitions are not subject to change until after the next national census. However, supplemental announcements of a few new MSAs may be issued in the spring of each year, generally because additional cities have reached the 50,000 level according to official population estimates.

If an area has more than 1 million population and meets certain other specified requirements, it will now be termed a Consolidated Metropolitan Statistical Area (CMSA), consisting of major components recognized as Primary Metropolitan Statistical Areas (PMSAs).

A number of areas in the state do not meet the criteria for recognition as an MSA but estimates are published for them. These areas are called Labor Market Areas (LMAs).

The geographic compostion of the areas (which differ from the administrative jurisdictions of the unemployment insurance and job service program) is given below.

Albany-Schenectady-Troy MSA. Albany, Montgomery, Greene, Rensselaer, Saratoga and Schenectady counties.
Binghamton MSA. Broome and Tioga counties.
Buffalo-Niagara Falls CMSA. Erie and Niagara counties.
Buffalo PMSA. Erie County.
Elmira MSA. Chemung County.
Nassau-Suffolk PMSA. Nassau and Suffolk counties.
New York City. Bronx, Kings, New York, Queens and Richmond counties.
New York Combined Area. Bronx, Kings, Nassau, New York, Queens, Richmond, Putnam, Rockland, Suffolk and Westchester counties.
New York PMSA. New York City and Putnam, Rockland and Westchester counties.
Niagara Falls PMSA. Niagara County.
Orange County PMSA. Orange County.
Poughkeepsie MSA. Dutchess County.
Rochester MSA. Livingston, Monroe, Ontario, Orleans and Wayne Counties.
Rockland LMA. Rockland County.
Syracuse MSA. Madison, Onondaga and Oswego counties.
Utica-Rome MSA. Herkimer and Oneida counties.
Westchester LMA. Westchester County.

INDUSTRIAL CLASSIFICATION

Data are classified in accordance with the 1972 edition of the *Standard Industrial Classification (SIC) Manual* prepared by the U.S. Office of Management and Budget. Coverage of the classification *services and miscellaneous* varies geographically. For New York State and New York City, this classification includes: the services industry division; forestry, fisheries and selected services relating to agriculture; and nonclassifiable establishments. For space requirements on the statistical tables, the formal SIC title for most of the industry groups have been replaced by the short SIC title as contained in Appendix B of the 1972 edition of the *SIC Manual-List of short SIC titles*. SIC titles used for groupings of two or more two-digit manufacturing industries reflect, to the extent possible, the respective components.

MISCELLANEOUS EXPLANATIONS

Effect of rounding. Detail figures may not add to total because of rounding.

Revisions. Revised figures are preceded by an "r" when first published.

KEY

Blank or-	Series not available due to inadequate sample size or other technical reasons.
n.a.	Data not available at date of publication.
n.c.	Not comparable with current data due to a break in series.
d	Figures withheld to avoid disclosure of data of individual reporting units.
*	Less than 0.05 percent.
r	Revised.

OTHER RECURRENT REPORTS

1. **Employment Trends.** Monthly for New York State. Highlights current developments in employment and unemployment.

2. **Labor Area Summary.** Monthly for the 11 major labor areas of the state. Includes analysis of employment and unemployment developments. Obtainable from district offices of the Bureau of Labor Market Information.

3. **Annual Labor Area Report.** Economic developments and outlook, population and labor force characteristics and trends, employment developments and outlook by industry and occupation, trends in employment and unemployment. Fiscal year reports are available for the state, selected major labor areas and New York City.

4. **Unemployment Insurance Tax Rates.** Annual. Rates by industry and size of firm and effects of factors that entered into determination of rates.

5. **Occupational Employment Statistics.** Series of individual triennial reports analyzing and detailing occupational patterns by industry sector: manufacturing, selected nonmanufacturing, wholesale and retail trade, regulated industries, and federal, state and local government.

6. **Occupational Needs, New York State, 1989-1991.** Projects the demand for workers in various jobs. The report is based on occupational employment statistics surveys which examine occupational distributions on a three-year cycle. The surveys involve a statistical sample of industries throughout the state to obtain their occupational staffing patterns.

7. **Collective Bargaining Settlements in New York State.** Quarterly. Summarizes each settlement (changes in wages and fringe benefits) affecting 250 or more workers.

8. **Calendar of Collective Bargaining, New York State, 1988.** This report lists all agreements covering 500 or more workers known to the Division of Research that expire or are subject to a wage reopening in 1988. The report is organized by month of expiration or reopening and, within each month, by industry.

9. **Statistics on Work Stoppages, New York State.** Annual. Data on the number of strikes, the number of workers involved and man-days idle; describes major work stoppages.

10. **Work Stoppages in New York State.** Monthly. Listing gives parties, number of workers directly affected, locations and dates.

11. **Consumer Price Index, Selected Areas and Population Groups.** This bimonthly report presents tabular material on the Consumer Price Index for the United States, New York City SMSA, Buffalo SMSA, and by selected urban population size class. Data are presented for all urban consumers, and wage earners and clerical workers.

SPECIAL REPORTS

Special Reports 14, 15, 18 and/or 19 may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Publications Unit.

12. **Occupational Brief.** Occupational briefs are available for: *Computer Programmer, Cosmetologist, General Duty (Registered) Nurse, Licensed Practical Nurse, Occupational Therapist and Assistant, and Physical Therapist and Assistant.* The booklets, intended primarily for use by youth and counselors, include typical job duties performed, earnings expected, typical hours and days worked, working conditions, educational requirements, job locations, opportunities for advancement, employment outlook, and other related information.

13. **Affirmative Action Data, Total, Female and Minority Population: 1980.** This booklet provides data from the 1980 Census for New York State, standard metropolitan statistical areas (SMSA's), counties, and subdivisions with population of 25,000 or more, for use in preparing or assessing affirmative actions plans. Tables show total population, and populations of females and minorities, with distributions by race and Hispanic origin. March 1982.

14. **High-Technology Industries in New York State.** Acting on a commission from the NYS Science and Technology Foundation, the Battelle Corporation identified 52 high-technology industries which are both desirable and feasible for New York State. The industries in which New York has the best competitive position are the subject of this report. The report includes information on employment and wages in these 52 industries, detailed by four-digit-SIC industry code and by area. Where possible, comparisons have been made with high-technology industries nationwide. April 1983. Price $5.00.

15. **Occupations in High-Technology Industries in New York State.** This report contains information on the occupations found in 52 high-technology industries selected for their potential for long-term growth in the state; it complements *High-Technology Industries in New York State.* The report includes sections covering occupational staffing patterns, significant occupations, apprenticeship occupations, assemblers, educational requirements, occupational supply and demand, and occupational outlook. July 1983. Price $5.00

16. **Total and Civilian Labor Force Summary, Selected Demographic Groups, New York State, Counties, and SMSA's, 1980.** This booklet contains labor force data from the 1980 Census for New York State, its standard metropolitan statistical areas, counties, and New York City, for use in developing and assessing affirmative action plans. Tables include: total and civilian labor force; employment, unemployment, and the unemployment rate for all persons 16 years of age and older and for females, blacks, American Indians, Eskimos, and Aleuts, Asians and Pacific Islanders, and persons of Hispanic origin. Percent distributions are also shown. March 1983.

17. **Civilian Labor Force by Occupation, Selected Demographic Groups, 1980.** These tables, which contain data from the 1980 Census, can be used in developing and assessing affirmative action plans. They show civilian labor force data by occupation for persons aged 16 and over. Data are also included for females, minorities, Hispanics, blacks, and other races. Tables are available for New York State, Standard Metropolitan Statistical Areas, and counties. February 1984.

18. **The Jobseeker.** A 106-page guide designed primarily to assist young people entering the job market. Contains sections on the explanation of the job market/labor force, kinds of employers, kinds of occupations, how to choose an occupation, chances of finding a job, what to do to find a job, how to prepare a resume, how to complete an employment application, how to do well at a job interview. Also contains occupational profiles on 133 occupations of interest to youth, with information on each regarding: number of employed, where found, job outlook, education needed, personal characteristics, and earnings. (First five copies are free. Additional copies are available at 50 cents per copy.) February 1986.

19. **Occupations Licensed or Certified by New York State.** This publication contains licensing requirements for 65 occupations (training, tests and fees) as well as information on employment outlook, earnings, and working conditions for these occupations. The report also includes a list of apprenticable occupations. May 1987. Price $10.00.

B-PUBLICATIONS

235. **A History of Unemployment Insurance Legislation in the United States and New York State, 1935-1983.** A report on the background of the unemployment insurance system and changes in federal and state legislation from 1935 to 1983.

SPECIAL BULLETINS

Special Bulletins may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Office of Communications, New York State Department of Labor, W. Averell Harriman State Office Building Campus, Albany, New York 12240.

254. **Directory of Labor Unions and Employee Organizations in New York State, 1987-88.** This edition lists names and addresses of principal or executive officers of over 5,000 local, state and national or international employee organizations representing workers in New York State. Both public employee and private industry unions are included in the directory. Price $10.00.

LABOR RESEARCH REPORTS

85-4. **Statistics Relative to the New York State Unemployment Insurance Fund, 1936-1984.** This publication brings together updated historical statistics pertaining to the New York State Unemployment Insurance Fund. Data in each table extend as far back over the history of the UI program as they are available.

87-2. **Unemployment Insurance Beneficiaries in New York State, Benefit Year Ending in 1985.** Describes personal characteristics, work background, and benefit experience of unemployed workers who drew benefits in 1985.

88-1. **Occupational Injuries and Illnesses Survey, State and Local Government, New York State, 1986.** An annual survey by the Labor Department of work-related fatalities, injuries and illnesses in the public sector. The survey is required by the New York Public Employee Safety and Health Act of 1980.

Explanation of Data i

List of Publications v

MONTH IN REVIEW
September 1988

Sub-state labor force estimates beginning with data for April 1988 were developed under a new methodology required by the U.S. Department of Labor and are not comparable to data released previously. Sub-state estimates for a year ago in this report have been developed using the new methodology but have not been validated as the official estimates of the U.S. Department of Labor. Moreover, they cannot be used in the allocation of federal funds. They are presented in this report for analytical purposes only.

Civilian Labor Force

The unemployment rate in New York State in September 1988 was 4.2 percent for the third consecutive month, and the lowest on record for September. (The historical series began in January 1970.) Since a year ago, the jobless rate has declined 0.2 of a percentage point.

Resident employment in the state declined seasonally in September, falling 234,000 over the month to 8,141,000, as students returned to school. Since September 1987, resident employment has grown 127,000.

The number of unemployed persons decreased 14,000 over the month to 353,000 in September 1988. Compared with a year ago, the current jobless level was lower by 15,000.

Nonfarm Employment

Nonagricultural employment (which excludes agricultural workers, the self-employed, unpaid family workers and domestic workers in private households) was up slightly between August and September 1988, increasing 12,100 to 8,236,700, a new high for the month. The nonfarm job upturn largely reflected hires resulting from the start of the new school year.

Employment in services surpassed all previous records. The rise in services (+ 2,300) was moderate, usual for this time of year, as job gains in private education and business services were largely offset by seasonal job losses in vacation-related industries such as lodging and recreation. A strike at a private university in New York City also softened services employment growth.

Four industry divisions--trade, government, construction, and finance, insurance and real estate--were at record job levels for September. Hiring at restaurants and apparel stores led the increase in trade (+ 6,200). The number of jobs in the public sector were little changed (+ 1,900) from August as employment gains in state and local education barely exceeded job cutbacks of temporary summer help, including jobs for youth funded by the Job Training Partnership Act. Despite employment losses, jobs in construction (-1,700) and finance, insurance and real estate (-7,400) remained above previous September job levels. The seasonal decline in construction activity occurred in all component industries. The downswing in finance, insurance and real estate reflected expected losses in real estate employment, coupled with additional cutbacks in the brokerage and banking industries. Over the year, employment was down 11,300 in the brokerage industry and 4,300 in the banking industry.

Seasonal influences caused employment to advance 7,900 in the transportation and public utilities division and 2,700 in the manufacturing division. The rise in transportation and public utilities jobs could be attributed to the return to work of school bus drivers at the start of the school year. Hiring in the apparel and transportation equipment industries led the pickup in manufacturing jobs.

Since September 1987, the number of nonfarm jobs in New York State has grown 141,400 or 1.7 percent. All industry divisions, except manufacturing (-5,700), were above last September's employment levels. Job additions in services accounted for over 60 percent of the nonfarm job increase.

EXPLANATION OF DATA

EMPLOYED AND UNEMPLOYED

Employed and Unemployed. Employment and unemployment estimates prepared by the New York State Department of Labor are developed under a cooperative federal-state program administered by the Bureau of Labor Statistics (BLS) of the U.S. Department of Labor. The Current Population Survey (CPS)--the official survey instrument for measuring labor force attachment in the United States--is a monthly survey of about 54,000 households conducted throughout the nation by trained interviewers. Employment and unemployment data for New York State and New York City are based directly on responses of households within the state and city which are represented in the CPS sample.

The size of the CPS sample is not sufficient to provide reliable estimates for labor areas in the "balance of state" (state less New York City). In these areas, a series of factors are applied to administrative statistics from state unemployment insurance (UI) operations and to payroll statistics from establishment surveys to provide data on resident employment and unemployment. Data for these labor areas are adjusted so they add to "balance of state" totals.

These revised procedures, which were put into effect in January 1978, are designed to make the estimates more comparable from state to state and to incorporate more current data in the estimating process.

Employed. Employed persons are all those who during the week including the 12th of the month, (a) did any work at all as paid employees or in their own business or profession, or farm or who worked 15 hours or more as unpaid workers in an enterprise operated by a member of the family, or (b) did not work but who had jobs or businesses from which they were temporarily absent because of illness, bad weather, vacation, labor-management dispute, or personal reasons, whether or not they were paid by their employers for the time off, and whether or not they were seeking other jobs. Each employed person is counted only once.

Unemployed. Unemployed persons are all those persons who did not work during the week including the 12th of the month, who made specific efforts to find a job within the past four weeks, and who were available for work during the week except for temporary illness. Also included as unemployed are those who did not work at all, were available for work, and (a) were waiting to be called back to a job from which they had been laid off, or (b) were waiting to report to a new wage or salary job with 30 days.

Civilian Labor Force. The civilian labor force comprises all civilians classified as employed or unemployed in accordance with the criteria described above. The civilian labor force participation rate is the ratio of the civilian labor force to the civilian noninstitutional population.

Rate of Unemployment. The rate is the total number of unemployed persons expressed as a percentage of the employed and unemployed, i.e., as a percentage of the civilian labor force.

Not in the Labor Force. Not in the labor force includes all persons 16 years of age or older who are not classified as employed or unemployed.

NONAGRICULTURAL EMPLOYMENT, HOURS AND EARNINGS

Benchmark. Represents a comprehensive count of employment for the various nonagricultural industries as of the first quarter of each year. The primary source of benchmark information is employment data received from establishments covered by the New York State Unemployment

Insurance Law. Benchmark data for the remainder are obtained from the records of other private and governmental agencies. Employment estimates for the latest benchmark year and for the previous year are normally subject to revision annually. Current estimates are based on the March 1987 benchmark level for each industry.

Hours and earnings data are analyzed each year to maintain continuity of series.

Earnings, Average. For manufacturing, the averages cover production and related workers only. For the remaining industries, averages cover all nonsupervisory employees and working supervisors unless otherwise specified.

--**Earnings, Average Hourly.** Represents payrolls divided by total number of hours worked or paid for (including paid holiday, vacation, sick leave hours) during period reported. Total payroll includes both straight-time and premium pay. The averages are influenced by the amount of premium pay, as well as by changes in composition of labor force, changes in wage rates, upgrading of employees, etc., and consequently should not be interpreted as wage rates.

--**Earnings, Average Weekly.** Derived by multiplying average weekly hours by average hourly earnings. Includes premium wages for overtime and night shift work and payments made on piecework or incentive basis. The averages are affected by changes in length of workweek, part-time work, stoppages for varying causes, labor turnover, and absenteeism.

Employment, Nonfarm. Estimates include all nonfarm wage and salary workers who received pay for any part of the pay period including the 12th of the month. Persons on paid sick leave, paid holiday or paid vacation are included, but those on leave without pay for the entire payroll period are excluded. Persons on the payroll of more than one establishment during the period are counted each time reported. Self-employed persons, unpaid family workers, and domestics are excluded.

Historical Continuity. Historical continuity of statistics of average hours and earnings of manufacturing production workers has been interrupted for a number of industry groups because of changes in the composition of reporting samples or changes in the relative weight of individual industries in group totals. The starting month of a revised series is identified in a footnote in the issue in which the revision is introduced. Some series have been discontinued pending improvement in the reporting samples.

Hours, Average Weekly. See *Earnings, Average* for description of workers covered. The averages represent total number of hours worked (including overtime) or paid for (including paid holiday, vacation, and sick leave hours) during week divided by number of employees. The averages are affected by amount of labor turnover during week, changes in amount of overtime hours, and by changes in ratio of full-time or part-time eployment.

--**Hours, Average Weekly Overtime.** Represents total number of overtime hours worked by production workers during the week divided by total number of production workers. Overtime hours include those for which premiums were paid because those hours were in excess of the number of hours of either the straight-time workday or the workweek. Hours worked on Saturday, Sunday or holidays are included only if premium wage rates were paid.

Nonagricultural Establishments. All employing units except commercial and noncommercial farms, international government and private households.

Production Workers. Includes working foremen and all nonsupervisory workers (including leadmen and trainees) engaged in fabricating, processing, assembling, inspection, receiving, storage, handling, packing, warehousing, shipping, maintenance, repair, janitorial and watchman services, product development, auxiliary production for plant's own use (e.g., power plant), and in record-

keeping and other services closely associated with the above production operations. Excludes supervisory employees (above the working foremen level) and their clerical staffs, routemen, salesmen and force-account construction workers.

Reference Week of the Month. Employment, payrolls, hours, and earnings data are based on reports from firms covering a pay period, usually the week, including the 12th of the month.

METROPOLITAN STATISTICAL AREA

A metropolitan statistical area (MSA) is defined according to a set of detailed standards prepared by the Federal Committee on MSAs. Under these standards, which were revised in 1980, areas are designated as an MSA in one of two ways: If there is a city of at least 50,000 population, or an urbanized area of at least 50,000 with a total metropolitan population of at least 100,000. In New York State, MSAs are defined in terms of entire counties. In addition to the county containing the main city, an MSA also includes additional counties having strong economic and social ties to the central county.

Most MSA definitions are not subject to change until after the next national census. However, supplemental announcements of a few new MSAs may be issued in the spring of each year, generally because additional cities have reached the 50,000 level according to official population estimates.

If an area has more than 1 million population and meets certain other specified requirements, it will now be termed a Consolidated Metropolitan Statistical Area (CMSA), consisting of major components recognized as Primary Metropolitan Statistical Areas (PMSAs).

A number of areas in the state do not meet the criteria for recognition as an MSA but estimates are published for them. These areas are called Labor Market Areas (LMAs).

The geographic compostion of the areas (which differ from the administrative jurisdictions of the unemployment insurance and job service program) is given below.

Albany-Schenectady-Troy MSA. Albany, Montgomery, Greene, Rensselaer, Saratoga and Schenectady counties.
Binghamton MSA. Broome and Tioga counties.
Buffalo-Niagara Falls CMSA. Erie and Niagara counties.
Buffalo PMSA. Erie County.
Elmira MSA. Chemung County.
Nassau-Suffolk PMSA. Nassau and Suffolk counties.
New York City. Bronx, Kings, New York, Queens and Richmond counties.
New York Combined Area. Bronx, Kings, Nassau, New York, Queens, Richmond, Putnam, Rockland, Suffolk and Westchester counties.
New York PMSA. New York City and Putnam, Rockland and Westchester counties.
Niagara Falls PMSA. Niagara County.
Orange County PMSA. Orange County.
Poughkeepsie MSA. Dutchess County.
Rochester MSA. Livingston, Monroe, Ontario, Orleans and Wayne Counties.
Rockland LMA. Rockland County.
Syracuse MSA. Madison, Onondaga and Oswego counties.
Utica-Rome MSA. Herkimer and Oneida counties.
Westchester LMA. Westchester County.

INDUSTRIAL CLASSIFICATION

Data are classified in accordance with the 1972 edition of the ***Standard Industrial Classification (SIC) Manual*** prepared by the U.S. Office of Management and Budget. Coverage of the classification *services and miscellaneous* varies geographically. For New York State and New York City, this classification includes: the services industry division; forestry, fisheries and selected services relating to agriculture; and nonclassifiable establishments. For space requirements on the statistical tables, the formal SIC title for most of the industry groups have been replaced by the short SIC title as contained in Appendix B of the 1972 edition of the *SIC Manual-List of short SIC titles*. SIC titles used for groupings of two or more two-digit manufacturing industries reflect, to the extent possible, the respective components.

MISCELLANEOUS EXPLANATIONS

Effect of rounding. Detail figures may not add to total because of rounding.

Revisions. Revised figures are preceded by an "r" when first published.

KEY

Blank or-	Series not available due to inadequate sample size or other technical reasons.
n.a.	Data not available at date of publication.
n.c.	Not comparable with current data due to a break in series.
d	Figures withheld to avoid disclosure of data of individual reporting units.
*	Less than 0.05 percent.
r	Revised.

OTHER RECURRENT REPORTS

1. **Employment Trends.** Monthly for New York State. Highlights current developments in employment and unemployment.

2. **Labor Area Summary.** Monthly for the 11 major labor areas of the state. Includes analysis of employment and unemployment developments. Obtainable from district offices of the Bureau of Labor Market Information.

3. **Annual Labor Area Report.** Economic developments and outlook, population and labor force characteristics and trends, employment developments and outlook by industry and occupation, trends in employment and unemployment. Fiscal year reports are available for the state, selected major labor areas and New York City.

4. **Unemployment Insurance Tax Rates.** Annual. Rates by industry and size of firm and effects of factors that entered into determination of rates.

5. **Occupational Employment Statistics.** Series of individual triennial reports analyzing and detailing occupational patterns by industry sector: manufacturing, selected nonmanufacturing, wholesale and retail trade, regulated industries, and federal, state and local government.

6. **Occupational Needs, New York State, 1989-1991.** Projects the demand for workers in various jobs. The report is based on occupational employment statistics surveys which examine occupational distributions on a three-year cycle. The surveys involve a statistical sample of industries throughout the state to obtain their occupational staffing patterns.

7. **Collective Bargaining Settlements in New York State.** Quarterly. Summarizes each settlement (changes in wages and fringe benefits) affecting 250 or more workers.

8. **Calendar of Collective Bargaining, New York State, 1988.** This report lists all agreements covering 500 or more workers known to the Division of Research that expire or are subject to a wage reopening in 1988. The report is organized by month of expiration or reopening and, within each month, by industry.

9. **Statistics on Work Stoppages, New York State.** Annual. Data on the number of strikes, the number of workers involved and man-days idle; describes major work stoppages.

10. **Work Stoppages in New York State.** Monthly. Listing gives parties, number of workers directly affected, locations and dates.

11. **Consumer Price Index, Selected Areas and Population Groups.** This bimonthly report presents tabular material on the Consumer Price Index for the United States, New York City SMSA, Buffalo SMSA, and by selected urban population size class. Data are presented for all urban consumers, and wage earners and clerical workers.

SPECIAL REPORTS

Special Reports 14, 15, 18 and/or 19 may be obtained by sending acheck or money order, payable to the New York State Department of Labor, to the Publications Unit.

12. **Occupational Brief.** Occupational briefs are available for: ***Computer Programmer**, Cosmetologist, General Duty (Registered) Nurse, Licensed Practical Nurse, Occupational Therapist and Assistant, and Physical Therapist and Assistant.* The booklets, intended primarily for use by youth and counselors, include typical job duties performed, earnings expected, typical hours and days worked, working conditions, educational requirements, job locations, opportunities for advancement, employment outlook, and other related information.

13. **Affirmative Action Data, Total, Female and Minority Population: 1980.** This booklet provides data from the 1980 Census for New York State, standard metropolitan statistical areas (SMSA's), counties, and subdivisions with population of 25,000 or more, for use in preparing or assessing affirmative actions plans. Tables show total population, and populations of females and minorities, with distributions by race and Hispanic origin. March 1982.

14. **High-Technology Industries in New York State.** Acting on a commission from the NYS Science and Technology Foundation, the Battelle Corporation identified 52 high-technology industries which are both desirable and feasible for New York State. The industries in which New York has the best competitive position are the subject of this report. The report includes information on employment and wages in these 52 industries, detailed by four-digit-SIC industry code and by area. Where possible, comparisons have been made with high-technology industries nationwide. April 1983. Price $5.00.

15. **Occupations in High-Technology Industries in New York State.** This report contains information on the occupations found in 52 high-technology industries selected for their potential for long-term growth in the state; it complements *High-Technology Industries in New York State*. The report includes sections covering occupational staffing patterns, significant occupations, apprenticeship occupations, assemblers, educational requirements, occupational supply and demand, and occupational outlook. July 1983. Price $5.00

16. **Total and Civilian Labor Force Summary, Selected Demographic Groups, New York State, Counties, and SMSA's, 1980.** This booklet contains labor force data from the 1980 Census for New York State, its standard metropolitan statistical areas, counties, and New York City, for use in developing and assessing affirmative action plans. Tables include: total and civilian labor force; employment, unemployment, and the unemployment rate for all persons 16 years of age and older and for females, blacks, American Indians, Eskimos, and Aleuts, Asians and Pacific Islanders, and persons of Hispanic origin. Percent distributions are also shown. March 1983.

17. **Civilian Labor Force by Occupation, Selected Demographic Groups, 1980.** These tables, which contain data from the 1980 Census, can be used in developing and assessing affirmative action plans. They show civilian labor force data by occupation for persons aged 16 and over. Data are also included for females, minorities, Hispanics, blacks, and other races. Tables are available for New York State, Standard Metropolitan Statistical Areas, and counties. February 1984.

18. **The Jobseeker.** A 106-page guide designed primarily to assist young people entering the job market. Contains sections on the explanation of the job market/labor force, kinds of employers, kinds of occupations, how to choose an occupation, chances of finding a job, what to do to find a job, how to prepare a resume, how to complete an employment application, how to do well at a job interview. Also contains occupational profiles on 133 occupations of interest to youth, with information on each regarding: number of employed, where found, job outlook, education needed, personal characteristics, and earnings. (First five copies are free. Additional copies are available at 50 cents per copy.) February 1986.

19. **Occupations Licensed or Certified by New York State.** This publication contains licensing requirements for 65 occupations (training, tests and fees) as well as information on employment outlook, earnings, and working conditions for these occupations. The report also includes a list of apprenticable occupations. May 1987. Price $10.00.

B-PUBLICATIONS

235. **A History of Unemployment Insurance Legislation in the United States and New York State, 1935-1983.** A report on the background of the unemployment insurance system and changes in federal and state legislation from 1935 to 1983.

SPECIAL BULLETINS

Special Bulletins may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Office of Communications, New York State Department of Labor, W. Averell Harriman State Office Building Campus, Albany, New York 12240.

254. **Directory of Labor Unions and Employee Organizations in New York State, 1987-88.** This edition lists names and addresses of principal or executive officers of over 5,000 local, state and national or international employee organizations representing workers in New York State. Both public employee and private industry unions are included in the directory. Price $10.00.

LABOR RESEARCH REPORTS

85-4. **Statistics Relative to the New York State Unemployment Insurance Fund, 1936-1984.** This publication brings together updated historical statistics pertaining to the New York State Unemployment Insurance Fund. Data in each table extend as far back over the history of the UI program as they are available.

87-2. **Unemployment Insurance Beneficiaries in New York State, Benefit Year Ending in 1985.** Describes personal characteristics, work background, and benefit experience of unemployed workers who drew benefits in 1985.

88-1. **Occupational Injuries and Illnesses Survey, State and Local Government, New York State, 1986.** An annual survey by the Labor Department of work-related fatalities, injuries and illnesses in the public sector. The survey is required by the New York Public Employee Safety and Health Act of 1980.

List of Publications v

MONTH IN REVIEW
October 1988

Sub-state labor force estimates beginning with data for April 1988 were developed under a new methodology required by the U.S. Department of Labor and are not comparable to data released previously. Sub-state estimates for a year ago in this report have been developed using the new methodology but have not been validated as the official estimates of the U.S. Department of Labor. Moreover, they cannot be used in the allocation of federal funds. They are presented in this report for analytical purposes only.

Civilian Labor Force

The unemployment rate in New York State was at 4.2 percent for the fourth consecutive month in October 1988. The state's unemployment rate has been at or below 5.0 percent since April 1987. Since October 1987, the unemployment rate has declined 0.7 of a percentage point.

Resident employment in the state increased 44,000 in October to 8,185,000--a record high for the month. Over the year, the number of New Yorkers with work has expanded 79,000 or 1.0 percent.

Unemployment in the state increased 6,000 between September and October 1988 to 359,000. The jobless count has fallen 56,000 since October 1987.

Nonfarm Employment

In October 1988, nonfarm employment in New York State exceeded 8.3 million for the first time. The nonagricultural job count (which excludes agricultural workers,the self-employed, unpaid family workers and domestic workers in private households) increased 69,900 from September to 8,306,600 in October, primarily as a result of seasonal hiring in public and private education.

The September-October job upswing was centered in the government, services, and trade divisions. Nearly all of the gain in public sector jobs (+ 46,500) occurred in local education while services employment (+ 15,000) reached a new all-time high as private colleges and universities added to their payrolls. Most of the trade components shared in the job pickup (+ 9,600), led by early holiday hires by department stores. Cutbacks of temporary help in the restaurant industry dampened the trade upturn.

Construction activity began to wind down seasonally, slipping 1,400, with most of the decline among special trade contractors. Nevertheless, as a result of the recent construction boom, employment remains at record-high levels.

Employment in the remaining industry divisions was little changed over the month. Manufacturing (+ 800), although up a notch over the month, has lost 5,900 jobs over the year. Employment in the transportation and public utilities division inched upward 400 over the month. The finance, insurance and real estate job count edged downward 200 due primarily to seasonal decreases in real estate employment. Economic problems in the brokerage and banking industries have brought job growth in the division to a standstill. Since the stock market crash of nearly a year ago, employment in the brokerage industry has declined 12,000 (or 7.1 percent) and the banking industry has ebbed 4,600 (or 1.8 percent).

Since a year ago, the state's nonfarm job count has risen 140,800 or 1.7 percent, with services accounting for 84,400 or 60 percent of the employment gain. After peaking in first quarter 1988 (+ 178,100), over-the-year job growth has slowed steadily.

EXPLANATION OF DATA

EMPLOYED AND UNEMPLOYED

Employed and Unemployed. Employment and unemployment estimates prepared by the New York State Department of Labor are developed under a cooperative federal-state program administered by the Bureau of Labor Statistics (BLS) of the U.S. Department of Labor. The Current Population Survey (CPS)--the official survey instrument for measuring labor force attachment in the United States--is a monthly survey of about 54,000 households conducted throughout the nation by trained interviewers. Employment and unemployment data for New York State and New York City are based directly on responses of households within the state and city which are represented in the CPS sample.

The size of the CPS sample is not sufficient to provide reliable estimates for labor areas in the "balance of state" (state less New York City). In these areas, a series of factors are applied to administrative statistics from state unemployment insurance (UI) operations and to payroll statistics from establishment surveys to provide data on resident employment and unemployment. Data for these labor areas are adjusted so they add to "balance of state" totals.

These revised procedures, which were put into effect in January 1978, are designed to make the estimates more comparable from state to state and to incorporate more current data in the estimating process.

Employed. Employed persons are all those who during the week including the 12th of the month, (a) did any work at all as paid employees or in their own business or profession, or farm or who worked 15 hours or more as unpaid workers in an enterprise operated by a member of the family, or (b) did not work but who had jobs or businesses from which they were temporarily absent because of illness, bad weather, vacation, labor-management dispute, or personal reasons, whether or not they were paid by their employers for the time off, and whether or not they were seeking other jobs. Each employed person is counted only once.

Unemployed. Unemployed persons are all those persons who did not work during the week including the 12th of the month, who made specific efforts to find a job within the past four weeks, and who were available for work during the week except for temporary illness. Also included as unemployed are those who did not work at all, were available for work, and (a) were waiting to be called back to a job from which they had been laid off, or (b) were waiting to report to a new wage or salary job with 30 days.

Civilian Labor Force. The civilian labor force comprises all civilians classified as employed or unemployed in accordance with the criteria described above. The civilian labor force participation rate is the ratio of the civilian labor force to the civilian noninstitutional population.

Rate of Unemployment. The rate is the total number of unemployed persons expressed as a percentage of the employed and unemployed, i.e., as a percentage of the civilian labor force.

Not in the Labor Force. Not in the labor force includes all persons 16 years of age or older who are not classified as employed or unemployed.

NONAGRICULTURAL EMPLOYMENT, HOURS AND EARNINGS

Benchmark. Represents a comprehensive count of employment for the various nonagricultural industries as of the first quarter of each year. The primary source of benchmark information is employment data received from establishments covered by the New York State Unemployment

Insurance Law. Benchmark data for the remainder are obtained from the records of other private and governmental agencies. Employment estimates for the latest benchmark year and for the previous year are normally subject to revision annually. Current estimates are based on the March 1987 benchmark level for each industry.

Hours and earnings data are analyzed each year to maintain continuity of series.

Earnings, Average. For manufacturing, the averages cover production and related workers only. For the remaining industries, averages cover all nonsupervisory employees and working supervisors unless otherwise specified.

--**Earnings, Average Hourly.** Represents payrolls divided by total number of hours worked or paid for (including paid holiday, vacation, sick leave hours) during period reported. Total payroll includes both straight-time and premium pay. The averages are influenced by the amount of premium pay, as well as by changes in composition of labor force, changes in wage rates, upgrading of employees, etc., and consequently should not be interpreted as wage rates.

--**Earnings, Average Weekly.** Derived by multiplying average weekly hours by average hourly earnings. Includes premium wages for overtime and night shift work and payments made on piecework or incentive basis. The averages are affected by changes in length of workweek, part-time work, stoppages for varying causes, labor turnover, and absenteeism.

Employment, Nonfarm. Estimates include all nonfarm wage and salary workers who received pay for any part of the pay period including the 12th of the month. Persons on paid sick leave, paid holiday or paid vacation are included, but those on leave without pay for the entire payroll period are excluded. Persons on the payroll of more than one establishment during the period are counted each time reported. Self-employed persons, unpaid family workers, and domestics are excluded.

Historical Continuity. Historical continuity of statistics of average hours and earnings of manufacturing production workers has been interrupted for a number of industry groups because of changes in the composition of reporting samples or changes in the relative weight of individual industries in group totals. The starting month of a revised series is identified in a footnote in the issue in which the revision is introduced. Some series have been discontinued pending improvement in the reporting samples.

Hours, Average Weekly. See *Earnings, Average* for description of workers covered. The averages represent total number of hours worked (including overtime) or paid for (including paid holiday, vacation, and sick leave hours) during week divided by number of employees. The averages are affected by amount of labor turnover during week, changes in amount of overtime hours, and by changes in ratio of full-time or part-time eployment.

--**Hours, Average Weekly Overtime.** Represents total number of overtime hours worked by production workers during the week divided by total number of production workers. Overtime hours include those for which premiums were paid because those hours were in excess of the number of hours of either the straight-time workday or the workweek. Hours worked on Saturday, Sunday or holidays are included only if premium wage rates were paid.

Nonagricultural Establishments. All employing units except commercial and noncommercial farms, international government and private households.

Production Workers. Includes working foremen and all nonsupervisory workers (including leadmen and trainees) engaged in fabricating, processing, assembling, inspection, receiving, storage, handling, packing, warehousing, shipping, maintenance, repair, janitorial and watchman services, product development, auxiliary production for plant's own use (e.g., power plant), and in record-

keeping and other services closely associated with the above production operations. Excludes supervisory employees (above the working foremen level) and their clerical staffs, routemen, salesmen and force-account construction workers.

Reference Week of the Month. Employment, payrolls, hours, and earnings data are based on reports from firms covering a pay period, usually the week, including the 12th of the month.

METROPOLITAN STATISTICAL AREA

A metropolitan statistical area (MSA) is defined according to a set of detailed standards prepared by the Federal Committee on MSAs. Under these standards, which were revised in 1980, areas are designated as an MSA in one of two ways: If there is a city of at least 50,000 population, or an urbanized area of at least 50,000 with a total metropolitan population of at least 100,000. In New York State, MSAs are defined in terms of entire counties. In addition to the county containing the main city, an MSA also includes additional counties having strong economic and social ties to the central county.

Most MSA definitions are not subject to change until after the next national census. However, supplemental announcements of a few new MSAs may be issued in the spring of each year, generally because additional cities have reached the 50,000 level according to official population estimates.

If an area has more than 1 million population and meets certain other specified requirements, it will now be termed a Consolidated Metropolitan Statistical Area (CMSA), consisting of major components recognized as Primary Metropolitan Statistical Areas (PMSAs).

A number of areas in the state do not meet the criteria for recognition as an MSA but estimates are published for them. These areas are called Labor Market Areas (LMAs).

The geographic compostion of the areas (which differ from the administrative jurisdictions of the unemployment insurance and job service program) is given below.

Albany-Schenectady-Troy MSA. Albany, Montgomery, Greene, Rensselaer, Saratoga and Schenectady counties.
Binghamton MSA. Broome and Tioga counties.
Buffalo-Niagara Falls CMSA. Erie and Niagara counties.
Buffalo PMSA. Erie County.
Elmira MSA. Chemung County.
Nassau-Suffolk PMSA. Nassau and Suffolk counties.
New York City. Bronx, Kings, New York, Queens and Richmond counties.
New York Combined Area. Bronx, Kings, Nassau, New York, Queens, Richmond, Putnam, Rockland, Suffolk and Westchester counties.
New York PMSA. New York City and Putnam, Rockland and Westchester counties.
Niagara Falls PMSA. Niagara County.
Orange County PMSA. Orange County.
Poughkeepsie MSA. Dutchess County.
Rochester MSA. Livingston, Monroe, Ontario, Orleans and Wayne Counties.
Rockland LMA. Rockland County.
Syracuse MSA. Madison, Onondaga and Oswego counties.
Utica-Rome MSA. Herkimer and Oneida counties.
Westchester LMA. Westchester County.

INDUSTRIAL CLASSIFICATION

Data are classified in accordance with the 1972 edition of the *Standard Industrial Classification (SIC) Manual* prepared by the U.S. Office of Management and Budget. Coverage of the classification *services and miscellaneous* varies geographically. For New York State and New York City, this classification includes: the services industry division; forestry, fisheries and selected services relating to agriculture; and nonclassifiable establishments. For space requirements on the statistical tables, the formal SIC title for most of the industry groups have been replaced by the short SIC title as contained in Appendix B of the 1972 edition of the *SIC Manual-List of short SIC titles*. SIC titles used for groupings of two or more two-digit manufacturing industries reflect, to the extent possible, the respective components.

MISCELLANEOUS EXPLANATIONS

Effect of rounding. Detail figures may not add to total because of rounding.

Revisions. Revised figures are preceded by an "r" when first published.

KEY

Blank or-	Series not available due to inadequate sample size or other technical reasons.
n.a.	Data not available at date of publication.
n.c.	Not comparable with current data due to a break in series.
d	Figures withheld to avoid disclosure of data of individual reporting units.

r	Revised.

OTHER RECURRENT REPORTS

1. **Employment Trends.** Monthly for New York State. Highlights current developments in employment and unemployment.

2. **Labor Area Summary.** Monthly for the 11 major labor areas of the state. Includes analysis of employment and unemployment developments. Obtainable from district offices of the Bureau of Labor Market Information.

3. **Annual Labor Area Report.** Economic developments and outlook, population and labor force characteristics and trends, employment developments and outlook by industry and occupation, trends in employment and unemployment. Fiscal year reports are available for the state, selected major labor areas and New York City.

4. **Unemployment Insurance Tax Rates.** Annual. Rates by industry and size of firm and effects of factors that entered into determination of rates.

5. **Occupational Employment Statistics.** Series of individual triennial reports analyzing and detailing occupational patterns by industry sector: manufacturing, selected nonmanufacturing, wholesale and retail trade, regulated industries, and federal, state and local government.

6. **Occupational Needs, New York State, 1989-1991.** Projects the demand for workers in various jobs. The report is based on occupational employment statistics surveys which examine occupational distributions on a three-year cycle. The surveys involve a statistical sample of industries throughout the state to obtain their occupational staffing patterns.

7. **Collective Bargaining Settlements in New York State.** Quarterly. Summarizes each settlement (changes in wages and fringe benefits) affecting 250 or more workers.

8. **Calendar of Collective Bargaining, New York State, 1988.** This report lists all agreements covering 500 or more workers known to the Division of Research that expire or are subject to a wage reopening in 1988. The report is organized by month of expiration or reopening and, within each month, by industry.

9. **Statistics on Work Stoppages, New York State.** Annual. Data on the number of strikes, the number of workers involved and man-days idle; describes major work stoppages.

10. **Work Stoppages in New York State.** Monthly. Listing gives parties, number of workers directly affected, locations and dates.

11. **Consumer Price Index, Selected Areas and Population Groups.** This bimonthly report presents tabular material on the Consumer Price Index for the United States, New York City SMSA, Buffalo SMSA, and by selected urban population size class. Data are presented for all urban consumers, and wage earners and clerical workers.

SPECIAL REPORTS

Special Reports 14, 15, 18 and/or 19 may be obtained by sending acheck or money order, payable to the New York State Department of Labor, to the Publications Unit.

12. **Occupational Brief.** Occupational briefs are available for: *Computer Programmer, Cosmetologist, General Duty (Registered) Nurse, Licensed Practical Nurse, Occupational Therapist and Assistant, and Physical Therapist and Assistant.* The booklets, intended primarily for use by youth and counselors, include typical job duties performed, earnings expected, typical hours and days worked, working conditions, educational requirements, job locations, opportunities for advancement, employment outlook, and other related information.

13. **Affirmative Action Data, Total, Female and Minority Population: 1980.** This booklet provides data from the 1980 Census for New York State, standard metropolitan statistical areas (SMSA's), counties, and subdivisions with population of 25,000 or more, for use in preparing or assessing affirmative actions plans. Tables show total population, and populations of females and minorities, with distributions by race and Hispanic origin. March 1982.

14. **High-Technology Industries in New York State.** Acting on a commission from the NYS Science and Technology Foundation, the Battelle Corporation identified 52 high-technology industries which are both desirable and feasible for New York State. The industries in which New York has the best competitive position are the subject of this report. The report includes information on employment and wages in these 52 industries, detailed by four-digit-SIC industry code and by area. Where possible, comparisons have been made with high-technology industries nationwide. April 1983. Price $5.00.

15. **Occupations in High-Technology Industries in New York State.** This report contains information on the occupations found in 52 high-technology industries selected for their potential for long-term growth in the state; it complements *High-Technology Industries in New York State*. The report includes sections covering occupational staffing patterns, significant occupations, apprenticeship occupations, assemblers, educational requirements, occupational supply and demand, and occupational outlook. July 1983. Price $5.00

16. **Total and Civilian Labor Force Summary, Selected Demographic Groups, New York State, Counties, and SMSA's, 1980.** This booklet contains labor force data from the 1980 Census for New York State, its standard metropolitan statistical areas, counties, and New York City, for use in developing and assessing affirmative action plans. Tables include: total and civilian labor force; employment, unemployment, and the unemployment rate for all persons 16 years of age and older and for females, blacks, American Indians, Eskimos, and Aleuts, Asians and Pacific Islanders, and persons of Hispanic origin. Percent distributions are also shown. March 1983.

17. **Civilian Labor Force by Occupation, Selected Demographic Groups, 1980.** These tables, which contain data from the 1980 Census, can be used in developing and assessing affirmative action plans. They show civilian labor force data by occupation for persons aged 16 and over. Data are also included for females, minorities, Hispanics, blacks, and other races. Tables are available for New York State, Standard Metropolitan Statistical Areas, and counties. February 1984.

18. **The Jobseeker.** A 106-page guide designed primarily to assist young people entering the job market. Contains sections on the explanation of the job market/labor force, kinds of employers, kinds of occupations, how to choose an occupation, chances of finding a job, what to do to find a job, how to prepare a resume, how to complete an employment application, how to do well at a job interview. Also contains occupational profiles on 133 occupations of interest to youth, with information on each regarding: number of employed, where found, job outlook, education needed, personal characteristics, and earnings. (First five copies are free. Additional copies are available at 50 cents per copy.) February 1986.

19. **Occupations Licensed or Certified by New York State.** This publication contains licensing requirements for 65 occupations (training, tests and fees) as well as information on employment outlook, earnings, and working conditions for these occupations. The report also includes a list of apprenticable occupations. May 1987. Price $10.00.

B-PUBLICATIONS

235. **A History of Unemployment Insurance Legislation in the United States and New York State, 1935-1983.** A report on the background of the unemployment insurance system and changes in federal and state legislation from 1935 to 1983.

SPECIAL BULLETINS

Special Bulletins may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Office of Communications, New York State Department of Labor, W. Averell Harriman State Office Building Campus, Albany, New York 12240.

254. **Directory of Labor Unions and Employee Organizations in New York State, 1987-88.** This edition lists names and addresses of principal or executive officers of over 5,000 local, state and national or international employee organizations representing workers in New York State. Both public employee and private industry unions are included in the directory. Price $10.00.

LABOR RESEARCH REPORTS

85-4. **Statistics Relative to the New York State Unemployment Insurance Fund, 1936-1984.** This publication brings together updated historical statistics pertaining to the New York State Unemployment Insurance Fund. Data in each table extend as far back over the history of the UI program as they are available.

87-2. **Unemployment Insurance Beneficiaries in New York State, Benefit Year Ending in 1985.** Describes personal characteristics, work background, and benefit experience of unemployed workers who drew benefits in 1985.

88-1. **Occupational Injuries and Illnesses Survey, State and Local Government, New York State, 1986.** An annual survey by the Labor Department of work-related fatalities, injuries and illnesses in the public sector. The survey is required by the New York Public Employee Safety and Health Act of 1980.

List of Publications v

MONTH IN REVIEW
November 1988

Sub-state labor force estimates beginning with data for April 1988 were developed under a new methodology required by the U.S. Department of Labor and are not comparable to data released previously. Sub-state estimates for a year ago in this report have been developed using the new methodology but have not been validated as the official estimates of the U.S. Department of Labor. Moreover, they cannot be used in the allocation of federal funds. They are presented in this report for analytical purposes only.

Civilian Labor Force

The unemployment rate in New York State edged upward 0.1 of a percentage point to 4.3 percent in November 1988 following four consecutive months where the rate was 4.2 percent. The current rate was the lowest on record for the month. (The historical series began in January 1970.) The state's unemployment rate has been at or below 5.0 percent since April 1987. Since November 1987, the jobless rate has declined 0.6 of a percentage point.

Resident employment in the state increased 7,000 over the month to 8,192,000 in November 1988--a record high for the month. Over the year, the number of employed New Yorkers has expanded 39,000 or 0.5 percent.

The number of unemployed persons rose 12,000 between October and November 1988 to 371,000. Joblessness declined 52,000 from a year ago.

Nonfarm Employment

The number of nonfarm jobs in New York State reached an all-time high in November 1988. Nonagricultural employment (which excludes agricultural workers, the self-employed, unpaid family workers and domestic workers in private households) increased 47,500 from October to 8,354,100 in November, reflecting seasonal hiring by retail department stores and public schools.

Pre-holiday hiring in the retail portion of trade (+34,800) dominated the October-November job upswing in nonfarm employment. The public sector added 12,600 jobs as gains in local education easily outweighed a slight decrease in state government employment. Services employment rose moderately (+4,800) because of seasonal additions in private education, health services and social services. These increases overshadowed job losses in the recreational services, lodging, and agricultural services industries.

Construction employment continued to fall seasonally, declining 6,200, with most of the decline among highway builders and special trade contractors. Nevertheless, as a result of the recent construction boom, employment remained at record-high levels, up 13,800 over the year.

Employment in the remaining industry divisions was little changed over the month. Manufacturing lost another 200 jobs over the month and has slipped by 5,300 over the year. The finance, insurance and real estate job count rose 900, reflecting small increases by all industries except the real estate and brokerage industries. The long-term expansion of the division was abruptly curtailed by the stock market crash as reflected by the lack of job growth in the division over the year. Two components, the brokerage and banking industries, have experienced significant job losses since the crash with the brokerage industry down 12,200 and banking off 4,200.

Since November 1987, the number of nonfarm jobs in the state has grown 153,800 or 1.9 percent. All industry divisions, except manufacturing, reported higher job levels than a year ago, with job gains in services accounting for 83,700 or over half of the nonfarm expansion.

Job Generation in New York State

Small Firms versus Large Firms

Jay M Mooney and William B Conklin

A preliminary examination of New York State insured employment data [1] for December 1982 and December 1987 (see Table A) shows that employment in private firms with 100 or more employees has increased 412,152, whereas employment by firms with under 100 employees has increased 387,421. Many would be quick to say that employment in New York State is generated primarily by growth among large firms.

A closer examination of the data reveals that small firms coming into existence, and small firms growing into large firms are the true generators of jobs in the state.

All firms in existence in 1982 had lost a net total of 758,142 jobs by 1987. This loss was counterbalanced by new firms adding a net total of 1,557,706 jobs to the state's economy by 1987. Thus, in 1987, firms not in existence in 1982 accounted for 23 percent of total insured employment in the state, and for all of the growth in insured employment.

The 181,793 new firms with employment under 100 added 990,647 new jobs. This compares with 567,059 new jobs associated with 1,703 new firms with employment of 100 or more. Of the 1,557,706 new jobs generated, only 489,886 could be traced to predecessor firms [2] whose assets had in whole or in part been assumed by these new firms. Table B lists the components of net change for large firms: those with 100 or more employees, and Table C details the components of net change for small firms: those with less than 100 employees.

Looking only at firms in existence in 1982 and still in existence in 1987, large firms in 1982 had added a total of 99,859 employees by 1987, whereas small firms in 1982 had added 426,472 employees by 1987.

Table A. Insured Employment Data, New York State
December 1982 and December 1987

Size of firm	December 1982 Number of firms	December 1982 Total employment	December 1987 Number of firms	December 1987 Total employment	Net change in employment
100 or more employees	6,779	3,383,308	7,997	3,795,460	+412,152
Average employment per firm		499.1		474.6	
Under 100 employees	345,401	2,566,158	385,500	2,953,579	+387,421
Average employment per firm		7.4		7.7	

---

[1] Includes all private employment covered under the New York State Unemployment Insurance Law for December 1982 and December 1987. The employment count represents the number of full-time and part-time employees earnings wages or salaries for the payroll period including the 12th of the month. Included are persons on paid vacation and on paid sick leave. Workers temporarily earning no wage because of labor-management disputes, layoffs or other reasons are not reported as employed. Persons on the payroll of more than one establishment during the same reference week are reported more than once.

[2] A newly liable employer who takes over the business of a previously liable employer.

Counting small firms in 1982 which have become large firms in 1987 with the rest of large firms creates a distorted image of job generation in the state. For example, 1,816 small firms in 1982 had become large firms in 1987 with an associated 283,005 employees. Table D summarizes the components of 1987 employment change based upon firm size in 1982. Table D shows that for firms classified as large in 1982 and still in existence in 1987, one new job was added for every 3.63 new jobs that were created by firms classified as small in 1982 and still in existence in 1987.

Table B. Components of Net Change of Firms with 100 or More Employees, New York State December 1982 and December 1987

Component	Effect on employment
In 1982, there were 6,779 firms in business with 100 or more employees	
There were 1,545 firms in 1982 that were out of business in 1987	-494,514
There were 5,234 firms in 1982 that were still in business in 1987	+99,879
There were 1,703 new firms in 1987	+567,059
656 of these firms had a predecessor firm	+193,038
1,047 did not have a predecessor firm	+374,021
A total of 756 firms that were large in 1982 were small in 1987	-43,277
A total of 1,816 firms that were small in 1982 were large in 1987	+283,005
In 1987, there were 7,997 firms in business with 100 or more employees	+412,152

Table C. Components of Net Change of Firms with Less Than 100 Employees, New York State December 1982 and December 1987

Component	Effect on employment
In 1982, there were 345,401 firms in business with less than 100 employees	
There were 140,634 firms in 1982 that were out of business in 1987	-789,970
There were 204,767 firms in 1982 that were still in business in 1987	+426,472
There were 181,793 new firms in 1987	+990,647
38,924 of these firms had a predecessor firm	+296,848
142,869 did not have a predecessor firm	+693,799
A total of 1,816 firms that were small in 1982 were large in 1987	-283,005
A total of 756 firms that were large in 1982 were small in 1987	+43,277
In 1987, there were 385,500 firms in business with less than 100 employees	+387,421

Table D. Components of Net Change in Employment Based Upon December 1982 Firm Size

	Effect on employment	
Component	Small firms	Large firms
Jobs lost by firms out of business	-789,970	-494,514
Jobs created by firms still in business	+426,472	+99,879
Jobs created by new firms	+990,647	+567,059
Jobs of firms with predecessor	+296,848	+193,038
Jobs of firms without predecessor	+693,799	+374,021
Employment net change	+627,149	+172,424

Unemployment Insurance Tax Rates, 1987

Elias D. Loizides

HIGHLIGHTS

- A change in the procedure used to calculate employers' account percentages was made effective 1/ with the December 31, 1986 computation date. An employer's account percentage is now based on the employer's average yearly taxable wages of the last three payroll years (ending September 30) instead of taxable wages of just the last payroll year. This change may have affected an employer's experience based tax rate in 1987.
- Assignments of 1987 normal tax rates to firms qualified for experience rating were made from the sixth tax rates column from the left in Table 1. The Size-of-Fund index rose from 3.9 percent on December 31, 1985 to 4.9 percent on December 31, 1986. The December 31, 1986 index was used to determine the tax column in effect for 1987, and the rise in this index triggered a shift to the next lower column of rates.
- Unemployment Insurance (U.I.) tax rates for 1987 averaged 2.95 percent of taxable payrolls—a combination of 1.95 percent normal tax, and 1.0 percent subsidiary tax. This was more than a 0.3 percent decrease from the 1986 combined average tax rate of 3.26 percent.
- Among the major industry divisions, 2/ average 1987 tax rates were highest in construction, mining, and agriculture, forestry and fishing. They were lowest in finance, insurance, and real estate, public administration, and transportation and public utilities. There was wide variation within divisions, however.
- Firms with taxable payrolls under $25,000 or over $25 million had the lowest average U.I. tax rates in 1987, while rates averaged highest among employers with taxable payrolls in the $100,000 to $999,999 range.

PROVISIONS FOR RATE ASSIGNMENT

Under the current New York State system, covered employers pay unemployment insurance taxes on the first $7,000 3/ of wages that they pay to each of their employees during the calendar year. 4/ These taxes are pooled in an Unemployment Insurance Fund, from which benefits are paid to all eligible unemployed workers.

In most years an employer's tax rate is composed of two parts:

(1) a normal rate, which may be based upon his experience with unemployment and
(2) a subsidiary rate, which is the same for all employers.

Normal Experience-Based Rates

To vary employers' normal tax rates according to the incidence of unemployment among their workers (often referred to as "experience rating"), a bookkeeping account

(See footnotes on last page of text)

is set up within the Unemployment Insurance Fund for each covered employer. An employer's normal taxes are credited, and chargeable benefits paid to an employer's unemployed workers are debited to the employer's individual account. On December 31, the computation date for experience rating, an account balance is computed as a percentage of the employer's annual average taxable wages of the last three payroll years, 5/ and this "account percentage" is the measure of experience on which one's normal tax rate for the next year is based. An account percentage may be positive or negative depending upon whether the account showed a positive or negative balance at the end of the year.

Once an account percentage has been computed, the employer's normal tax rate is read from the tax table for experience rating 6/ shown in Table 1. The seven columns in the tax table show seven alternative rate schedules, only one of which is applicable in a given year. The appropriate schedule depends on the level of reserves in the Unemployment Insurance Fund—the higher the reserves, the lower the scale of rates. The measure of reserve level used for selecting the proper rate column is the Size-of-Fund Index, which is computed by expressing total year-end reserves as a percentage of the combined taxable wages of all liable firms. On December 31, 1986, the Index stood at 4.9 percent; 7/ therefore the sixth column (from the left) of normal rates in the table applied for 1987. Rates in this column range from 0.1 percent to 5.4 percent.

Following the assignment of normal tax rates for the coming year (but as of the same computation date), if the balance in an employer's account is negative and the amount of the negative account balance is greater than 2 percent of the employer's annual taxable wages, then the amount in excess of 2 percent of the employer's taxable wages is transferred as a charge to the General Account in the Unemployment Insurance Fund, (see the section on "Subsidiary Tax Rate"). Thus, no firm starts the next year with a deficit of more than 2 percent of its taxable payrolls. However, if an employer has part of a negative balance transferred, the normal tax rates assigned on the next three December 31 rate-computation dates are restricted to not less than 5.4 percent.

Normal Rates Fixed by Statute

Although most firms' normal tax rates are based on their individual experience, there are four categories of employers not qualified for experience rating and are assigned special rates fixed by law:

(1) **Insufficient period of coverage.** A firm that has not been liable for contributions more than a year as of the computation date (provided it is not delinquent in filing reports) is assigned either the highest normal tax rate applicable to a qualified employer with a positive account balance, or 2.7 percent, whichever is lower.

(2) **No remuneration.** The tax provision for "insufficient period of coverage" above also applies to firms that paid no wages in the last payroll year. 8/

(3) **Delinquent in reporting.** An employer who has not filed all prescribed reports by the computation date, must pay a normal tax rate of 5.4 percent.

(4) **Restricted rates.** As alluded to previously, a restricted normal tax rate of 5.4 percent is assigned when, in at least one of the last three prior years, a portion of an employer's negative balance is transferred to the General Account in the Unemployment Insurance Fund.

Normal Elected Rates

In 1987, employers in the apparel industry were allowed to elect a fixed normal

(See footnotes on last page of text)

tax rate of 4.5 percent instead of the tax rates that would otherwise have applied to them, and employers in the construction industry and those engaged in processing local fresh fruits and vegetables were allowed to elect a fixed normal tax rate of 4.6 percent. 9/ In 1986 the elected normal rates were 4.0 for the apparel industry and 4.1 percent for the construction and food processing industries.

Subsidiary Tax Rate

To finance transferred negative balances, the General Account is credited with the interest earned on reserves in the Fund, but the interest alone has not been enough to fully offset the deficits transferred. The law therefore provides that if the year-end balance in the General Account is less than $120 million, all employers liable for unemployment insurance taxes pay a subsidiary tax in the coming year in addition to their normal tax, and the proceeds from the subsidiary tax are credited to the General Account. (There are also other minor credits and charges.) The subsidiary rate varies from 0.1 percent to 1.0 percent, according to the size of the General Account balance, but it cannot increase more than 0.3 percent in any one year. The subsidiary tax rate, if any, is added to an employer's assigned normal Unemployment Insurance tax rate, (determined by provisions described above). On December 31, 1986 there was a deficit of $440 million 10/ in the General Account, requiring the subsidiary tax rate to remain at the maximum 1.0 percent for 1987.

RATE ASSIGNMENTS FOR 1987

Normal Tax Rates

On the December 31, 1986 computation date, at least 426,000 employers were assigned tax rates for 1987 (see Table 2). Over 129,000 of these firms had normal tax rates fixed by statute which ranged from 2.7 to 5.4 percent.

Firms whose normal tax rates were fixed by statute (excluding those that paid no wages in the past year) comprised almost 29 percent of all liable firms but had little more than 13 percent of the taxable payrolls, primarily because they generally were of smaller than average size 11/ and also because the payrolls of newly liable employers covered less than a full year. 12/

Over 48,000 of the non-qualified firms received restricted rates and represented almost 37 percent of the employers whose normal tax rates were fixed by statute.

Over 37,000 of the non-qualified firms were delinquent in reporting.

Another 37,000 of the non-qualified firms had been in the UI system less than a year and were assigned a normal tax rate of 2.7 percent (excluding the 1.0 percent subsidiary tax).

More than 8,000 employers related to the apparel, construction, and food processing industries elected fixed normal rates of 4.5 percent and 4.6 percent in lieu of the rates otherwise applicable. These employers had combined tax rates (normal plus subsidiary) of 5.5 percent (apparel) and 5.6 percent (construction, and food processing).

The remaining 288,651 employers were assigned rates for 1987 from the tax table for experience rating (Table 1). Almost 16,000 of these firms, (nearly 4 percent of

(See footnotes on last page of text)

all liable firms, accounting for almost 5 percent of taxable payrolls) had negative account balances. Their tax rates (including the 1.0 percent subsidiary tax) ranged from 3.9 percent to the maximum 6.4 percent (see Table 2). Nearly 2,000 firms, having a negative account percentage of 16 percent or more, received the maximum experience-based rate in 1987.

The total number of negative balance experience rated firms decreased from 50,000 in 1984, to less than 16,000 in 1987. The reason for the drop (since 1984) in the number of negative-balance experience-rated firms can be mainly attributed to the raising of the restricted normal tax rate from 2.7 percent in 1984 to 5.4 percent in 1985 (also the highest normal tax rate applicable in 1987). Since employers in the restricted category now receive the maximum normal rate, they were, in effect, precluded from being in the experience rated category since 1985. In years prior to 1985, these firms would be assigned an experience based tax rate if it exceeded 2.7 percent.

The 273,000 experience-rated firms that had positive account percentages by the end of 1986 accounted for almost 64 percent of all active firms and were the source of about 78 percent of taxable payrolls. Tax rates assigned to these firms for 1987 ranged from 1.1 to 3.7 percent (including the 1.0 percent subsidiary tax). There were almost 89,000 firms that qualified for the minimum rate, almost 4,500 more than qualified a year earlier. This represented nearly 21 percent of all firms active on December 31, 1986, compared with nearly 20 percent a year earlier.

The total number of positive and negative balance firms assigned tax rates on the computation date (December 31, 1986) are shown below. Included, in addition to experience rated firms, are firms whose rates were fixed by statute and firms in construction, apparel and canning industries electing fixed rates.

Category	Number of firms	Percent of all active firms
Total-all active firms	426,371	100.0
Positive balance firms	374,021	87.7
Negative balance firms	52,350	12.3

Their taxable payrolls during the 12-month period ending September 30, 1986 were:

Category	Taxable payrolls (in 000's)	Percent of all active firms
Total-all active firms	$43,713,420	100.0
Positive balance firms	$37,556,369	85.9
Negative balance firms	$6,157,051	14.1

Subsidiary Tax Rates

The subsidiary tax rate, which is uniform for all employers, was set at the maxi-

(See footnotes on last page of text)

mum rate of 1.0 percent of taxable payrolls in 1987, for the 14th consecutive year. After eight consecutive years of record setting year-end deficits in the General Account, the deficit decreased for six years—from $1,163 million in 1980 to $440 million in 1986. However, the 1986 General Account balance was still far below the $12 million surplus needed for the next lower tax rate to take effect in 1987.

Tax Rates by Industry and Size

Among the major industry divisions, average 1987 tax rates (for the combined normal and subsidiary tax) ranged from 2.18 percent in the finance, insurance, and real estate group to 4.53 percent in construction. 13/ Within the major divisions, however, average rates for industry subgroups varied widely, as indicated in Table 3.

Average tax rates by size of firm are shown for 1987 in Table 5. Employers were classified by size on the basis of their taxable payrolls in the 1986 payroll year. Tax rates averaged lowest for firms with taxable payrolls less than $10,000 or over $25 million and highest for those with taxable payrolls ranging from $100,000 to $999,999.

Tax Rates on Total and Taxable Payrolls

The average combined tax rate on taxable payrolls for 1987 dropped to 2.95 percent from 3.26 percent in 1986. This represents a drop of .3 percent partly due to a shift in 1987 to a column of lower normal tax rates, and also due to accumulating reserves in many employers' accounts in the Unemployment Insurance Fund. The average effective tax rate on total payrolls declined to 0.91 percent in 1987 from 1.05 percent in 1986 partly because total payrolls increased, while the maximum taxable wage base remained at $7,000 during 1987, and also because the average rate on taxable payrolls decreased.

EXPERIENCE IN 1986 14/

This section pertains to the 1986 experience of those firms which were active at the end of 1986 and were assigned tax rates for 1987. Taxable payrolls 15/ in 1986 were determined by the $7,000 maximum taxable wage base.

Taxable Payrolls in Relation to Total Payrolls by Industry and Size of Firm

Taxable and total payrolls by major industry group and by size of annual taxable payroll are shown in Table 6 for the payroll year ending September 30, 1986. Percentages of total payrolls that were taxable on the $7,000 tax base varied widely among industry groups and also among size groups.

One cause of this variation was the difference in average wage levels among employer groups. Firms with relatively high average wage levels tended to have lower percentages of payrolls that were taxable, on the $7,000 wage base, than firms with lower wage levels.

A second factor, labor turnover, affected the percentage of payrolls that were taxable. Wages up to $7,000 were taxable if a position in a firm was filled by the same individual all year. If it was filled by one person part of the year and by another the rest of the year, wages up to $7,000 were taxable for each of the two employees. Thus, the taxable proportion was likely to be greater in firms and in-

(See footnotes on last page of text)

dustries where there was high turnover.

Table 6 indicates that among industry divisions, mining, finance, insurance, and real estate, and the transportation and public utilities industries had relatively low percentages of payrolls that were taxable in 1986, while the agriculture, forestry and fishing, and public administration industries had the highest percentages.

Also, Table 6 shows a generally downward progression in the average percentage of wages taxable, as the size of the firm increases. In the 1986 payroll year, these averages ranged from nearly 44 percent for firms with taxable payrolls between $10,000 and $25,000 to 24 percent for those in the $25 million-and-over bracket.

---

1. An amendment to the New York State Unemployment Insurance Law, Article 18, Section 581.1(f) provides, effective December 31, 1986, for computing an employer's account percentage by dividing the employer's account balance by the employer's average taxable wage for the last three payroll years (ending September 30).

2. Major industry groups as defined in the 1972 edition of the Standard Industrial Classification (SIC) Manual.

3. Effective January 1, 1983, the maximum taxable wage base was raised from $6,000 to $7,000.

4. Covered local governments and nonprofit organizations may elect to reimburse the Unemployment Insurance Fund for benefits paid former employees, instead of paying taxes; the State of New York also reimburses the Fund for benefits.

5. Effective on the December 31, 1986 computation date, an employer's account percentage is based on the annual average of the employer's taxable wages of the last three payroll years. Previously it was based only on the last payroll year.

6. Table 1 is based on the tax schedule which became effective with the assignment of 1985 tax rates.

7. There was a net positive balance of $2,168 million in the Fund at the end of 1986.

8. In 1987 the normal rate for these two groups of employers (insufficient period of coverage and no remuneration) was 2.7 percent.

9. Employers in the specified industries have this option to elect the specified fixed rates for 1987 only. In 1988, employers in these industries will again have the option to elect fixed rates but the elected fixed rates will be 5.0 percent for the apparel, and the construction and canning industries. By 1989 the elected fixed rates will be raised to 5.4 percent, the maximum normal rate, and there will no longer be any advantage to any employer in electing a fixed normal rate, unless the maximum-experience-based-normal rate were to be made higher than the optionally elected fixed rates by new legislation.

10. The General Account deficit of $440,160,000, computed on a cash basis in accordance with the New York State Unemployment Insurance Law, has been used to determine

(See footnotes on last page of text)

that the subsidiary rate of 1% will be continued in calendar year 1987. (In accordance with Generally Accepted Accounting Principles (GAAP), the General Account deficit was computed as $293,381,000 on December 31, 1986.)

11. The average size of firm in the "restricted" category was almost the average size of all firms.

12. The size of a firm is defined by its annual taxable payrolls reported for the 12-month period ending September 30.

13. The apparel industry, which is not considered a major industry division in accordance with the 1972 edition of the Standard Industrial Classification (SIC) Manual, had an average tax rate of 4.65 percent in 1987. Both the apparel and construction industries have employment and unemployment, which depend highly on seasonal factors. Their seasonality has an indirect bearing on their assigned unemployment insurance tax rates which are usually higher than in industries that are less affected by seasonal factors.

14. Data by more detailed industry classifications and data on contributions paid and benefits charged, which appeared in prior articles on tax rates published in Employment Review, are excluded from this article. More detail will be included in a forthcoming bulletin, New York State Unemployment Insurance Tax Rates, 1987.

15. Payrolls, shown on tables 2 and 6 in this article are for the 12-month period ending September 30, 1986, and were on the $7,000 tax base.

---

[1] An employer's account percentage is the December 31 balance in the employer's account in the Unemployment Insurance Fund as a percentage of the employer's average yearly taxable wages in the last three payroll years (ending September 30).

[2] The Size-of-Fund Index is the moneys in the Fund on December 31, as a percentage of all taxable wages in the last payroll year, or as a percentage of the annual average of the taxable wages of the last three payroll years, whichever percentage is less.

[3] The U.I. Law specifies that an employer must pay at least 0.3 percent combined normal and subsidiary tax. If in any year, 0.3 percent exceeds the sum of the subsidiary tax rate and his rate from this table, the additional amount paid is credited to the employer's account.

Table 2. UNEMPLOYMENT INSURANCE TAX RATES, NUMBER OF ACCOUNTS TAXABLE PAYROLLS AND ACCOUNT BALANCES, BY CLASS OF FIRM AND ACCOUNT PERCENTAGE, NEW YORK STATE, 1987

Class of firm and account percentage	1987 tax rate [1] ($7,000 base)	Employer accounts [2]		Taxable payrolls [3] ($7,000 base)		Account balances [4] December 31, 1986

10.5% or more	1.1	88,682	20.80	3,292,726	7.53	432,264,472

[1] Tax rates include the normal rate plus a subsidiary tax of 1.0 percent on taxable payrolls.

[2] Accounts of firms that are liable for unemployment insurance tax contributions.

[3] Taxable payrolls for the 12-month period ending September 30, 1986.

[4] Before transfer to the General Account of portions of individual negative account balances that exceeded 2 percent of the employer's taxable payroll.

[5] Represents an average tax rate weighted on taxable payrolls in a combined class of firm or account percentage group.

[6] Firms that had parts of negative balances transferred to the General Account within the last three years.

[7] Rates assigned to those firms in the apparel, canning and freezing, and construction industries that have elected special rates as provided by Article 18 of the New York State Unemployment Insurance Labor Law.

NOTE: Details may not add to totals because of rounding.

EXPLANATION OF DATA

EMPLOYED AND UNEMPLOYED

Employed and Unemployed. Employment and unemployment estimates prepared by the New York State Department of Labor are developed under a cooperative federal-state program administered by the Bureau of Labor Statistics (BLS) of the U.S. Department of Labor. The Current Population Survey (CPS)--the official survey instrument for measuring labor force attachment in the United States--is a monthly survey of about 54,000 households conducted throughout the nation by trained interviewers. Employment and unemployment data for New York State and New York City are based directly on responses of households within the state and city which are represented in the CPS sample.

The size of the CPS sample is not sufficient to provide reliable estimates for labor areas in the "balance of state" (state less New York City). In these areas, a series of factors are applied to administrative statistics from state unemployment insurance (UI) operations and to payroll statistics from establishment surveys to provide data on resident employment and unemployment. Data for these labor areas are adjusted so they add to "balance of state" totals.

These revised procedures, which were put into effect in January 1978, are designed to make the estimates more comparable from state to state and to incorporate more current data in the estimating process.

Employed. Employed persons are all those who during the week including the 12th of the month, (a) did any work at all as paid employees or in their own business or profession, or farm or who worked 15 hours or more as unpaid workers in an enterprise operated by a member of the family, or (b) did not work but who had jobs or businesses from which they were temporarily absent because of illness, bad weather, vacation, labor-management dispute, or personal reasons, whether or not they were paid by their employers for the time off, and whether or not they were seeking other jobs. Each employed person is counted only once.

Unemployed. Unemployed persons are all those persons who did not work during the week including the 12th of the month, who made specific efforts to find a job within the past four weeks, and who were available for work during the week except for tem~~porary il~~lness. Also included as unemployed are those who did not work at all, were available for work, and (a) were waiting to be called back to a job from which they had been laid off, or (b) were waiting to report to a new wage or salary job with 30 days.

Civilian Labor Force. The civilian labor force comprises all civilians classified as employed or unemployed in accordance with the criteria described above. The civilian labor force participation rate is the ratio of the civilian labor force to the civilian noninstitutional population.

Rate of Unemployment. The rate is the total number of unemployed persons expressed as a percentage of the employed and unemployed, i.e., as a percentage of the civilian labor force.

Not in the Labor Force. Not in the labor force includes all persons 16 years of age or older who are not classified as employed or unemployed.

NONAGRICULTURAL EMPLOYMENT, HOURS AND EARNINGS

Benchmark. Represents a comprehensive count of employment for the various nonagricultural industries as of the first quarter of each year. The primary source of benchmark information is employment data received from establishments covered by the New York State Unemployment

Insurance Law. Benchmark data for the remainder are obtained from the records of other private and governmental agencies. Employment estimates for the latest benchmark year and for the previous year are normally subject to revision annually. Current estimates are based on the March 1987 benchmark level for each industry.

Hours and earnings data are analyzed each year to maintain continuity of series.

Earnings, Average. For manufacturing, the averages cover production and related workers only. For the remaining industries, averages cover all nonsupervisory employees and working supervisors unless otherwise specified.

--**Earnings, Average Hourly.** Represents payrolls divided by total number of hours worked or paid for (including paid holiday, vacation, sick leave hours) during period reported. Total payroll includes both straight-time and premium pay. The averages are influenced by the amount of premium pay, as well as by changes in composition of labor force, changes in wage rates, upgrading of employees, etc., and consequently should not be interpreted as wage rates.

--**Earnings, Average Weekly.** Derived by multiplying average weekly hours by average hourly earnings. Includes premium wages for overtime and night shift work and payments made on piecework or incentive basis. The averages are affected by changes in length of workweek, part-time work, stoppages for varying causes, labor turnover, and absenteeism.

Employment, Nonfarm. Estimates include all nonfarm wage and salary workers who received pay for any part of the pay period including the 12th of the month. Persons on paid sick leave, paid holiday or paid vacation are included, but those on leave without pay for the entire payroll period are excluded. Persons on the payroll of more than one establishment during the period are counted each time reported. Self-employed persons, unpaid family workers, and domestics are excluded.

Historical Continuity. Historical continuity of statistics of average hours and earnings of manufacturing production workers has been interrupted for a number of industry groups because of changes in the composition of reporting samples or changes in the relative weight of individual industries in group totals. The starting month of a revised series is identified in a footnote in the issue in which the revision is introduced. Some series have been discontinued pending improvement in the reporting samples.

Hours, Average Weekly. See *Earnings, Average* for description of workers covered. The averages represent total number of hours worked (including overtime) or paid for (including paid holiday, vacation, and sick leave hours) during week divided by number of employees. The averages are affected by amount of labor turnover during week, changes in amount of overtime hours, and by changes in ratio of full-time or part-time eployment.

--**Hours, Average Weekly Overtime.** Represents total number of overtime hours worked by production workers during the week divided by total number of production workers. Overtime hours include those for which premiums were paid because those hours were in excess of the number of hours of either the straight-time workday or the workweek. Hours worked on Saturday, Sunday or holidays are included only if premium wage rates were paid.

Nonagricultural Establishments. All employing units except commercial and noncommercial farms, international government and private households.

Production Workers. Includes working foremen and all nonsupervisory workers (including leadmen and trainees) engaged in fabricating, processing, assembling, inspection, receiving, storage, handling, packing, warehousing, shipping, maintenance, repair, janitorial and watchman services, product development, auxiliary production for plant's own use (e.g., power plant), and in record-

keeping and other services closely associated with the above production operations. Excludes supervisory employees (above the working foremen level) and their clerical staffs, routemen, salesmen and force-account construction workers.

Reference Week of the Month. Employment, payrolls, hours, and earnings data are based on reports from firms covering a pay period, usually the week, including the 12th of the month.

METROPOLITAN STATISTICAL AREA

A metropolitan statistical area (MSA) is defined according to a set of detailed standards prepared by the Federal Committee on MSAs. Under these standards, which were revised in 1980, areas are designated as an MSA in one of two ways: If there is a city of at least 50,000 population, or an urbanized area of at least 50,000 with a total metropolitan population of at least 100,000. In New York State, MSAs are defined in terms of entire counties. In addition to the county containing the main city, an MSA also includes additional counties having strong economic and social ties to the central county.

Most MSA definitions are not subject to change until after the next national census. However, supplemental announcements of a few new MSAs may be issued in the spring of each year, generally because additional cities have reached the 50,000 level according to official population estimates.

If an area has more than 1 million population and meets certain other specified requirements, it will now be termed a Consolidated Metropolitan Statistical Area (CMSA), consisting of major components recognized as Primary Metropolitan Statistical Areas (PMSAs).

A number of areas in the state do not meet the criteria for recognition as an MSA but estimates are published for them. These areas are called Labor Market Areas (LMAs).

The geographic compostion of the areas (which differ from the administrative jurisdictions of the unemployment insurance and job service program) is given below.

Albany-Schenectady-Troy MSA. Albany, Montgomery, Greene, Rensselaer, Saratoga and Schenectady counties.
Binghamton MSA. Broome and Tioga counties.
Buffalo-Niagara Falls CMSA. Erie and Niagara counties.
Buffalo PMSA. Erie County.
Elmira MSA. Chemung County.
Nassau-Suffolk PMSA. Nassau and Suffolk counties.
New York City. Bronx, Kings, New York, Queens and Richmond counties.
New York Combined Area. Bronx, Kings, Nassau, New York, Queens, Richmond, Putnam, Rockland, Suffolk and Westchester counties.
New York PMSA. New York City and Putnam, Rockland and Westchester counties.
Niagara Falls PMSA. Niagara County.
Orange County PMSA. Orange County.
Poughkeepsie MSA. Dutchess County.
Rochester MSA. Livingston, Monroe, Ontario, Orleans and Wayne Counties.
Rockland LMA. Rockland County.
Syracuse MSA. Madison, Onondaga and Oswego counties.
Utica-Rome MSA. Herkimer and Oneida counties.
Westchester LMA. Westchester County.

INDUSTRIAL CLASSIFICATION

Data are classified in accordance with the 1972 edition of the *Standard Industrial Classification (SIC) Manual* prepared by the U.S. Office of Management and Budget. Coverage of the classification *services and miscellaneous* varies geographically. For New York State and New York City, this classification includes: the services industry division, forestry, fisheries and selected services relating to agriculture; and nonclassifiable establishments. For space requirements on the statistical tables, the formal SIC title for most of the industry groups have been replaced by the short SIC title as contained in Appendix B of the 1972 edition of the *SIC Manual-List of short SIC titles*. SIC titles used for groupings of two or more two-digit manufacturing industries reflect, to the extent possible, the respective components.

MISCELLANEOUS EXPLANATIONS

Effect of rounding. Detail figures may not add to total because of rounding.

Revisions. Revised figures are preceded by an "r" when first published.

KEY	
Blank or–	Series not available due to inadequate sample size or other technical reasons.
n.a.	Data not available at date of publication.
n.c.	Not comparable with current data due to a break in series.
d	Figures withheld to avoid disclosure of data of individual reporting units.
*	Less than 0.05 percent.
r	Revised.

OTHER RECURRENT REPORTS

1. **Employment Trends.** Monthly for New York State. Highlights current developments in employment and unemployment.

2. **Labor Area Summary.** Monthly for the 11 major labor areas of the state. Includes analysis of employment and unemployment developments. Obtainable from district offices of the Bureau of Labor Market Information.

3. **Annual Labor Area Report.** Economic developments and outlook, population and labor force characteristics and trends, employment developments and outlook by industry and occupation, trends in employment and unemployment. Fiscal year reports are available for the state, selected major labor areas and New York City.

4. **Unemployment Insurance Tax Rates.** Annual. Rates by industry and size of firm and effects of factors that entered into determination of rates.

5. **Occupational Employment Statistics.** Series of individual triennial reports analyzing and detailing occupational patterns by industry sector: manufacturing, selected nonmanufacturing, wholesale and retail trade, regulated industries, and federal, state and local government.

6. **Occupational Needs, New York State, 1989-1991.** Projects the demand for workers in various jobs. The report is based on occupational employment statistics surveys which examine occupational distributions on a three-year cycle. The surveys involve a statistical sample of industries throughout the state to obtain their occupational staffing patterns.

7. **Collective Bargaining Settlements in New York State.** Quarterly. Summarizes each settlement (changes in wages and fringe benefits) affecting 250 or more workers.

8. **Calendar of Collective Bargaining, New York State, 1988.** This report lists all agreements covering 500 or more workers known to the Division of Research that expire or are subject to a wage reopening in 1988. The report is organized by month of expiration or reopening and, within each month, by industry.

9. **Statistics on Work Stoppages, New York State.** Annual. Data on the number of strikes, the number of workers involved and man days idle; describes major work stoppages.

10. **Work Stoppages in New York State.** Monthly. Listing gives parties, number of workers directly affected, locations and dates.

11. **Consumer Price Index, Selected Areas and Population Groups.** This bimonthly report presents tabular material on the Consumer Price Index for the United States, New York City SMSA, Buffalo SMSA, and by selected urban population size class. Data are presented for all urban consumers, and wage earners and clerical workers.

SPECIAL REPORTS

Special Reports 14, 15, 18 and/or 19 may be obtained by sending acheck or money order, payable to the New York State Department of Labor, to the Publications Unit.

12. **Occupational Brief.** Occupational briefs are available for *Computer Programmer, Cosmetologist, General Duty (Registered) Nurse, Licensed Practical Nurse, Occupational Therapist and Assistant, and Physical Therapist and Assistant.* The booklets, intended primarily for use by youth and counselors, include typical job duties performed, earnings expected, typical hours and days worked, working conditions, educational requirements, job locations, opportunities for advancement, employment outlook, and other related information.

13. **Affirmative Action Data, Total, Female and Minority Population: 1980.** This booklet provides data from the 1980 Census for New York State, standard metropolitan statistical areas (SMSA's), counties, and subdivisions with population of 25,000 or more, for use in preparing or assessing affirmative actions plans. Tables show total population, and populations of females and minorities, with distributions by race and Hispanic origin. March 1982.

14. **High-Technology Industries in New York State.** Acting on a commission from the NYS Science and Technology Foundation, the Battelle Corporation identified 52 high-technology industries which are both desirable and feasible for New York State. The industries in which New York has the best competitive position are the subject of this report. The report includes information on employment and wages in these 52 industries, detailed by four-digit SIC industry code and by area. Where possible, comparisons have been made with high technology industries nationwide. April 1983. Price $5.00

15. **Occupations in High-Technology Industries in New York State.** This report contains information on the occupations found in 52 high technology industries selected for their potential for long term growth in the state; it complements *High-Technology Industries in New York State*. The report includes sections covering occupational staffing patterns, significant occupations, apprenticeship occupations, assemblers, educational requirements, occupational supply and demand, and occupational outlook. July 1983. Price $5.00

16. **Total and Civilian Labor Force Summary, Selected Demographic Groups, New York State, Counties, and SMSA's, 1980.** This booklet contains labor force data from the 1980 Census for New York State, its standard metropolitan statistical areas, counties, and New York City, for use in developing and assessing affirmative action plans. Tables include: total and civilian labor force, employment, unemployment, and the unemployment rate for all persons 16 years of age and older and for females, blacks, American Indians, Eskimos, and Aleuts, Asians and Pacific Islanders, and persons of Hispanic origin. Percent distributions are also shown. March 1983.

17. **Civilian Labor Force by Occupation, Selected Demographic Groups, 1980.** These tables, which contain data from the 1980 Census, can be used in developing and assessing affirmative action plans. They show civilian labor force data by occupation for persons aged 16 and over. Data are also included for females, minorities, Hispanics, blacks, and other races. Tables are available for New York State, Standard Metropolitan Statistical Areas, and counties. February 1984

18. **The Jobseeker.** A 106-page guide designed primarily to assist young people entering the job market. Contains sections on the explanation of the job market/labor force, kinds of employers, kinds of occupations, how to choose an occupation, chances of finding a job, what to do to find a job, how to prepare a resume, how to complete an employment application, how to do well at a job interview. Also contains occupational profiles on 133 occupations of interest to youth, with information on each regarding number of employed, where found, job outlook, education needed, personal characteristics, and earnings. (First five copies are free. Additional copies are available at 50 cents per copy.) February 1986

19. **Occupations Licensed or Certified by New York State.** This publication contains licensing requirements for 65 occupations (training, tests and fees) as well as information on employment outlook, earnings, and working conditions for these occupations. The report also includes a list of apprenticable occupations. May 1987. Price $10.00.

B-PUBLICATIONS

235. **A History of Unemployment Insurance Legislation in the United States and New York State, 1935-1983.** A report on the background of the unemployment insurance system and changes in federal and state legislation from 1935 to 1983.

SPECIAL BULLETINS

Special Bulletins may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Office of Communications, New York State Department of Labor, W. Averell Harriman State Office Building Campus, Albany, New York 12240.

254. **Directory of Labor Unions and Employee Organizations in New York State, 1987-88.** This edition lists names and addresses of principal or executive officers of over 5,000 local, state and national or international employee organizations representing workers in New York State. Both public employee and private industry unions are included in the directory. Price $10.00.

LABOR RESEARCH REPORTS

85-4. **Statistics Relative to the New York State Unemployment Insurance Fund, 1936-1984.** This publication brings together updated historical statistics pertaining to the New York State Unemployment Insurance Fund. Data in each table extend as far back over the history of the UI program as they are available.

87-2. **Unemployment Insurance Beneficiaries in New York State, Benefit Year Ending in 1985.** Describes personal characteristics, work background, and benefit experience of unemployed workers who drew benefits in 1985.

88-1. **Occupational Injuries and Illnesses Survey, State and Local Government, New York State, 1986.** An annual survey by the Labor Department of work-related fatalities, injuries and illnesses in the public sector. The survey is required by the New York Public Employee Safety and Health Act of 1980.

MONTH IN REVIEW
December 1988

Sub-state labor force estimates beginning with data for April 1988 were developed under a new methodology required by the U.S. Department of Labor and are not comparable to data released previously. Sub-state estimates for a year ago in this report have been developed using the new methodology but have not been validated as the official estimates of the U.S. Department of Labor. Moreover, they cannot be used in the allocation of federal funds. They are presented in this report for analytical purposes only.

Civilian Labor Force

The unemployment rate in New York State moved higher in December 1988, up 0.3 of a percentage point from November to 4.6 percent. Despite the rise, the December unemployment rate was relatively low when judged by historic standards. (The historical series began in January 1970.) The state's unemployment rate has been at or below 5.0 percent since April 1987. Nevertheless, December 1988 marked the first month since July 1986 when the current rate was above the year-ago jobless rate (4.2 percent in December 1987.)

Resident employment in the state inched upward 8,000 in December to 8,200,000-- a record high for the month. Over the year, the number of workers has expanded by only 29,000 or 0.4 percent reflecting dampened growth caused by the stock market crash and spot labor shortages.

Unemployment among New Yorkers increased 25,000 over the month to 396,000 in December 1988. Joblessness was up 41,000 since December 1987.

Annual Average Unemployment Rates

The state jobless rate averaged 4.2 percent in 1988, down from 4.9 percent in 1987. The nation's rate was 5.5 percent in 1988, down from 6.2 percent in 1987.

Nonfarm Employment

Nonagricultural wage and salary employment (which excludes agricultural workers, the self-employed, unpaid family workers and domestic workers in private households) advanced 19,800 from November to 8,373,900 in December, the third consecutive month that nonfarm employment was at an all-time high. The nonagricultural job upturn reflected seasonal hiring in retail trade.

Trade, government and services employment exceeded all previous job levels. The expansion in trade (+31,500) mirrored the hiring of additional help by retailers to handle holiday sales, particularly in department and apparel stores. Temporary staff buildup by post offices to process holiday mail dominated the advance in public sector jobs (+3,300). Services employment, up only 1,900, presented a mixed picture with job gains barely outweighing job losses. Business and health services reported the largest increases, while seasonal cutbacks in agricultural services and private colleges and universities accounted for most job losses.

The finance, insurance and real estate, and transportation and public utilities divisions posted less significant employment gains. The job rise in the finance, insurance and real estate group (+1,300) reflected hiring by all division components except the banking and brokerage industries--industries that deteriorated throughout most of 1988. The 1,100 advance in transportation and public utilities jobs was due to hiring by trucking concerns.

Expected seasonal cutbacks in construction and manufacturing dampened the nonfarm job gain. Despite a job loss of 11,900, construction employment remained well above previous December job levels. The reduction in manufacturing jobs (-7,000) was centered among nondurable goods industries (-6,200), with two-thirds of the soft-goods job decrease in the apparel industry. Over the past year, manufacturing employment has fallen 5,300.

Since December 1987, the number of jobs on nonfarm payrolls in the state has expanded 154,400 or 1.9 percent. The nonagricultural upturn was led by job additions in services (+82,800) and trade (+36,600) which together accounted for over three-quarters of the employment growth.

Annual Average Nonfarm Employment

During 1988, nonfarm employment in New York State averaged 8,211,800 or 158,900 higher than in 1987. All industry divisions, except manufacturing, experienced higher job levels in 1988. Approximately seven out of 10 job additions to nonfarm payrolls during 1988 occurred in services and local government.

EXPLANATION OF DATA

EMPLOYED AND UNEMPLOYED

Employed and Unemployed. Employment and unemployment estimates prepared by the New York State Department of Labor are developed under a cooperative federal-state program administered by the Bureau of Labor Statistics (BLS) of the U.S. Department of Labor. The Current Population Survey (CPS)--the official survey instrument for measuring labor force attachment in the United States--is a monthly survey of about 54,000 households conducted throughout the nation by trained interviewers. Employment and unemployment data for New York State and New York City are based directly on responses of households within the state and city which are represented in the CPS sample.

The size of the CPS sample is not sufficient to provide reliable estimates for labor areas in the "balance of state" (state less New York City). In these areas, a series of factors are applied to administrative statistics from state unemployment insurance (UI) operations and to payroll statistics from establishment surveys to provide data on resident employment and unemployment. Data for these labor areas are adjusted so they add to "balance of state" totals.

These revised procedures, which were put into effect in January 1978, are designed to make the estimates more comparable from state to state and to incorporate more current data in the estimating process.

Employed. Employed persons are all those who during the week including the 12th of the month, (a) did any work at all as paid employees or in their own business or profession, or farm or who worked 15 hours or more as unpaid workers in an enterprise operated by a member of the family, or (b) did not work but who had jobs or businesses from which they were temporarily absent because of illness, bad weather, vacation, labor-management dispute, or personal reasons, whether or not they were paid by their employers for the time off, and whether or not they were seeking other jobs. Each employed person is counted only once.

Unemployed. Unemployed persons are all those persons who did not work during the week including the 12th of the month, who made specific efforts to find a job within the past four weeks, and who were available for work during the week except for temporary illness. Also included as unemployed are those who did not work at all, were available for work, and (a) were waiting to be called back to a job from which they had been laid off, or (b) were waiting to report to a new wage or salary job with 30 days.

Civilian Labor Force. The civilian labor force comprises all civilians classified as employed or unemployed in accordance with the criteria described above. The civilian labor force participation rate is the ratio of the civilian labor force to the civilian noninstitutional population.

Rate of Unemployment. The rate is the total number of unemployed persons expressed as a percentage of the employed and unemployed, i.e., as a percentage of the civilian labor force.

Not in the Labor Force. Not in the labor force includes all persons 16 years of age or older who are not classified as employed or unemployed.

NONAGRICULTURAL EMPLOYMENT, HOURS AND EARNINGS

Benchmark. Represents a comprehensive count of employment for the various nonagricultural industries as of the first quarter of each year. The primary source of benchmark information is employment data received from establishments covered by the New York State Unemployment

Insurance Law. Benchmark data for the remainder are obtained from the records of other private and governmental agencies. Employment estimates for the latest benchmark year and for the previous year are normally subject to revision annually. Current estimates are based on the March 1987 benchmark level for each industry.

Hours and earnings data are analyzed each year to maintain continuity of series.

Earnings, Average. For manufacturing, the averages cover production and related workers only. For the remaining industries, averages cover all nonsupervisory employees and working supervisors unless otherwise specified.

--**Earnings, Average Hourly.** Represents payrolls divided by total number of hours worked or paid for (including paid holiday, vacation, sick leave hours) during period reported. Total payroll includes both straight-time and premium pay. The averages are influenced by the amount of premium pay, as well as by changes in composition of labor force, changes in wage rates, upgrading of employees, etc., and consequently should not be interpreted as wage rates.

--**Earnings, Average Weekly.** Derived by multiplying average weekly hours by average hourly earnings. Includes premium wages for overtime and night shift work and payments made on piecework or incentive basis. The averages are affected by changes in length of workweek, part-time work, stoppages for varying causes, labor turnover, and absenteeism.

Employment, Nonfarm. Estimates include all nonfarm wage and salary workers who received pay for any part of the pay period including the 12th of the month. Persons on paid sick leave, paid holiday or paid vacation are included, but those on leave without pay for the entire payroll period are excluded. Persons on the payroll of more than one establishment during the period are counted each time reported. Self-employed persons, unpaid family workers, and domestics are excluded.

Historical Continuity. Historical continuity of statistics of average hours and earnings of manufacturing production workers has been interrupted for a number of industry groups because of changes in the composition of reporting samples or changes in the relative weight of individual industries in group totals. The starting month of a revised series is identified in a footnote in the issue in which the revision is introduced. Some series have been discontinued pending improvement in the reporting samples.

Hours, Average Weekly. See *Earnings, Average* for description of workers covered. The averages represent total number of hours worked (including overtime) or paid for (including paid holiday, vacation, and sick leave hours) during week divided by number of employees. The averages are affected by amount of labor turnover during week, changes in amount of overtime hours, and by changes in ratio of full-time or part-time eployment.

--**Hours, Average Weekly Overtime.** Represents total number of overtime hours worked by production workers during the week divided by total number of production workers. Overtime hours include those for which premiums were paid because those hours were in excess of the number of hours of either the straight-time workday or the workweek. Hours worked on Saturday, Sunday or holidays are included only if premium wage rates were paid.

Nonagricultural Establishments. All employing units except commercial and noncommercial farms, international government and private households.

Production Workers. Includes working foremen and all nonsupervisory workers (including leadmen and trainees) engaged in fabricating, processing, assembling, inspection, receiving, storage, handling, packing, warehousing, shipping, maintenance, repair, janitorial and watchman services, product development, auxiliary production for plant's own use (e.g., power plant), and in record-

keeping and other services closely associated with the above production operations. Excludes supervisory employees (above the working foremen level) and their clerical staffs, routemen, salesmen and force-account construction workers.

Reference Week of the Month. Employment, payrolls, hours, and earnings data are based on reports from firms covering a pay period, usually the week, including the 12th of the month.

METROPOLITAN STATISTICAL AREA

A metropolitan statistical area (MSA) is defined according to a set of detailed standards prepared by the Federal Committee on MSAs. Under these standards, which were revised in 1980, areas are designated as an MSA in one of two ways: If there is a city of at least 50,000 population, or an urbanized area of at least 50,000 with a total metropolitan population of at least 100,000. In New York State, MSAs are defined in terms of entire counties. In addition to the county containing the main city, an MSA also includes additional counties having strong economic and social ties to the central county.

Most MSA definitions are not subject to change until after the next national census. However, supplemental announcements of a few new MSAs may be issued in the spring of each year, generally because additional cities have reached the 50,000 level according to official population estimates.

If an area has more than 1 million population and meets certain other specified requirements, it will now be termed a Consolidated Metropolitan Statistical Area (CMSA), consisting of major components recognized as Primary Metropolitan Statistical Areas (PMSAs).

A number of areas in the state do not meet the criteria for recognition as an MSA but estimates are published for them. These areas are called Labor Market Areas (LMAs).

The geographic compostion of the areas (which differ from the administrative jurisdictions of the unemployment insurance and job service program) is given below.

Albany-Schenectady-Troy MSA. Albany, Montgomery, Greene, Rensselaer, Saratoga and Schenectady counties.
Binghamton MSA. Broome and Tioga counties.
Buffalo-Niagara Falls CMSA. Erie and Niagara counties.
Buffalo PMSA. Erie County.
Elmira MSA. Chemung County.
Nassau-Suffolk PMSA. Nassau and Suffolk counties.
New York City. Bronx, Kings, New York, Queens and Richmond counties.
New York Combined Area. Bronx, Kings, Nassau, New York, Queens, Richmond, Putnam, Rockland, Suffolk and Westchester counties.
New York PMSA. New York City and Putnam, Rockland and Westchester counties.
Niagara Falls PMSA. Niagara County.
Orange County PMSA. Orange County.
Poughkeepsie MSA. Dutchess County.
Rochester MSA. Livingston, Monroe, Ontario, Orleans and Wayne Counties.
Rockland LMA. Rockland County.
Syracuse MSA. Madison, Onondaga and Oswego counties.
Utica-Rome MSA. Herkimer and Oneida counties.
Westchester LMA. Westchester County.

INDUSTRIAL CLASSIFICATION

Data are classified in accordance with the 1972 edition of the *Standard Industrial Classification (SIC) Manual* prepared by the U.S. Office of Management and Budget. Coverage of the classification *services and miscellaneous* varies geographically. For New York State and New York City, this classification includes: the services industry division; forestry, fisheries and selected services relating to agriculture; and nonclassifiable establishments. For space requirements on the statistical tables, the formal SIC title for most of the industry groups have been replaced by the short SIC title as contained in Appendix B of the 1972 edition of the *SIC Manual-List of short SIC titles*. SIC titles used for groupings of two or more two-digit manufacturing industries reflect, to the extent possible, the respective components.

MISCELLANEOUS EXPLANATIONS

Effect of rounding. Detail figures may not add to total because of rounding.

Revisions. Revised figures are preceded by an "r" when first published.

KEY

Blank or-	Series not available due to inadequate sample size or other technical reasons.
n.a.	Data not available at date of publication.
n.c.	Not comparable with current data due to a break in series.
d	Figures withheld to avoid disclosure of data of individual reporting units.
*	Less than 0.05 percent.
r	Revised.

OTHER RECURRENT REPORTS

1. **Employment Trends.** Monthly for New York State. Highlights current developments in employment and unemployment.

2. **Labor Area Summary.** A monthly report which covers the 11 major labor areas of the state.

3. **Annual Labor Area Report.** Economic developments and outlook, population and labor force characteristics and trends, employment developments and outlook by industry and occupation, trends in employment and unemployment. Fiscal year reports are available for the state, selected major labor areas and New York City.

4. **Unemployment Insurance Tax Rates.** Annual. Rates by industry and size of firm and effects of factors that entered into determination of rates.

5. **Occupational Employment Statistics.** Series of individual triennial reports analyzing and detailing occupational patterns by industry sector: manufacturing, selected nonmanufacturing, wholesale and retail trade, regulated industries, and federal, state and local government.

6. **Occupational Needs, New York State, 1989-1991.** Projects the demand for workers in various jobs. The report is based on occupational employment statistics surveys which examine occupational distributions on a three-year cycle. The surveys involve a statistical sample of industries throughout the state to obtain their occupational staffing patterns.

7. **Collective Bargaining Settlements in New York State.** Quarterly. Summarizes changes in collective bargaining agreements covering wages that affect 250 or more workers. Covers wages and fringe benefits for agreements that affect 1,000 or more workers.

8. **Calendar of Collective Bargaining, New York State, 1988.** This report lists all agreements covering 500 or more workers known to the Division of Research that expire or are subject to a wage reopening in 1988. The report is organized by month of expiration or reopening and, within each month, by industry.

9. **Statistics on Work Stoppages, New York State.** Annual. Data on the number of strikes, the number of workers involved and man-days idle; describes major work stoppages.

10. **Work Stoppages in New York State.** Monthly. Listing gives parties, number of workers directly affected, locations and dates.

11. **Consumer Price Index, Selected Areas and Population Groups.** This bimonthly report presents tabular material on the Consumer Price Index for the United States, New York City SMSA, Buffalo SMSA, and by selected urban population size class. Data are presented for all urban consumers, and wage earners and clerical workers.

SPECIAL REPORTS

Special Reports 14, 15, 18 and/or 19 may be obtained by sending acheck or money order, payable to the New York State Department of Labor, to the Publications Unit.

12. **Occupational Brief.** Occupational briefs are available for: *Computer Programmer, Cosmetologist, General Duty (Registered) Nurse, Licensed Practical Nurse, Occupational Therapist and Assistant, Physical Therapist and Assistant, and Home Care Aide.* The booklets, intended primarily for use by youth and counselors, include typical job duties performed, earnings expected, typical hours and days worked, working conditions, educational requirements, job locations, opportunities for advancement, employment outlook, and other related information.

13. **Affirmative Action Data, Total, Female and Minority Population: 1980.** This booklet provides data from the 1980 Census for New York State, standard metropolitan statistical areas (SMSA's), counties, and subdivisions with population of 25,000 or more, for use in preparing or assessing affirmative actions plans. Tables show total population, and populations of females and minorities, with distributions by race and Hispanic origin. March 1982.

14. **High-Technology Industries in New York State.** Acting on a commission from the NYS Science and Technology Foundation, the Battelle Corporation identified 52 high-technology industries which are both desirable and feasible for New York State. The industries in which New York has the best competitive position are the subject of this report. The report includes information on employment and wages in these 52 industries, detailed by four-digit-SIC industry code and by area. Where possible, comparisons have been made with high-technology industries nationwide. April 1983. Price $5.00.

15. **Occupations in High-Technology Industries in New York State.** This report contains information on the occupations found in 52 high-technology industries selected for their potential for long-term growth in the state; it complements *High-Technology Industries in New York State.* The report includes sections covering occupational staffing patterns, significant occupations, apprenticeship occupations, assemblers, educational requirements, occupational supply and demand, and occupational outlook. July 1983. Price $5.00

16. **Total and Civilian Labor Force Summary, Selected Demographic Groups, New York State, Counties, and SMSA's, 1980.** This booklet contains labor force data from the 1980 Census for New York State, its standard metropolitan statistical areas, counties, and New York City, for use in developing and assessing affirmative action plans. Tables include: total and civilian labor force; employment, unemployment, and the unemployment rate for all persons 16 years of age and older and for females, blacks, American Indians, Eskimos, and Aleuts, Asians and Pacific Islanders, and persons of Hispanic origin. Percent distributions are also shown. March 1983.

17. **Civilian Labor Force by Occupation, Selected Demographic Groups, 1980.** These tables, which contain data from the 1980 Census, can be used in developing and assessing affirmative action plans. They show civilian labor force data by occupation for persons aged 16 and over. Data are also included for females, minorities, Hispanics, blacks, and other races. Tables are available for New York State, Standard Metropolitan Statistical Areas, and counties. February 1984.

18. **The Jobseeker.** A 106-page guide designed primarily to assist young people entering the job market. Contains sections on the explanation of the job market/labor force, kinds of employers, kinds of occupations, how to choose an occupation, chances of finding a job, what to do to find a job, how to prepare a resume, how to complete an employment application, how to do well at a job interview. Also contains occupational profiles on 133 occupations of interest to youth, with information on each regarding: number of employed, where found, job outlook, education needed, personal characteristics, and earnings. (First five copies are free. Additional copies are available at 50 cents per copy.) February 1986.

19. **Occupations Licensed or Certified by New York State.** This publication contains licensing requirements for 65 occupations (training, tests and fees) as well as information on employment outlook, earnings, and working conditions for these occupations. The report also includes a list of apprenticable occupations. May 1987. Price $10.00.

B-PUBLICATIONS

235. **A History of Unemployment Insurance Legislation in the United States and New York State, 1935-1983.** A report on the background of the unemployment insurance system and changes in federal and state legislation from 1935 to 1983.

SPECIAL BULLETINS

Special Bulletins may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Office of Communications, New York State Department of Labor, W. Averell Harriman State Office Building Campus, Albany, New York 12240.

254. **Directory of Labor Unions and Employee Organizations in New York State, 1987-88.** This edition lists names and addresses of principal or executive officers of over 5,000 local, state and national or international employee organizations representing workers in New York State. Both public employee and private industry unions are included in the directory. Price $10.00.

LABOR RESEARCH REPORTS

88-4. **Occupational Injuries and Illnesses Survey, State and Local Government, New York State, 1987.** An annual survey by the Labor Department of work-related fatalities, injuries and illnesses in the public sector. The survey is required by the New York Public Employee Safety and Health Act of 1980.

88-5. **Unemployment Insurance Beneficiaries in New York State, Benefit Year Ending in 1986.** Describes personal characteristics, work background, and benefit experience of unemployed workers who drew benefits in 1985.

MONTH IN REVIEW
January 1989

Sub-state labor force estimates beginning with data for April 1988 were developed under a new methodology required by the U.S. Department of Labor and are not comparable to data released previously. Sub-state estimates for a year ago in this report have been developed using the new methodology but have not been validated as the official estimates of the U.S. Department of Labor. Moreover, they cannot be used in the allocation of federal funds. They are presented in this report for analytical purposes only.

Civilian Labor Force

New York's unemployment rate normally increases abruptly from December to January and this year was no exception. The state unemployment rate rose a full percentage point from December to 5.6 percent in January 1989, primarily the result of a rise in joblessness. Although up 0.6 of a percentage point over the year from 5.0 percent, the current rate was the third lowest rate on record for January. (The historical series began in January 1970.)

Based on preliminary indications, the decline of 47,000 in resident employment over the month to 8,170,000 in January was attributable to seasonal events (post-holiday cutbacks) and was not as severe as usual. Some construction activity was able to continue due to a mild winter. Employment in January 1989 was up 65,000 from a year ago.

The number of unemployed persons increased 85,000 over the month to 482,000 in January 1989, or 54,000 above the jobless count of 12 months ago.

Nonfarm Employment

Nonagricultural employment (which excludes agricultural workers, the self-employed, unpaid family workers and domestic workers in private households) fell 220,900 from December 1988 to 8,115,000 in January with all industry divisions sharing in the reduction. Post-holiday layoffs and winter-related slowdowns in business activity caused the sharp downturn. Long-term job growth, however, was evident in most sectors of the state's economy as nonfarm employment was at a record-high for the month of January. (Construction, trade, services, and public employment were at record levels for the month.)

Seasonal losses in trade, services, and construction accounted for three-quarters of the nonfarm reduction. The expected end to temporary holiday jobs in stores caused nearly all of the 86,900 decrease in trade jobs. Trade losses accounted for 39 percent of the total nonfarm decline. Services employment (-43,900) was down in all component industries with private education and business services reporting the heaviest losses. All categories of construction jobs (-34,500), particularly the special trade contractors industry, declined as construction activity approached its expected low point for the year.

Government and manufacturing also posted notable job decreases. The job decline of 20,700 in the public sector largely reflected nonsalaried personnel in local education, particularly community colleges, furloughed for mid-winter recess. The drop in manufacturing jobs (-18,400) was somewhat smaller than usual for this time of year with the apparel industry registering the largest decrease. For the first time since December 1984, manufacturing employment was above the year-ago level (+4,000).

Job reductions in the remaining industry divisions were seasonal. The job shrinkage in the transportation and public utilities group (-9,100) was primarily in the trucking industry, while cutbacks by realtors dominated the downswing in finance, insurance, and real estate employment (-6,700).

Since January 1988, the number of jobs on nonfarm payrolls has grown 138,000 or 1.7 percent. Over two-thirds of the over-the-year job expansion was in the services and trade divisions.

INDUSTRY IN REVIEW, 1988

Nonfarm Employment, Hours and Earnings and Unemployment Insurance Beneficiaries

(Annual average data unless otherwise indicated)

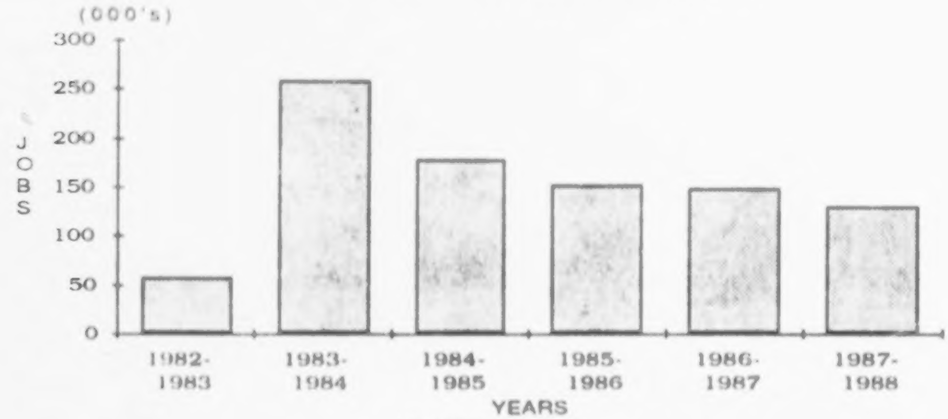
Vincent F. DeSantis, John P. Wong and
Roger W. Gerby

Nonfarm Employment

From 1982 through 1988, New York State experienced an unprecedented peace-time expansion, adding 929,800 nonfarm jobs. In 1988, the total number of nonfarm jobs in the state surpassed previous records, averaging 8,184,400, up 130,800 from 1987. Nevertheless, job growth proceeded at a slower pace in the state than in the nation. From 1987 to 1988, the number of jobs in the state expanded at a rate of 1.6 percent compared with 3.2 percent in the nation. By the end of 1988, the rate of job expansion in the state had slowed noticeably as New York City experienced over-the-year job losses for the first time since June 1983.

The stock market crash caused a sharp slowdown in the number of finance, insurance and real estate jobs (+4,000 for 1987-1988 versus +36,000 for 1986-1987), with the banking and brokerage industries down over the year. The job situation in the financial sector became generally worse as the year went on and by December, New York City (home for seven out of every 10 jobs in the finance, insurance and real estate division) had lost nearly 16,000 financial-sector jobs -- a decline in line with accumulated publicly announced layoff intentions on record at the beginning of the year. The crash led to softness in other industries in New York City, with the business services industry down slightly at the end of 1988 in contrast to the more traditional robust growth associated with the industry. Outside of New York City, the business services industry expanded by 11,000 over the year. At year end, for the state as a whole, employment was down in the finance, insurance and real estate industry (F.I.R.E.) by nearly 6,000 from 1987.

NET CHANGE IN TOTAL NONFARM JOBS
IN RECENT YEARS, NEW YORK STATE



Industry	Annual averages 1986-1987	1987-1988	December 1987-1988
All nonfarm jobs	149.2	130.8	100.8
Services	77.3	67.2	50.0
Government	19.8	32.5	22.1
Trade	26.8	20.8	26.8
Construction	19.9	11.2	10.9
Trans. comm. & utilities	3.1	5.1	3.3
Finance, insurance and real estate	35.5	4.0	-5.7
Manufacturing	-33.2	-10.0	-6.6

Manufacturing, although the only industry division to average a job loss in the state for the entire year (-10,000), was able to slow its rate of decline from the prior year. By year end, the over-the-year decline was down to 6,600. The annual average 1987-1988 and December 1987 to December 1988 factory job losses occurred in New York City. The balance of the state actually reported an increase in the number of manufacturing jobs during these periods. (See graphs on following page.)

The New York City growth rate of 0.4 percent for 1988 was a restraint on the state's growth. The number of jobs in the state increased by 1.6 percent in 1988. With New York City excluded, however, the growth rate was a full percentage point higher -- 2.6 percent. Areas surrounding New York City also had job growth rates below the state average with jobs in the Nassau-Suffolk area increasing by 1.2 percent from 1987 to 1988 and Westchester, Rockland and Putnam counties experiencing a combined increase of 1.5 percent.

For some major areas of the state, 1988 was a very good year. The Binghamton, Elmira, Orange County, Poughkeepsie, Rochester, and Utica-Rome areas had job growth rates exceeding the national average. Although the Rochester area added the most jobs during 1988 (16,500), the Elmira area reported the fastest rate of increase (4.2 percent).

The three areas which added the most jobs finished the year on different notes. The Rochester area was up over the year more in December than on an annual average basis. Nassau-Suffolk was not doing as well as it had for most the year and New York City was no longer displaying over-the-year growth.

Hours and Earnings

In 1988, the average weekly wage of New Yorkers covered by unemployment insurance in the private wage and salary sector was $499.87, up $27.99 or 5.9 percent from 1987.

Average weekly earnings of production workers in manufacturing at $416.16, were up $13.57 or 3.4 percent from 1987. The average number of hours per week for which factory production workers were paid in 1988 was 39.9, unchanged from 1987. Average hourly earnings reached $10.43 in 1988 or $0.34 higher than in 1987.

Unemployment Insurance Beneficiaries

A total of $1.1 billion was paid to jobless workers in New York State in 1988 under a variety of unemployment assistance programs. A year earlier, these benefits also totaled $1.1 billion. In an average week of 1989, approximately 175,000 persons were collecting benefits under these programs, compared with 183,000 in 1987.

These programs provided up to a total of 26 weeks of jobless benefits during 1988 as described below:

- The New York Sate Unemployment Insurance Law provides for payment of up to 26 weeks of regular benefits to eligible jobless workers. These benefits are paid from the state Unemployment Insurance Fund, which is financed by contributions from New York employers. In 1988, $1.1 billion in benefits was paid to jobless workers under this program, the same amount paid in 1987.

- During 1988, New York State was in its third year of a three-year Shared Work Program. Under this program, employers of 10 or more full-time employees may choose to reduce the number of hours worked for all or part of the employer's work force as an alternative to layoffs. Employees with reduced hours are eligible for benefits for the time they are not at work. During 1988, $321,000 in regular benefits was paid to 600 individuals.

  In the first three years of the program, 210 employers and 7,400 individuals have participated in this program with over $737,000 in benefits being paid and nearly 800 layoffs being averted. This program was extended for an additional year in August 1988.

- Standby legislation under the Unemployment Insurance Law provides for the payment of an additional 13 weeks of extended benefits during periods of high insured unemployment to persons who have used up the basic 26-week allowance. This program "triggered" on in July 1980 and "triggered" off in January 1981 based on the national "trigger" computation. There were no extended benefits in 1988 or 1987.

- There are programs that provide unemployment benefits to persons who worked for the federal government or were in the Armed Forces in the 52 weeks before initiating claims. These benefits are fully-financed by the federal government. Payment to ex-servicemembers totaled $6 million in 1988, and in 1987. Former federal employees received $7 million in unemployment benefits in 1988 and in 1987.

- Effective October 25, 1987, Section 599 of the Unemployment Insurance Law was amended to provide additional conditions under which training can be approved and to provide additional benefits to claimants in approved training.

  As a result of this amendment, approval can now be justified if the training will upgrade the claimant's existing skill or train the claimant for an occupation likely to lead to more regular long-term employment.

  For claimants approved for training on or after October 25, 1987, a three-year demonstration project provides $10 million per year in additional benefits. Claimants may receive up to 52 effective days of these benefits (equivalent to 13 full-week payments) following the exhaustion of normal benefits (equivalent to 26 full-week payments) based on continued satisfactory participation in training. The date a claimant enters training determines the number of weeks a claimant can receive these benefits, which are chargeable to the General Account. In the first 14 months of the program, over 3,200 claimants have been approved to receive $3.8 million in these additional benefits. ☐

ANNUAL REVISIONS OF NONFARM EMPLOYMENT ESTIMATES NEW YORK STATE, NEW YORK CITY AND SELECTED AREAS BY INDUSTRY, 1987-1988

Monthly estimates of wage and salary in nonfarm establishments in New York State, New York City, and selected areas by industry for the years 1987-1988 presented on pages 14 to 107 reflect the annual revisions to the 1988 benchmark. These estimates supersede those previously published for 1987 and 1988 in the January 1988 through December 1988 issues of the *Employment Review*.

Employment estimates are adjusted to reflect revisions in the benchmarks of the covered noncovered segments of the nonagricultural employment series. Employment estimates for establishments covered by the New York State Unemployment Insurance Law were adjusted to employment levels through 1988. Employment estimates for the noncovered sector such as interstate railroads, nonprofit religious, charitable, scientific, social and educational organizations and portions of government were adjusted based upon the latest information made available through the U.S. Bureau of Labor Statistics and other governmental agencies.

EXPLANATION OF DATA

EMPLOYED AND UNEMPLOYED

Employed and Unemployed. Employment and unemployment estimates prepared by the New York State Department of Labor are developed under a cooperative federal-state program administered by the Bureau of Labor Statistics (BLS) of the U.S. Department of Labor. The Current Population Survey (CPS)--the official survey instrument for measuring labor force attachment in the United States--is a monthly survey of about 54,000 households conducted throughout the nation by trained interviewers. Employment and unemployment data for New York State and New York City are based directly on responses of households within the state and city which are represented in the CPS sample.

The size of the CPS sample is not sufficient to provide reliable estimates for labor areas in the "balance of state" (state less New York City). In these areas, a series of factors are applied to administrative statistics from state unemployment insurance (UI) operations and to payroll statistics from establishment surveys to provide data on resident employment and unemployment. Data for these labor areas are adjusted so they add to "balance of state" totals.

These revised procedures, which were put into effect in January 1978, are designed to make the estimates more comparable from state to state and to incorporate more current data in the estimating process.

Employed. Employed persons are all those who during the week including the 12th of the month, (a) did any work at all as paid employees or in their own business or profession, or farm or who worked 15 hours or more as unpaid workers in an enterprise operated by a member of the family, or (b) did not work but who had jobs or businesses from which they were temporarily absent because of illness, bad weather, vacation, labor-management dispute, or personal reasons, whether or not they were paid by their employers for the time off, and whether or not they were seeking other jobs. Each employed person is counted only once.

Unemployed. Unemployed persons are all those persons who did not work during the week including the 12th of the month, who made specific efforts to find a job within the past four weeks, and who were available for work during the week except for temporary illness. Also included as unemployed are those who did not work at all, were available for work, and (a) were waiting to be called back to a job from which they had been laid off, or (b) were waiting to report to a new wage or salary job with 30 days.

Civilian Labor Force. The civilian labor force comprises all civilians classified as employed or unemployed in accordance with the criteria described above. The civilian labor force participation rate is the ratio of the civilian labor force to the civilian noninstitutional population.

Rate of Unemployment. The rate is the total number of unemployed persons expressed as a percentage of the employed and unemployed, i.e., as a percentage of the civilian labor force.

Not in the Labor Force. Not in the labor force includes all persons 16 years of age or older who are not classified as employed or unemployed.

NONAGRICULTURAL EMPLOYMENT, HOURS AND EARNINGS

Benchmark. Represents a comprehensive count of employment for the various nonagricultural industries as of the first quarter of each year. The primary source of benchmark information is employment data received from establishments covered by the New York State Unemployment

Insurance Law. Benchmark data for the remainder are obtained from the records of other private and governmental agencies. Employment estimates for the latest benchmark year and for the previous year are normally subject to revision annually. Current estimates are based on the March 1988 benchmark level for each industry.

Hours and earnings data are analyzed each year to maintain continuity of series.

Earnings, Average. For manufacturing, the averages cover production and related workers only. For the remaining industries, averages cover all nonsupervisory employees and working supervisors unless otherwise specified.

Earnings, Average Hourly. Represents payrolls divided by total number of hours worked or paid for (including paid holiday, vacation, sick leave hours) during period reported. Total payroll includes both straight-time and premium pay. The averages are influenced by the amount of premium pay, as well as by changes in composition of labor force, changes in wage rates, upgrading of employees, etc., and consequently should not be interpreted as wage rates.

Earnings, Average Weekly. Derived by multiplying average weekly hours by average hourly earnings. Includes premium wages for overtime and night shift work and payments made on piecework or incentive basis. The averages are affected by changes in length of workweek, part-time work, stoppages for varying causes, labor turnover, and absenteeism.

Employment, Nonfarm. Estimates include all nonfarm wage and salary workers who received pay for any part of the pay period including the 12th of the month. Persons on paid sick leave, paid holiday or paid vacation are included, but those on leave without pay for the entire payroll period are excluded. Persons on the payroll of more than one establishment- during the period are counted each time reported. Self-employed persons, unpaid family workers, and domestics are excluded.

Historical Continuity. Historical continuity of statistics of average hours and earnings of manufacturing production workers has been interrupted for a number of industry groups because of changes in the composition of reporting samples or changes in the relative weight of individual industries in group totals. The starting month of a revised series is identified in a footnote in the issue in which the revision is introduced. Some series have been discontinued pending improvement in the reporting samples.

Hours, Average Weekly. See *Earnings, Average* for description of workers covered. The averages represent total number of hours worked (including overtime) or paid for (including paid holiday, vacation, and sick leave hours) during week divided by number of employees. The averages are affected by amount of labor turnover during week, changes in amount of overtime hours, and by changes in ratio of full-time or part-time eployment.

Hours, Average Weekly Overtime. Represents total number of overtime hours worked by production workers during the week divided by total number of production workers. Overtime hours include those for which premiums were paid because those hours were in excess of the number of hours of either the straight-time workday or the workweek. Hours worked on Saturday, Sunday or holidays are included only if premium wage rates were paid.

Nonagricultural Establishments. All employing units except commercial and noncommercial farms, international government and private households.

Production Workers. Includes working foremen and all nonsupervisory workers (including leadmen and trainees) engaged in fabricating, processing, assembling, inspection, receiving, storage, handling, packing, warehousing, shipping, maintenance, repair, janitorial and watchman services, product development, auxiliary production for plant's own use (e.g., power plant), and in record-

keeping and other services closely associated with the above production operations. Excludes supervisory employees (above the working foremen level) and their clerical staffs, routemen, salesmen and force-account construction workers.

Reference Week of the Month. Employment, payrolls, hours, and earnings data are based on reports from firms covering a pay period, usually the week, including the 12th of the month.

METROPOLITAN STATISTICAL AREA

A metropolitan statistical area (MSA) is defined according to a set of detailed standards prepared by the Federal Committee on MSAs. Under these standards, which were revised in 1980, areas are designated as an MSA in one of two ways: If there is a city of at least 50,000 population, or an urbanized area of at least 50,000 with a total metropolitan population of at least 100,000. In New York State, MSAs are defined in terms of entire counties. In addition to the county containing the main city, an MSA also includes additional counties having strong economic and social ties to the central county.

Most MSA definitions are not subject to change until after the next national census. However, supplemental announcements of a few new MSAs may be issued in the spring of each year, generally because additional cities have reached the 50,000 level according to official population estimates.

If an area has more than 1 million population and meets certain other specified requirements, it will now be termed a Consolidated Metropolitan Statistical Area (CMSA), consisting of major components recognized as Primary Metropolitan Statistical Areas (PMSAs).

A number of areas in the state do not meet the criteria for recognition as an MSA but estimates are published for them. These areas are called Labor Market Areas (LMAs).

The geographic compostion of the areas (which differ from the administrative jurisdictions of the unemployment insurance and job service program) is given below.

Albany-Schenectady-Troy MSA. Albany, Montgomery, Greene, Rensselaer, Saratoga and Schenectady counties.
Binghamton MSA. Broome and Tioga counties.
Buffalo-Niagara Falls CMSA. Erie and Niagara counties.
Buffalo PMSA. Erie County.
Elmira MSA. Chemung County.
Nassau-Suffolk PMSA. Nassau and Suffolk counties.
New York City. Bronx, Kings, New York, Queens and Richmond counties.
New York Combined Area. Bronx, Kings, Nassau, New York, Queens, Richmond, Putnam, Rockland, Suffolk and Westchester counties.
New York PMSA. New York City and Putnam, Rockland and Westchester counties.
Niagara Falls PMSA. Niagara County.
Orange County PMSA. Orange County.
Poughkeepsie MSA. Dutchess County.
Rochester MSA. Livingston, Monroe, Ontario, Orleans and Wayne Counties.
Rockland LMA. Rockland County.
Syracuse MSA. Madison, Onondaga and Oswego counties.
Utica-Rome MSA. Herkimer and Oneida counties.
Westchester LMA. Westchester County.

INDUSTRIAL CLASSIFICATION

Data are classified in accordance with the 1972 edition of the *Standard Industrial Classification (SIC) Manual* prepared by the U.S. Office of Management and Budget. Coverage of the classification *services and miscellaneous* varies geographically. For New York State and New York City, this classification includes: the services industry division, forestry, fisheries and selected services relating to agriculture; and nonclassifiable establishments. For space requirements on the statistical tables, the formal SIC title for most of the industry groups have been replaced by the short SIC title as contained in Appendix B of the 1972 edition of the *SIC Manual-List of short SIC titles*. SIC titles used for groupings of two or more two-digit manufacturing industries reflect, to the extent possible, the respective components.

MISCELLANEOUS EXPLANATIONS

Effect of rounding. Detail figures may not add to total because of rounding.

Revisions. Revised figures are preceded by an "r" when first published.

KEY

Blank or -	Series not available due to inadequate sample size or other technical reasons.
n.a.	Data not available at date of publication.
n.c.	Not comparable with current data due to a break in series.
d	Figures withheld to avoid disclosure of data of individual reporting units.
*	Less than 0.05 percent.
r	Revised.

OTHER RECURRENT REPORTS

1. **Employment Trends.** Monthly for New York State. Highlights current developments in employment and unemployment.

2. **Labor Area Summary.** A monthly report which covers the 11 major labor areas of the state.

3. **Annual Labor Area Report.** Economic developments and outlook, population and labor force characteristics and trends, employment developments and outlook by industry and occupation, trends in employment and unemployment. Fiscal year reports are available for the state, selected major labor areas and New York City.

4. **Unemployment Insurance Tax Rates.** Annual. Rates by industry and size of firm and effects of factors that entered into determination of rates.

5. **Occupational Employment Statistics.** Series of individual triennial reports analyzing and detailing occupational patterns by industry sector: manufacturing, selected nonmanufacturing, wholesale and retail trade, regulated industries, and federal, state and local government.

6. **Occupational Needs, New York State, 1989-1991.** Projects the demand for workers in various jobs. The report is based on occupational employment statistics surveys which examine occupational distributions on a three-year cycle. The surveys involve a statistical sample of industries throughout the state to obtain their occupational staffing patterns.

7. **Collective Bargaining Settlements in New York State.** Quarterly. Summarizes changes in collective bargaining agreements covering wages that affect 250 or more workers. Covers wages and fringe benefits for agreements that affect 1,000 or more workers.

8. **Calendar of Collective Bargaining, New York State, 1988.** This report lists all agreements covering 500 or more workers known to the Division of Research that expire or are subject to a wage reopening in 1988. The report is organized by month of expiration or reopening and, within each month, by industry.

9. **Statistics on Work Stoppages, New York State.** Annual. Data on the number of strikes, the number of workers involved and man-days idle; describes major work stoppages.

10. **Work Stoppages in New York State.** Monthly. Listing gives parties, number of workers directly affected, locations and dates.

11. **Consumer Price Index, Selected Areas and Population Groups.** This bimonthly report presents tabular material on the Consumer Price Index for the United States, New York City SMSA, Buffalo SMSA, and by selected urban population size class. Data are presented for all urban consumers, and wage earners and clerical workers.

SPECIAL REPORTS

Special Reports 14, 15, 18 and/or 19 may be obtained by sending acheck or money order, payable to the New York State Department of Labor, to the Publications Unit.

12. **Occupational Brief.** Occupational briefs are available for: ***Computer Programmer, Cosmetologist, General Duty (Registered) Nurse, Licensed Practical Nurse, Occupational Therapist and Assistant, Physical Therapist and Assistant, and Home Care Aide.*** The booklets, intended primarily for use by youth and counselors, include typical job duties performed, earnings expected, typical hours and days worked, working conditions, educational requirements, job locations, opportunities for advancement, employment outlook, and other related information.

13. **Affirmative Action Data, Total, Female and Minority Population: 1980.** This booklet provides data from the 1980 Census for New York State, standard metropolitan statistical areas (SMSA's), counties, and subdivisions with population of 25,000 or more, for use in preparing or assessing affirmative actions plans. Tables show total population, and populations of females and minorities, with distributions by race and Hispanic origin. March 1982.

14. **High-Technology Industries in New York State.** Acting on a commission from the NYS Science and Technology Foundation, the Battelle Corporation identified 52 high-technology industries which are both desirable and feasible for New York State. The industries in which New York has the best competitive position are the subject of this report. The report includes information on employment and wages in these 52 industries, detailed by four-digit-SIC industry code and by area. Where possible, comparisons have been made with high-technology industries nationwide. April 1983. Price $5.00.

15. **Occupations in High-Technology Industries in New York State.** This report contains information on the occupations found in 52 high-technology industries selected for their potential for long-term growth in the state; it complements *High-Technology Industries in New York State.* The report includes sections covering occupational staffing patterns, significant occupations, apprenticeship occupations, assemblers, educational requirements, occupational supply and demand, and occupational outlook. July 1983. Price $5.00.

16. **Total and Civilian Labor Force Summary, Selected Demographic Groups, New York State, Counties, and SMSA's, 1980.** This booklet contains labor force data from the 1980 Census for New York State, its standard metropolitan statistical areas, counties, and New York City, for use in developing and assessing affirmative action plans. Tables include: total and civilian labor force; employment, unemployment, and the unemployment rate for all persons 16 years of age and older and for females, blacks, American Indians, Eskimos, and Aleuts, Asians and Pacific Islanders, and persons of Hispanic origin. Percent distributions are also shown. March 1983.

17. **Civilian Labor Force by Occupation, Selected Demographic Groups, 1980.** These tables, which contain data from the 1980 Census, can be used in developing and assessing affirmative action plans. They show civilian labor force data by occupation for persons aged 16 and over. Data are also included for females, minorities, Hispanics, blacks, and other races. Tables are available for New York State, Standard Metropolitan Statistical Areas, and counties. February 1984.

18. **The Jobseeker.** A 106-page guide designed primarily to assist young people entering the job market. Contains sections on the explanation of the job market/labor force, kinds of employers, kinds of occupations, how to choose an occupation, chances of finding a job, what to do to find a job, how to prepare a resume, how to complete an employment application, how to do well at a job interview. Also contains occupational profiles on 133 occupations of interest to youth, with information on each regarding: number of employed, where found, job outlook, education needed, personal characteristics, and earnings. (First copy is free. Additional copies are available at 50 cents per copy.) February 1986.

19. **Occupations Licensed or Certified by New York State.** This publication contains licensing requirements for 65 occupations (training, tests and fees) as well as information on employment outlook, earnings, and working conditions for these occupations. The report also includes a list of apprenticable occupations. May 1987. Price $10.00.

B-PUBLICATIONS

235. **A History of Unemployment Insurance Legislation in the United States and New York State, 1935-1983.** A report on the background of the unemployment insurance system and changes in federal and state legislation from 1935 to 1983.

SPECIAL BULLETINS

Special Bulletins may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Office of Communications, New York State Department of Labor, W. Averell Harriman State Office Building Campus, Albany, New York 12240

254. **Directory of Labor Unions and Employee Organizations in New York State, 1987-88.** This edition lists names and addresses of principal or executive officers of over 5,000 local, state and national or international employee organizations representing workers in New York State. Both public employee and private industry unions are included in the directory. Price $10.00.

LABOR RESEARCH REPORTS

88-4. **Occupational Injuries and Illnesses Survey, State and Local Government, New York State, 1987.** An annual survey by the Labor Department of work-related fatalities, injuries and illnesses in the public sector. The survey is required by the New York Public Employee Safety and Health Act of 1980.

88-5. **Unemployment Insurance Beneficiaries in New York State, Benefit Year Ending in 1986.** Describes personal characteristics, work background, and benefit experience of unemployed workers who drew benefits in 1985.

MONTH IN REVIEW
February 1989

Civilian Labor Force

New York State's unemployment rate was down 0.1 of a percentage point from January 1989 to 5.5 percent in February. The improvement in the rate was moderate when measured against comparable decreases in the rate over the past couple of years. Although up 1.1 percentage points from a year ago, the current rate was the third lowest on record for the month of February. (The historical series began in January 1970.)

Resident employment was little changed between January and February, declining 18,000 to 8,152,000. Compared with a year ago, employment in February 1979 was higher by 87,000.

Total unemployment moved downward 9,000 from January to 473,000 in February. Since February 1988, joblessness among New Yorkers has increased 101,000.

Nonfarm Employment

New York's nonagricultural job count (which excludes agricultural workers, the self-employed, unpaid family workers and domestic workers in private households) advanced 19,700 from January 1979 to 8,134,700 in February, a record-high for the month. the return to work of nonsalaried school personnel following mid-winter recess accounted for most of the nonfarm job gain. However, cutbacks in the manufacturing sector, particularly in the transportation equipment industry, dampened this advance.

Employment in services, government, construction and trade were at record-high levels for February despite seasonal losses in construction and trade. Nearly all industries in the services division shared in the 22,900 upturn in jobs with over half of the gain in private education. Similarly, the rise in public employment (+18,600) reflected recalls in local education. Construction activity reached its annual low point in February with most of the 4,700 reduction in jobs in the special contractor industry. The bulk of the 19,200 drop in trade employment was in department stores. Seasonal hiring among restaurants softened the decline in trade jobs.

Employment among other industry divisions was up minimally from a month ago. The number of manufacturing jobs, which normally rises substantially in February, increased only 1,300 due to less-than-usual hiring in soft-goods manufacturing coupled with job losses in the transportation equipment industry; the temporary partial closing of an automobile assembly plant for retooling and permanent cutbacks of workers in the aircraft industry were the reasons for the job loss.

The increase of 800 jobs in the transportation and public utilities division was traced to staff expansion in the trucking and airline industries. Employment in the finance, insurance and real estate group was essentially unchanged over the month (+200) as cutbacks in the banking and brokerage industries nearly offset gains elsewhere in the division. Over the year, jobs in the banking industry and brokerage industry have declined 5,100 and 8,700, respectively.

Since February 1988, the state has gained 117,700 nonfarm jobs, an increase of 1.5 percent. Three-quarters of the over-the-year job expansion occurred in the services and trade divisions.

LABOR FORCE IN REVIEW, 1988

Unemployment Rates Drop Sharply in 1988

Vincent F. DeSantis and John P. Wong

The New York State unemployment rate averaged 4.2 percent in 1988, down significantly from 4.9 percent in 1987. Nationally, the unemployment rate declined to 5.5 percent from 6.2 percent. The decline of 0.7 of a percentage point in the state jobless rate reflected a drop (-54,000) in the number of unem-ployed persons to 358,000 and an increase (+86,000) in the number of employed persons to 8,164,000.

The 1988 unemployment rate of 4.2 percent for the state was the lowest in the current labor force series which began in January 1970. The 1988 employment level of 8,164,000 was the highest in the current series.

Unemployment rates were much improved for blacks (down 1.9 percentage points to 7.3 percent) and Hispanics (down 1.9 percentage points to 6.4 percent). The unemployment rate for whites also decreased over the year (down 0.5 of a percentage point to 3.7 percent).

The unemployment rate for youth (persons 16-19 years of age) declined 0.2 of a percentage point over the year to 11.9 percent--low by historic standards. The unemployment rate of adults (persons age 20 and older), already low, moved lower to 3.7 percent--a decline of 0.7 of a percentage point from 1987. the unemployment rate of adult men fell to 3.9 percent (from 4.8 percent) while the rate for adult women decreased to 3.5 percent (from 3.9 percent).

A substantial rise in the number of employed black workers (+73,000) contrasted with a slight increase in white workers (+24,000) and a drop in the number of employed Hispanics (-20,000). Among adults, the number of employed men increased by 73,000 while the number of employed women rose by 25,000.

The civilian labor force grew very slowly over the year, up only 32,000 or 0.4 percent, as spot shortages of qualified workers became more intense.

UNEMPLOYMENT RATES, PERSONS 16 AND OVER

Syracuse	6.2	4.4	-1.8
Utica-Rome	5.4	4.8	-.6

Major Area Unemployment Rates

From 1987 to 1988, annual unemployment rates dropped in every major area in the state. The Syracuse area had the largest decline, down 1.8 percentage points, and the Glens Falls, Nassau-Suffolk and the Orange County areas experienced the smallest decrease, off 0.1 of a percentage point. Unemployment rates for major areas ranged from 5.3 percent in the Buffalo-Niagara Falls area to 2.6 percent in the Poughkeepsie area during 1988.

Major area unemployment rates are shown in the table at the bottom of the preceding page and in the graph below. □

Note: Detail for the 16 years and over population will not add to total because data for other races are not presented. In addition, Hispanics are included in both the white and black population groups.

ADOPTION OF THE 1987 STANDARD INDUSTRIAL CLASSIFICATION (SIC) MANUAL [1]

David J. Trzaskos

The Standard Industrial Classification (SIC) is the statistical classification system underlying all establishment-based federal economic indicators. An establishment is an economic unit, such as a factory, generally at a single physical location where business is conducted or where services or industrial operations are performed. The SIC is a coding system that can be used to classify these establishments by their type of economic activity. It was developed to promote the comparability of statistics describing various facets of the national economy. Although the SIC was initially developed for use within the federal government for statistical purposes, such as collecting, tabulating,and publishing data by industry, federal agencies also use the system for nonstatistical purposes, such as administering regulatory and tax programs. Private sector firms and organizations also have widely adopted the system for market research.

The SIC contains about 1,000 four-digit codes. It is reviewed and revised periodically to reflect the everchanging job structure of the national economy.

On February 22, 1984, the Office of Management and Budget (OMB) published a *Federal Register* notice of intent to revise the Standard Industrial Classification for 1987. In response, individuals from the Bureau of Labor Statistics, along with representatives from businesses, trade associations, and other federal, state, and local government agencies submitted proposals for over 1,100 individual changes.

To provide technical advice for the 1987 SIC revision, and to make recommendations on the individual proposals, OMB established a multi-agency Technical Committee on Industrial Classification. The committee consisted of economists, statisticians, and classification specialists representing federal agencies that use the SIC. To aid in its review, a subcommittee was established for construction, manufacturing, trade (wholesale and retail), communications, transportation and public utilities, finance, insurance, and real estate, services and computers. Each of the proposed changes was evaluated with approximately 40 percent recommended for acceptance and inclusion in the revised SIC.

The 1987 SIC revision has taken into account technological changes, institutional changes such as deregulation in the banking, communications, and transportation industries, and the tremendous expansion in the service sector. In addition, changes have been made to improve industrial detail, coverage, and definitions, and to clarify classification concepts and the classification of individual activities.

The revision has resulted in a net increase of 19 industries for services, eight for wholesale trade, and seven for manufacturing, with a net decrease of 34 for the other SIC divisions. Deleted industries were merged into other industries and new industries were created by subdividing or restructuring existing industries. Various industries have also been changed by transfers of individual activities, primarily to increase the accuracy, consistency, and usefulness of the classifications. A few industries were renumbered without any changes in content as a consequence of restructuring the classification at the three-digit level.

In New York State, the conversion affected over 450,000 establishments. Of these, nearly 70,000 were classified in 1972 SIC codes which "split" into one or two or more 1987 codes. This required the Department of Labor to contact each of these firms to precisely determine the nature of their business. An initial mailing was conducted in December 1987, with follow-ups in February and April 1988. As a result of this, and the straight conversion of the remainder of the industries affected, the conversion project was completed as scheduled.

Several noteworthy classification changes resulting from the 1987 industry conversion are in the nonmanufacturing category and include:

- **The sale of used automobile accessories, parts, and trim, classified in miscellaneous retail trade in 1972 is now included in wholesale trade.**

---

[1] **Includes excerpts from the *Standard Industrial Classification Manual, 1987* and *Statistical Reports: Information on Standard Industrial Classification Codes.***

- Legal advice or service concerning estate planning went from the finance, insurance, and real estate group to services.

Additionally, rapid growth in the area of visiting nurses and home health care resulted in the creation of a new code specifically indentifying establishments engaged in those activities. Under the 1987 classification, home health care firms and visiting nurse associations are classified in industry 8082, home health care services, and will no longer be included in industry 8091, health and allied services, not elsewhere classified.

In the manufacturing sector, the miscellaneous plastics products manufacturing industry (industry 3079) was eliminated and replaced by the creation of specific industry codes to detail activities previously in that group. Under the 1987 classification, establishments previously classified in industry 3079 are now classified in:

- 3081 Unsupported plastics film and sheets
- 3082 Unsupported plastics profile shapes
- 3083 Laminated plastics plate and sheet
- 3084 Plastics pipe
- 3085 Plastics bottles
- 3086 Plastics foam products
- 3087 Custom compounded purchased resins
- 3088 Plastics plumbing fixtures
- 3089 Plastics products, NEC
- 3432 (Part) Plumbing fixture fittings and trim

The changes brought about by the adoption of the 1987 Manual are reflected in the figures for insured employment and payrolls for the first quarter of 1988 in this issue of the *Employment Review*. Nonagricultural employment will reflect the 1987 Manual effective with January 1990 data.

Specific information and definitions of the various 1987 industry classifications can be found in the *Standard Industrial Classification Manual, 1987* developed by the Executive Office of the President, Office of Management and Budget. □

INSURED EMPLOYMENT AND PAYROLLS
FIRST QUARTER 1988

INSURED COVERAGE. Under the New York State Unemployment Insurance Law as a result of an amendment effective January 1960, an employer of individuals other than household workers becomes liable for the unemployment insurance tax if within a single calendar quarter he pays remuneration of $300 or more. As a result of an amendment effective January 1966, an employer who employs one or more household workers and pays them cash remuneration of $500 or more within a single calendar quarter becomes liable for the tax. In effect, employers of one or more workers become liable for the unemployment insurance tax on the first day of the calendar quarter in which remuneration is paid.

Most persons employed by nonprofit organizations were covered by unemployment insurance beginning January 1, 1971 as a result of "stand-by" legislation originally enacted in 1965 which became operative because of the federal amendments of 1970.

A nonprofit organization becomes liable when it makes cash payments to its employees of $1,000 or more in a calendar quarter. Effective January 1, 1972, liability also begins if the nonprofit organization employs four or more persons on each of 20 days in at least 20 different weeks during the current or preceding calendar year.

Effective January 1, 1978, the services of persons engaged in a teaching or other professional capacity at a nonprofit educational institution below the college level were covered by unemployment insurance.

Agricultural labor was also covered as of January 1, 1978. Exceptions exist for employers of fewer than 10 persons or those with a quarterly payroll of less than $20,000.

Effective with first quarter 1985 data, employees of the federal government, New York State, and local government units covered for unemployment compensation purposes are included in this series.

Certain groups continue to be excluded from coverage. Those excluded are interstate railroads, the self-employed, services of an individual employer's wife, husband or minor child and certain other small groups of workers.

Insured employment data are not intended to reflect a continuous series over the years. The data only represent experience within a specific calendar period. Significant factors which affect comparability are changes in the coverage provisions of the law, such as those mentioned above, as well as employment reclassification changes. The reclassification changes are occasioned by industrial and/or geographic classification code changes. They may be economic or noneconomic. Economic code changes are made in the quarter when the product or business activity of an establishment has changes (industry code) or whenever an employer moves from one location to another in New York State (geographic code). Noneconomic code changes are made effective in the first quarter of each year. Noneconomic code changes arise from (1) structural changes in the *Standard Industrial Classification Manual*, and (2) newly disclosed information affecting either the industrial or geographic location.

REPORTING UNIT. An establishment, or reporting unit, is usually a single place of business, engaged in a single business activity, and operated by a single employer. Business firms operating more than one establishment, in different counties, or different activities in one or more counties, usually submit a separate report for each unit unless the payrolls are not maintained separately. However, if an employer operates two or more establishments in a single county that are engaged in the same business activity, the establishments usually are reported together as a single unit. If two

or more units of a single employer are in a single physical location but maintain separate payroll records and engage in distinct or separate business activities, then each unit is treated as a separate reporting unit.

EMPLOYMENT. The tables in this report include all employment covered under the New York State Unemployment Insurance Law for each of the three months in the quarter. The employment count represents the number of full-time and part-time employees earnings wages or salaries for the payroll period including the 12th of the month. Included are persons on paid vacations and on paid sick leave. Workers temporarily earning no wages because of labor-management disputes, layoffs or other reasons are not reported as employed. Persons on the payroll of more than one establishment during the same reference week are reported more than once.

TOTAL QUARTERLY PAYROLLS. Total quarterly payrolls cover all wages and salaries paid to individuals in insured employment.

INDUSTRIAL CLASSIFICATION. Data are classified in accordance with the 1987 edition of the *Standard Industrial Classification Manual* prepared by the U.S. Office of Management and Budget. This edition replaces the 1972 edition.

When a 2-digit manufacturing industry has less than 100 employees or less than three reporting units, figures are combined in "all other durable goods" or "all other nondurable goods."

The category "all other" includes agriculture, forestry and fisheries, mining and unclassified establishments.

COUNTY CLASSIFICATION. County classification of employment and payroll data is based on the physical location of the establishment. The category "statewide" which appears at the end of the county listing covers all reporting units not classified by county. Included in this category are: reporting units without a fixed location within the state, those with a significant number of employees in more than one county for which separate data are not available, and those for which county location has not yet been determined.

LABOR AREA. A major labor area is a defined geographical section of New York State in which there is a major concentration of employment and economic activity. For purpose of labor statistics, a labor area includes a whole county or counties even though the economic activity may be centered in a segment of the whole. The composition of the major labor areas (which differ from the administrative jurisdictions of the unemployment insurance and employment service program) is given below:

-- *Albany-Schenectady-Troy*. Albany, Montgomery, Greene, Rensselaer, Saratoga and Schenectady counties.
-- *Binghamton*. Broome and Tioga counties.
-- *Buffalo*. Erie and Niagara counties.
-- *Nassau-Suffolk*. Nassau and Suffolk counties.
-- *New York City*. Bronx, Kings, New York, Queens and Richmond counties.
-- *Rochester*. Livingston, Monroe, Ontario, Orleans and Wayne counties.
-- *Syracuse*. Madison, Onondaga and Oswego counties.
-- *Utica-Rome*. Herkimer and Oneida counties.
-- *Westchester*. Westchester County.

SOURCE OF DATA. Reports submitted quarterly by employers subject to the New York State Unemployment Insurance Law.

INSURED EMPLOYMENT IN SELECTED COUNTIES WITH EMPLOYMENT OF 100,000 OR MORE
FIRST QUARTER 1988

Data for 9 of the 10 counties in New York State in which average insured employment exceeds 100,000 or more are presented in the following tables. Westchester County is not included in this section as the industry detail for this county was shown in Table 4 in the preceding tables.

In order to safeguard the confidential nature of individual employer reports, data on some industries in some counties were consolidated into statistically valid groupings.

EXPLANATION OF DATA

EMPLOYED AND UNEMPLOYED

Employed and Unemployed. Employment and unemployment estimates prepared by the New York State Department of Labor are developed under a cooperative federal-state program administered by the Bureau of Labor Statistics (BLS) of the U.S. Department of Labor. The Current Population Survey (CPS)--the official survey instrument for measuring labor force attachment in the United States--is a monthly survey of about 54,000 households conducted throughout the nation by trained interviewers. Employment and unemployment data for New York State and New York City are based directly on responses of households within the state and city which are represented in the CPS sample.

The size of the CPS sample is not sufficient to provide reliable estimates for labor areas in the "balance of state" (state less New York City). In these areas, a series of factors are applied to administrative statistics from state unemployment insurance (UI) operations and to payroll statistics from establishment surveys to provide data on resident employment and unemployment. Data for these labor areas are adjusted so they add to "balance of state" totals.

These revised procedures, which were put into effect in January 1978, are designed to make the estimates more comparable from state to state and to incorporate more current data in the estimating process.

Employed. Employed persons are all those who during the week including the 12th of the month, (a) did any work at all as paid employees or in their own business or profession, or farm or who worked 15 hours or more as unpaid workers in an enterprise operated by a member of the family, or (b) did not work but who had jobs or businesses from which they were temporarily absent because of illness, bad weather, vacation, labor-management dispute, or personal reasons, whether or not they were paid by their employers for the time off, and whether or not they were seeking other jobs. Each employed person is counted only once.

Unemployed. Unemployed persons are all those persons who did not work during the week including the 12th of the month, who made specific efforts to find a job within the past four weeks, and who were available for work during the week except for temporary illness. Also included as unemployed are those who did not work at all, were available for work, and (a) were waiting to be called back to a job from which they had been laid off, or (b) were waiting to report to a new wage or salary job with 30 days.

Civilian Labor Force. The civilian labor force comprises all civilians classified as employed or unemployed in accordance with the criteria described above. The civilian labor force participation rate is the ratio of the civilian labor force to the civilian noninstitutional population.

Rate of Unemployment. The rate is the total number of unemployed persons expressed as a percentage of the employed and unemployed, i.e., as a percentage of the civilian labor force.

Not in the Labor Force. Not in the labor force includes all persons 16 years of age or older who are not classified as employed or unemployed.

NONAGRICULTURAL EMPLOYMENT, HOURS AND EARNINGS

Benchmark. Represents a comprehensive count of employment for the various nonagricultural industries as of the first quarter of each year. The primary source of benchmark information is employment data received from establishments covered by the New York State Unemployment

INDUSTRIAL CLASSIFICATION

Data are classified in accordance with the 1972 edition of the *Standard Industrial Classification (SIC) Manual* prepared by the U.S. Office of Management and Budget. Coverage of the classification *services and miscellaneous* varies geographically. For New York State and New York City, this classification includes: the services industry division; forestry, fisheries and selected services relating to agriculture; and nonclassifiable establishments. For space requirements on the statistical tables, the formal SIC title for most of the industry groups have been replaced by the short SIC title as contained in Appendix B of the 1972 edition of the *SIC Manual-List of short SIC titles*. SIC titles used for groupings of two or more two-digit manufacturing industries reflect, to the extent possible, the respective components.

MISCELLANEOUS EXPLANATIONS

Effect of rounding. Detail figures may not add to total because of rounding.

Revisions. Revised figures are preceded by an "r" when first published.

KEY

Blank or-	Series not available due to inadequate sample size or other technical reasons.
n.a.	Data not available at date of publication.
n.c.	Not comparable with current data due to a break in series.
d	Figures withheld to avoid disclosure of data of individual reporting units.
*	Less than 0.05 percent.
r	Revised.

OTHER RECURRENT REPORTS

1. **Employment Trends.** Monthly for New York State. Highlights current developments in employment and unemployment.

2. **Labor Area Summary.** A monthly report which covers the 11 major labor areas of the state.

3. **Annual Labor Area Report.** Economic developments and outlook, population and labor force characteristics and trends, employment developments and outlook by industry and occupation, trends in employment and unemployment. Fiscal year reports are available for the state, selected major labor areas and New York City.

4. **Unemployment Insurance Tax Rates.** Annual. Rates by industry and size of firm and effects of factors that entered into determination of rates.

5. **Occupational Employment Statistics.** Series of individual triennial reports analyzing and detailing occupational patterns by industry sector: manufacturing, selected nonmanufacturing, wholesale and retail trade, regulated industries, and federal, state and local government.

6. **Occupational Needs, New York State, 1989-1991.** Projects the demand for workers in various jobs. The report is based on occupational employment statistics surveys which examine occupational distributions on a three-year cycle. The surveys involve a statistical sample of industries throughout the state to obtain their occupational staffing patterns.

7. **Collective Bargaining Settlements in New York State.** Quarterly. Summarizes changes in collective bargaining agreements covering wages that affect 250 or more workers. Covers wages and fringe benefits for agreements that affect 1,000 or more workers.

8. **Calendar of Collective Bargaining, New York State, 1988.** This report lists all agreements covering 500 or more workers known to the Division of Research that expire or are subject to a wage reopening in 1988. The report is organized by month of expiration or reopening and, within each month, by industry.

9. **Statistics on Work Stoppages, New York State.** Annual. Data on the number of strikes, the number of workers involved and man-days idle; describes major work stoppages.

10. **Work Stoppages in New York State.** Monthly. Listing gives parties, number of workers directly affected, locations and dates.

11. **Consumer Price Index, Selected Areas and Population Groups.** This bimonthly report presents tabular material on the Consumer Price Index for the United States, New York City SMSA, Buffalo SMSA, and by selected urban population size class. Data are presented for all urban consumers, and wage earners and clerical workers.

SPECIAL REPORTS

Special Reports 14, 15, 18 and/or 19 may be obtained by sending acheck or money order, payable to the New York State Department of Labor, to the Publications Unit.

12. **Occupational Brief.** Occupational briefs are available for: *Computer Programmer, Cosmetologist, General Duty (Registered) Nurse, Licensed Practical Nurse, Occupational Therapist and Assistant, Physical Therapist and Assistant, and Home Care Aide.* The booklets, intended primarily for use by youth and counselors, include typical job duties performed, earnings expected, typical hours and days worked, working conditions, educational requirements, job locations, opportunities for advancement, employment outlook, and other related information.

13. **Affirmative Action Data, Total, Female and Minority Population: 1980.** This booklet provides data from the 1980 Census for New York State, standard metropolitan statistical areas (SMSA's), counties, and subdivisions with population of 25,000 or more, for use in preparing or assessing affirmative actions plans. Tables show total population, and populations of females and minorities, with distributions by race and Hispanic origin. March 1982.

14. **High-Technology Industries in New York State.** Acting on a commission from the NYS Science and Technology Foundation, the Battelle Corporation identified 52 high-technology industries which are both desirable and feasible for New York State. The industries in which New York has the best competitive position are the subject of this report. The report includes information on employment and wages in these 52 industries, detailed by four-digit-SIC industry code and by area. Where possible, comparisons have been made with high-technology industries nationwide. April 1983. Price $5.00.

15. **Occupations in High-Technology Industries in New York State.** This report contains information on the occupations found in 52 high-technology industries selected for their potential for long-term growth in the state; it complements *High-Technology Industries in New York State.* The report includes sections covering occupational staffing patterns, significant occupations, apprenticeship occupations, assemblers, educational requirements, occupational supply and demand, and occupational outlook. July 1983. Price $5.00

16. **Total and Civilian Labor Force Summary, Selected Demographic Groups, New York State, Counties, and SMSA's, 1980.** This booklet contains labor force data from the 1980 Census for New York State, its standard metropolitan statistical areas, counties, and New York City, for use in developing and assessing affirmative action plans. Tables include: total and civilian labor force; employment, unemployment, and the unemployment rate for all persons 16 years of age and older and for females, blacks, American Indians, Eskimos, and Aleuts, Asians and Pacific Islanders, and persons of Hispanic origin. Percent distributions are also shown. March 1983.

17. **Civilian Labor Force by Occupation, Selected Demographic Groups, 1980.** These tables, which contain data from the 1980 Census, can be used in developing and assessing affirmative action plans. They show civilian labor force data by occupation for persons aged 16 and over. Data are also included for females, minorities, Hispanics, blacks, and other races. Tables are available for New York State, Standard Metropolitan Statistical Areas, and counties. February 1984.

Insurance Law. Benchmark data for the remainder are obtained from the records of other private and governmental agencies. Employment estimates for the latest benchmark year and for the previous year are normally subject to revision annually. Current estimates are based on the March 1988 benchmark level for each industry.

Hours and earnings data are analyzed each year to maintain continuity of series.

Earnings, Average. For manufacturing, the averages cover production and related workers only. For the remaining industries, averages cover all nonsupervisory employees and working supervisors unless otherwise specified.

--**Earnings, Average Hourly.** Represents payrolls divided by total number of hours worked or paid for (including paid holiday, vacation, sick leave hours) during period reported. Total payroll includes both straight-time and premium pay. The averages are influenced by the amount of premium pay, as well as by changes in composition of labor force, changes in wage rates, upgrading of employees, etc., and consequently should not be interpreted as wage rates.

--**Earnings, Average Weekly.** Derived by multiplying average weekly hours by average hourly earnings. Includes premium wages for overtime and night shift work and payments made on piecework or incentive basis. The averages are affected by changes in length of workweek, part-time work, stoppages for varying causes, labor turnover, and absenteeism.

Employment, Nonfarm. Estimates include all nonfarm wage and salary workers who received pay for any part of the pay period including the 12th of the month. Persons on paid sick leave, paid holiday or paid vacation are included, but those on leave without pay for the entire payroll period are excluded. Persons on the payroll of more than one establishment during the period are counted each time reported. Self-employed persons, unpaid family workers, and domestics are excluded.

Historical Continuity. Historical continuity of statistics of average hours and earnings of manufacturing production workers has been interrupted for a number of industry groups because of changes in the composition of reporting samples or changes in the relative weight of individual industries in group totals. The starting month of a revised series is identified in a footnote in the issue in which the revision is introduced. Some series have been discontinued pending improvement in the reporting samples.

Hours, Average Weekly. See *Earnings, Average* for description of workers covered. The averages represent total number of hours worked (including overtime) or paid for (including paid holiday, vacation, and sick leave hours) during week divided by number of employees. The averages are affected by amount of labor turnover during week, changes in amount of overtime hours, and by changes in ratio of full-time or part-time eployment.

--**Hours, Average Weekly Overtime.** Represents total number of overtime hours worked by production workers during the week divided by total number of production workers. Overtime hours include those for which premiums were paid because those hours were in excess of the number of hours of either the straight-time workday or the workweek. Hours worked on Saturday, Sunday or holidays are included only if premium wage rates were paid.

Nonagricultural Establishments. All employing units except commercial and noncommercial farms, international government and private households.

Production Workers. Includes working foremen and all nonsupervisory workers (including leadmen and trainees) engaged in fabricating, processing, assembling, inspection, receiving, storage, handling, packing, warehousing, shipping, maintenance, repair, janitorial and watchman services, product development, auxiliary production for plant's own use (e.g., power plant), and in record-

keeping and other services closely associated with the above production operations. Excludes supervisory employees (above the working foremen level) and their clerical staffs, routemen, salesmen and force-account construction workers.

Reference Week of the Month. Employment, payrolls, hours, and earnings data are based on reports from firms covering a pay period, usually the week, including the 12th of the month.

METROPOLITAN STATISTICAL AREA

A metropolitan statistical area (MSA) is defined according to a set of detailed standards prepared by the Federal Committee on MSAs. Under these standards, which were revised in 1980, areas are designated as an MSA in one of two ways: If there is a city of at least 50,000 population, or an urbanized area of at least 50,000 with a total metropolitan population of at least 100,000. In New York State, MSAs are defined in terms of entire counties. In addition to the county containing the main city, an MSA also includes additional counties having strong economic and social ties to the central county.

Most MSA definitions are not subject to change until after the next national census. However, supplemental announcements of a few new MSAs may be issued in the spring of each year, generally because additional cities have reached the 50,000 level according to official population estimates.

If an area has more than 1 million population and meets certain other specified requirements, it will now be termed a Consolidated Metropolitan Statistical Area (CMSA), consisting of major components recognized as Primary Metropolitan Statistical Areas (PMSAs).

A number of areas in the state do not meet the criteria for recognition as an MSA but estimates are published for them. These areas are called Labor Market Areas (LMAs).

The geographic compostion of the areas (which differ from the administrative jurisdictions of the unemployment insurance and job service program) is given below.

Albany-Schenectady-Troy MSA. Albany, Montgomery, Greene, Rensselaer, Saratoga and Schenectady counties.
Binghamton MSA. Broome and Tioga counties.
Buffalo-Niagara Falls CMSA. Erie and Niagara counties.
Buffalo PMSA. Erie County.
Elmira MSA. Chemung County.
Nassau-Suffolk PMSA. Nassau and Suffolk counties.
New York City. Bronx, Kings, New York, Queens and Richmond counties.
New York Combined Area. Bronx, Kings, Nassau, New York, Queens, Richmond, Putnam, Rockland, Suffolk and Westchester counties.
New York PMSA. New York City and Putnam, Rockland and Westchester counties.
Niagara Falls PMSA. Niagara County.
Orange County PMSA. Orange County.
Poughkeepsie MSA. Dutchess County.
Rochester MSA. Livingston, Monroe, Ontario, Orleans and Wayne Counties.
Rockland LMA. Rockland County.
Syracuse MSA. Madison, Onondaga and Oswego counties.
Utica-Rome MSA. Herkimer and Oneida counties.
Westchester LMA. Westchester County.

18. **The Jobseeker.** A 106-page guide designed primarily to assist young people entering the job market. Contains sections on the explanation of the job market/labor force, kinds of employers, kinds of occupations, how to choose an occupation, chances of finding a job, what to do to find a job, how to prepare a resume, how to complete an employment application, how to do well at a job interview. Also contains occupational profiles on 133 occupations of interest to youth, with information on each regarding: number of employed, where found, job outlook, education needed, personal characteristics, and earnings. (First copy is free. Additional copies are available at 50 cents per copy.) February 1986.

19. **Occupations Licensed or Certified by New York State.** This publication contains licensing requirements for 65 occupations (training, tests and fees) as well as information on employment outlook, earnings, and working conditions for these occupations. The report also includes a list of apprenticable occupations. May 1987. Price $10.00.

B-PUBLICATIONS

235. **A History of Unemployment Insurance Legislation in the United States and New York State, 1935-1983.** A report on the background of the unemployment insurance system and changes in federal and state legislation from 1935 to 1983.

SPECIAL BULLETINS

Special Bulletins may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Office of Communications, New York State Department of Labor, W. Averell Harriman State Office Building Campus, Albany, New York 12240.

254. **Directory of Labor Unions and Employee Organizations in New York State, 1987-88.** This edition lists names and addresses of principal or executive officers of over 5,000 local, state and national or international employee organizations representing workers in New York State. Both public employee and private industry unions are included in the directory. Price $10.00.

LABOR RESEARCH REPORTS

88-4. **Occupational Injuries and Illnesses Survey, State and Local Government, New York State, 1987.** An annual survey by the Labor Department of work-related fatalities, injuries and illnesses in the public sector. The survey is required by the New York Public Employee Safety and Health Act of 1980.

88-5. **Unemployment Insurance Beneficiaries in New York State, Benefit Year Ending in 1986.** Describes personal characteristics, work background, and benefit experience of unemployed workers who drew benefits in 1985.

MONTH IN REVIEW
March 1989

Civilian Labor Force

The state unemployment rate declined significantly in March 1989, down 0.9 of a percentage point from February to 4.6 percent. The number of unemployed persons was substantially. Although up 0.3 of a percentage point over the year from 4.3 percent, the unemployment rate was the third lowest rate on record for March. (The historical series began in January 1970.)

Resident employment was down 53,000 from February to 8,099,000 in March 1989. Compared with a year ago, the current employment level was higher by 23,000.

Total unemployment decreased 81,000 over the month to 392,000 in March 1989, but was 29,000 higher than a year ago.

Nonfarm Employment

Nonagricultural employment (which excludes agricultural workers, the self-employed, unpaid family workers and domestic workers in private households) increased 48,300 from February 1989 to 8,183,000 in March, a record-high for the month. Strike activity in the air transportation industry and weak employment growth in the trade and finance, insurance and real estate groups dampened the nonfarm upturn. Since March 1988, the number of jobs on the state's nonfarm payrolls has grown 80,600 or 1.0 percent. March 1989 marked the first month since August 1983 that over-the-year job gains were less than 100,000.

Over 60 percent of the nonagricultural job gain occurred in government and trade--with government at an all-time high job level and trade at a high for the month of March. The largest portion of the 9,200 expansion in public employment occurred in local education where community colleges recalled employees following the break between semesters. Although trade employment was at a high for March, the February-March job increase (+9,900) was moderate with most of the gain among restaurants. Seasonal pickups in services (+21,300) and construction (+6,600) resulted in record-high levels for March in these divisions. Hiring in business, recreational and health services paced the rise in services jobs. The gain in construction jobs was somewhat below normal for this time of year due to below normal growth in residential and commercial building activity.

Employment in the manufacturing (+2,400) and finance, insurance and real estate (+1,100) groups was up slightly over the month, but down over the year (-12,700 and -2,500, respectively). The March gain in factory jobs was centered in the apparel industry. The seasonal real estate industry provided nearly all of the lift in finance, insurance and real estate jobs. Employment in the security industry continued to decline (down by 1,000 in March). Since the October 1987 crash, employment has declined 13,600 in the security industry and 8,100 in the banking industry.

The transportation and public utilities group was the only industry division to lose employment over the month (-400). A strike by machinists against a major airline caused the downturn. Hiring in trucking and bus transportation partially offset strike-related job separations.

Durable goods	18.9	19.0	18.4	24.9	24.8	24.6
Nondurable goods	6.5	6.5	5.8	44.5	44.4	44.9

or more units of a single employer are in a single physical location but maintain separate payroll records and engage in distinct or separate business activities, then each unit is treated as a separate reporting unit.

EMPLOYMENT. The tables in this report include all employment covered under the New York State Unemployment Insurance Law for each of the three months in the quarter. The employment count represents the number of full-time and part-time employees earnings wages or salaries for the payroll period including the 12th of the month. Included are persons on paid vacations and on paid sick leave. Workers temporarily earning no wages because of labor-management disputes, layoffs or other reasons are not reported as employed. Persons on the payroll of more than one establishment during the same reference week are reported more than once.

TOTAL QUARTERLY PAYROLLS. Total quarterly payrolls cover all wages and salaries paid to individuals in insured employment.

INDUSTRIAL CLASSIFICATION. Data are classified in accordance with the 1987 edition of the *Standard Industrial Classification Manual* prepared by the U.S. Office of Management and Budget. This edition replaces the 1972 edition.

When a 2-digit manufacturing industry has less than 100 employees or less than three reporting units, figures are combined in "all other durable goods" or "all other nondurable goods."

The category "all other" includes agriculture, forestry and fisheries, mining and unclassified establishments.

COUNTY CLASSIFICATION. County classification of employment and payroll data is based on the physical location of the establishment. The category "statewide" which appears at the end of the county listing covers all reporting units not classified by county. Included in this category are: reporting units without a fixed location within the state, those with a significant number of employees in more than one county for which separate data are not available, and those for which county location has not yet been determined.

LABOR AREA. A major labor area is a defined geographical section of New York State in which there is a major concentration of employment and economic activity. For purpose of labor statistics, a labor area includes a whole county or counties even though the economic activity may be centered in a segment of the whole. The composition of the major labor areas (which differ from the administrative jurisdictions of the unemployment insurance and employment service program) is given below:

-- *Albany-Schenectady-Troy*. Albany, Montgomery, Greene, Rensselaer, Saratoga and Schenectady counties.
-- *Binghamton*. Broome and Tioga counties.
-- *Buffalo*. Erie and Niagara counties.
-- *Nassau-Suffolk*. Nassau and Suffolk counties.
-- *New York City*. Bronx, Kings, New York, Queens and Richmond counties.
-- *Rochester*. Livingston, Monroe, Ontario, Orleans and Wayne counties.
-- *Syracuse*. Madison, Onondaga and Oswego counties.
-- *Utica-Rome*. Herkimer and Oneida counties.
-- *Westchester*. Westchester County.

SOURCE OF DATA. Reports submitted quarterly by employers subject to the New York State Unemployment Insurance Law.

INSURED EMPLOYMENT AND PAYROLLS
SECOND QUARTER 1988

INSURED COVERAGE. Under the New York State Unemployment Insurance Law as a result of an amendment effective January 1960, an employer of individuals other than household workers becomes liable for the unemployment insurance tax if within a single calendar quarter he pays remuneration of $300 or more. As a result of an amendment effective January 1966, an employer who employs one or more household workers and pays them cash remuneration of $500 or more within a single calendar quarter becomes liable for the tax. In effect, employers of one or more workers become liable for the unemployment insurance tax on the first day of the calendar quarter in which remuneration is paid.

Most persons employed by nonprofit organizations were covered by unemployment insurance beginning January 1, 1971 as a result of "stand-by" legislation originally enacted in 1965 which became operative because of the federal amendments of 1970.

A nonprofit organization becomes liable when it makes cash payments to its employees of $1,000 or more in a calendar quarter. Effective January 1, 1972, liability also begins if the nonprofit organization employs four or more persons on each of 20 days in at least 20 different weeks during the current or preceding calendar year.

Effective January 1, 1978, the services of persons engaged in a teaching or other professional capacity at a nonprofit educational institution below the college level were covered by unemployment insurance.

Agricultural labor was also covered as of January 1, 1978. Exceptions exist for employers of fewer than 10 persons or those with a quarterly payroll of less than $20,000.

Effective with first quarter 1985 data, employees of the federal government, New York State, and local government units covered for unemployment compensation purposes are included in this series.

Certain groups continue to be excluded from coverage. Those excluded are interstate railroads, the self-employed, services of an individual employer's wife, husband or minor child and certain other small groups of workers.

Insured employment data are not intended to reflect a continuous series over the years. The data only represent experience within a specific calendar period. Significant factors which affect comparability are changes in the coverage provisions of the law, such as those mentioned above, as well as employment reclassification changes. The reclassification changes are occasioned by industrial and/or geographic classification code changes. They may be economic or noneconomic. Economic code changes are made in the quarter when the product or business activity of an establishment has changes (industry code) or whenever an employer moves from one location to another in New York State (geographic code). Noneconomic code changes are made effective in the first quarter of each year. Noneconomic code changes arise from (1) structural changes in the *Standard Industrial Classification Manual*, and (2) newly disclosed information affecting either the industrial or geographic location.

REPORTING UNIT. An establishment, or reporting unit, is usually a single place of business, engaged in a single business activity, and operated by a single employer. Business firms operating more than one establishment, in different counties, or different activities in one or more counties, usually submit a separate report for each unit unless the payrolls are not maintained separately. However, if an employer operates two or more establishments in a single county that are engaged in the same business activity, the establishments usually are reported together as a single unit. If two

INSURED EMPLOYMENT IN SELECTED COUNTIES WITH EMPLOYMENT OF 100,000 OR MORE
SECOND QUARTER 1988

Data for 9 of the 10 counties in New York State in which average insured employment exceeds 100,000 or more are presented in the following tables. Westchester County is not included in this section as the industry detail for this county was shown in Table 4 in the preceding tables.

In order to safeguard the confidential nature of individual employer reports, data on some industries in some counties were consolidated into statistically valid groupings.

EXPLANATION OF DATA

EMPLOYED AND UNEMPLOYED

Employed and Unemployed. Employment and unemployment estimates prepared by the New York State Department of Labor are developed under a cooperative federal-state program administered by the Bureau of Labor Statistics (BLS) of the U.S. Department of Labor. The Current Population Survey (CPS)--the official survey instrument for measuring labor force attachment in the United States--is a monthly survey of about 54,000 households conducted throughout the nation by trained interviewers. Employment and unemployment data for New York State and New York City are based directly on responses of households within the state and city which are represented in the CPS sample.

The size of the CPS sample is not sufficient to provide reliable estimates for labor areas in the "balance of state" (state less New York City). In these areas, a series of factors are applied to administrative statistics from state unemployment insurance (UI) operations and to payroll statistics from establishment surveys to provide data on resident employment and unemployment. Data for these labor areas are adjusted so they add to "balance of state" totals.

These revised procedures, which were put into effect in January 1978, are designed to make the estimates more comparable from state to state and to incorporate more current data in the estimating process.

Employed. Employed persons are all those who during the week including the 12th of the month, (a) did any work at all as paid employees or in their own business or profession, or farm or who worked 15 hours or more as unpaid workers in an enterprise operated by a member of the family, or (b) did not work but who had jobs or businesses from which they were temporarily absent because of illness, bad weather, vacation, labor-management dispute, or personal reasons, whether or not they were paid by their employers for the time off, and whether or not they were seeking other jobs. Each employed person is counted only once.

Unemployed. Unemployed persons are all those persons who did not work during the week including the 12th of the month, who made specific efforts to find a job within the past four weeks, and who were available for work during the week except for temporary illness. Also included as unemployed are those who did not work at all, were available for work, and (a) were waiting to be called back to a job from which they had been laid off, or (b) were waiting to report to a new wage or salary job with 30 days.

Civilian Labor Force. The civilian labor force comprises all civilians classified as employed or unemployed in accordance with the criteria described above. The civilian labor force participation rate is the ratio of the civilian labor force to the civilian noninstitutional population.

Rate of Unemployment. The rate is the total number of unemployed persons expressed as a percentage of the employed and unemployed, i.e., as a percentage of the civilian labor force.

Not in the Labor Force. Not in the labor force includes all persons 16 years of age or older who are not classified as employed or unemployed.

NONAGRICULTURAL EMPLOYMENT, HOURS AND EARNINGS

Benchmark. Represents a comprehensive count of employment for the various nonagricultural industries as of the first quarter of each year. The primary source of benchmark information is employment data received from establishments covered by the New York State Unemployment

Insurance Law. Benchmark data for the remainder are obtained from the records of other private and governmental agencies. Employment estimates for the latest benchmark year and for the previous year are normally subject to revision annually. Current estimates are based on the March 1988 benchmark level for each industry.

Hours and earnings data are analyzed each year to maintain continuity of series.

Earnings, Average. For manufacturing, the averages cover production and related workers only. For the remaining industries, averages cover all nonsupervisory employees and working supervisors unless otherwise specified.

--**Earnings, Average Hourly.** Represents payrolls divided by total number of hours worked or paid for (including paid holiday, vacation, sick leave hours) during period reported. Total payroll includes both straight-time and premium pay. The averages are influenced by the amount of premium pay, as well as by changes in composition of labor force, changes in wage rates, upgrading of employees, etc., and consequently should not be interpreted as wage rates.

--**Earnings, Average Weekly.** Derived by multiplying average weekly hours by average hourly earnings. Includes premium wages for overtime and night shift work and payments made on piecework or incentive basis. The averages are affected by changes in length of workweek, part-time work, stoppages for varying causes, labor turnover, and absenteeism.

Employment, Nonfarm. Estimates include all nonfarm wage and salary workers who received pay for any part of the pay period including the 12th of the month. Persons on paid sick leave, paid holiday or paid vacation are included, but those on leave without pay for the entire payroll period are excluded. Persons on the payroll of more than one establishment during the period are counted each time reported. Self-employed persons, unpaid family workers, and domestics are excluded.

Historical Continuity. Historical continuity of statistics of average hours and earnings of manufacturing production workers has been interrupted for a number of industry groups because of changes in the composition of reporting samples or changes in the relative weight of individual industries in group totals. The starting month of a revised series is identified in a footnote in the issue in which the revision is introduced. Some series have been discontinued pending improvement in the reporting samples.

Hours, Average Weekly. See *Earnings, Average* for description of workers covered. The averages represent total number of hours worked (including overtime) or paid for (including paid holiday, vacation, and sick leave hours) during week divided by number of employees. The averages are affected by amount of labor turnover during week, changes in amount of overtime hours, and by changes in ratio of full-time or part-time eployment.

--**Hours, Average Weekly Overtime.** Represents total number of overtime hours worked by production workers during the week divided by total number of production workers. Overtime hours include those for which premiums were paid because those hours were in excess of the number of hours of either the straight-time workday or the workweek. Hours worked on Saturday, Sunday or holidays are included only if premium wage rates were paid.

Nonagricultural Establishments. All employing units except commercial and noncommercial farms, international government and private households.

Production Workers. Includes working foremen and all nonsupervisory workers (including leadmen and trainees) engaged in fabricating, processing, assembling, inspection, receiving, storage, handling, packing, warehousing, shipping, maintenance, repair, janitorial and watchman services, product development, auxiliary production for plant's own use (e.g., power plant), and in record-

keeping and other services closely associated with the above production operations. Excludes supervisory employees (above the working foremen level) and their clerical staffs, routemen, salesmen and force-account construction workers.

Reference Week of the Month. Employment, payrolls, hours, and earnings data are based on reports from firms covering a pay period, usually the week, including the 12th of the month.

METROPOLITAN STATISTICAL AREA

A metropolitan statistical area (MSA) is defined according to a set of detailed standards prepared by the Federal Committee on MSAs. Under these standards, which were revised in 1980, areas are designated as an MSA in one of two ways: If there is a city of at least 50,000 population, or an urbanized area of at least 50,000 with a total metropolitan population of at least 100,000. In New York State, MSAs are defined in terms of entire counties. In addition to the county containing the main city, an MSA also includes additional counties having strong economic and social ties to the central county.

Most MSA definitions are not subject to change until after the next national census. However, supplemental announcements of a few new MSAs may be issued in the spring of each year, generally because additional cities have reached the 50,000 level according to official population estimates.

If an area has more than 1 million population and meets certain other specified requirements, it will now be termed a Consolidated Metropolitan Statistical Area (CMSA), consisting of major components recognized as Primary Metropolitan Statistical Areas (PMSAs).

A number of areas in the state do not meet the criteria for recognition as an MSA but estimates are published for them. These areas are called Labor Market Areas (LMAs).

The geographic compostion of the areas (which differ from the administrative jurisdictions of the unemployment insurance and job service program) is given below.

Albany-Schenectady-Troy MSA. Albany, Montgomery, Greene, Rensselaer, Saratoga and Schenectady counties.
Binghamton MSA. Broome and Tioga counties.
Buffalo-Niagara Falls CMSA. Erie and Niagara counties.
Buffalo PMSA. Erie County.
Elmira MSA. Chemung County.
Nassau-Suffolk PMSA. Nassau and Suffolk counties.
New York City. Bronx, Kings, New York, Queens and Richmond counties.
New York Combined Area. Bronx, Kings, Nassau, New York, Queens, Richmond, Putnam, Rockland, Suffolk and Westchester counties.
New York PMSA. New York City and Putnam, Rockland and Westchester counties.
Niagara Falls PMSA. Niagara County.
Orange County PMSA. Orange County.
Poughkeepsie MSA. Dutchess County.
Rochester MSA. Livingston, Monroe, Ontario, Orleans and Wayne Counties.
Rockland LMA. Rockland County.
Syracuse MSA. Madison, Onondaga and Oswego counties.
Utica-Rome MSA. Herkimer and Oneida counties.
Westchester LMA. Westchester County.

INDUSTRIAL CLASSIFICATION

Data are classified in accordance with the 1972 edition of the *Standard Industrial Classification (SIC) Manual* prepared by the U.S. Office of Management and Budget. Coverage of the classification *services and miscellaneous* varies geographically. For New York State and New York City, this classification includes: the services industry division; forestry, fisheries and selected services relating to agriculture; and nonclassifiable establishments. For space requirements on the statistical tables, the formal SIC title for most of the industry groups have been replaced by the short SIC title as contained in Appendix B of the 1972 edition of the *SIC Manual-List of short SIC titles*. SIC titles used for groupings of two or more two-digit manufacturing industries reflect, to the extent possible, the respective components.

MISCELLANEOUS EXPLANATIONS

Effect of rounding. Detail figures may not add to total because of rounding.

Revisions. Revised figures are preceded by an "r" when first published.

KEY

Blank or-	Series not available due to inadequate sample size or other technical reasons.
n.a.	Data not available at date of publication.
n.c.	Not comparable with current data due to a break in series.
d	Figures withheld to avoid disclosure of data of individual reporting units.
*	Less than 0.05 percent.
r	Revised.

OTHER RECURRENT REPORTS

1. **Employment Trends.** Monthly for New York State. Highlights current developments in employment and unemployment.

2. **Labor Area Summary.** A monthly report which covers the 11 major labor areas of the state.

3. **Annual Labor Area Report.** Economic developments and outlook, population and labor force characteristics and trends, employment developments and outlook by industry and occupation, trends in employment and unemployment. Fiscal year reports are available for the state, selected major labor areas and New York City.

4. **Unemployment Insurance Tax Rates.** Annual. Rates by industry and size of firm and effects of factors that entered into determination of rates.

5. **Occupational Employment Statistics.** Series of individual triennial reports analyzing and detailing occupational patterns by industry sector: manufacturing, selected nonmanufacturing, wholesale and retail trade, regulated industries, and federal, state and local government.

6. **Occupational Needs, New York State, 1989-1991.** Projects the demand for workers in various jobs. The report is based on occupational employment statistics surveys which examine occupational distributions on a three-year cycle. The surveys involve a statistical sample of industries throughout the state to obtain their occupational staffing patterns.

7. **Collective Bargaining Settlements in New York State.** Quarterly. Summarizes changes in collective bargaining agreements covering wages that affect 250 or more workers. Covers wages and fringe benefits for agreements that affect 1,000 or more workers.

8. **Calendar of Collective Bargaining, New York State, 1988.** This report lists all agreements covering 500 or more workers known to the Division of Research that expire or are subject to a wage reopening in 1988. The report is organized by month of expiration or reopening and, within each month, by industry.

9. **Statistics on Work Stoppages, New York State.** Annual. Data on the number of strikes, the number of workers involved and man-days idle; describes major work stoppages.

10. **Work Stoppages in New York State.** Monthly. Listing gives parties, number of workers directly affected, locations and dates.

11. **Consumer Price Index, Selected Areas and Population Groups.** This bimonthly report presents tabular material on the Consumer Price Index for the United States, New York City SMSA, Buffalo SMSA, and by selected urban population size class. Data are presented for all urban consumers, and wage earners and clerical workers.

SPECIAL REPORTS

Special Reports 14, 15, 18 and/or 19 may be obtained by sending acheck or money order, payable to the New York State Department of Labor, to the Publications Unit.

12. **Occupational Brief.** Occupational briefs are available for: *Computer Programmer, Cosmetologist, General Duty (Registered) Nurse, Licensed Practical Nurse, Occupational Therapist and Assistant, Physical Therapist and Assistant, and Home Care Aide*. The booklets, intended primarily for use by youth and counselors, include typical job duties performed, earnings expected, typical hours and days worked, working conditions, educational requirements, job locations, opportunities for advancement, employment outlook, and other related information.

13. **Affirmative Action Data, Total, Female and Minority Population: 1980.** This booklet provides data from the 1980 Census for New York State, standard metropolitan statistical areas (SMSA's), counties, and subdivisions with population of 25,000 or more, for use in preparing or assessing affirmative actions plans. Tables show total population, and populations of females and minorities, with distributions by race and Hispanic origin. March 1982.

14. **High-Technology Industries in New York State.** Acting on a commission from the NYS Science and Technology Foundation, the Battelle Corporation identified 52 high-technology industries which are both desirable and feasible for New York State. The industries in which New York has the best competitive position are the subject of this report. The report includes information on employment and wages in these 52 industries, detailed by four-digit-SIC industry code and by area. Where possible, comparisons have been made with high-technology industries nationwide. April 1983. Price $5.00.

15. **Occupations in High-Technology Industries in New York State.** This report contains information on the occupations found in 52 high-technology industries selected for their potential for long-term growth in the state; it complements *High-Technology Industries in New York State*. The report includes sections covering occupational staffing patterns, significant occupations, apprenticeship occupations, assemblers, educational requirements, occupational supply and demand, and occupational outlook. July 1983. Price $5.00

16. **Total and Civilian Labor Force Summary, Selected Demographic Groups, New York State, Counties, and SMSA's, 1980.** This booklet contains labor force data from the 1980 Census for New York State, its standard metropolitan statistical areas, counties, and New York City, for use in developing and assessing affirmative action plans. Tables include: total and civilian labor force; employment, unemployment, and the unemployment rate for all persons 16 years of age and older and for females, blacks, American Indians, Eskimos, and Aleuts, Asians and Pacific Islanders, and persons of Hispanic origin. Percent distributions are also shown. March 1983.

17. **Civilian Labor Force by Occupation, Selected Demographic Groups, 1980.** These tables, which contain data from the 1980 Census, can be used in developing and assessing affirmative action plans. They show civilian labor force data by occupation for persons aged 16 and over. Data are also included for females, minorities, Hispanics, blacks, and other races. Tables are available for New York State, Standard Metropolitan Statistical Areas, and counties. February 1984.

18. **The Jobseeker.** A 106-page guide designed primarily to assist young people entering the job market Contains sections on the explanation of the job market/labor force, kinds of employers, kinds of occupations, how to choose an occupation, chances of finding a job, what to do to find a job, how to prepare a resume, how to complete an employment application, how to do well at a job interview. Also contains occupational profiles on 133 occupations of interest to youth, with information on each regarding: number of employed, where found, job outlook, education needed, personal characteristics, and earnings. (First copy is free. Additional copies are available at 50 cents per copy.) February 1986.

19. **Occupations Licensed or Certified by New York State.** This publication contains licensing requirements for 65 occupations (training, tests and fees) as well as information on employment outlook, earnings, and working conditions for these occupations. The report also includes a list of apprenticable occupations. May 1987. Price $10.00.

B-PUBLICATIONS

235. **A History of Unemployment Insurance Legislation in the United States and New York State, 1935-1983.** A report on the background of the unemployment insurance system and changes in federal and state legislation from 1935 to 1983.

SPECIAL BULLETINS

Special Bulletins may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Office of Communications, New York State Department of Labor, W. Averell Harriman State Office Building Campus, Albany, New York 12240.

254. **Directory of Labor Unions and Employee Organizations in New York State, 1987-88.** This edition lists names and addresses of principal or executive officers of over 5,000 local, state and national or international employee organizations representing workers in New York State. Both public employee and private industry unions are included in the directory. Price $10.00.

LABOR RESEARCH REPORTS

88-4. **Occupational Injuries and Illnesses Survey, State and Local Government, New York State, 1987.** An annual survey by the Labor Department of work-related fatalities, injuries and illnesses in the public sector. The survey is required by the New York Public Employee Safety and Health Act of 1980.

88-5. **Unemployment Insurance Beneficiaries in New York State, Benefit Year Ending in 1986.** Describes personal characteristics, work background, and benefit experience of unemployed workers who drew benefits in 1985.

Job Generation in New York City
Small Firms Versus Large Firms

Jay M. Mooney and William B. Conklin

This article is written in response to comments about a previous article which appeared in the November 1988 issue of the Employment Review. The question raised was how does New York City's ability to generate and retain jobs compare with New York State. A partial answer to the job generation question is provided by an in depth look at insured employment data.

For purposes of analysis, state data has been divided into two areas--New York City and the rest of the state. Firms that had locations in both the city and the rest of the state were separated into a city unit and a rest of state unit. As a result, in contrast with the previous article, there is a higher total unit count (approximately 4,000) and a slightly lower employment per large firm count (approximately 3 jobs per firm).

An initial analysis of the New York City insured employment data[1] for December 1982 and December 1987 (see Table A) shows that employment in private firms with 100 or more employees has increased by 152,897 whereas firms with less than 100 employees has increased by 68,604. The rest of the state has added 259,636 jobs at large firms and 318,436 jobs at small firms. In 1982, New York City's share of statewide insured employment was 47.00 percent. By 1987, this share had declined to 44.71 percent of state employment.

An analysis of the data generated for this article resulted in the conclusion that small firms coming into existence and small firms growing into large firms are the true generators of jobs for both New York City and the rest of the state.

Over the five years ending, in December 1987, new firms in New York City generated 684,499 jobs. In contrast, New York City lost a total of 636,384 jobs from firms that were in existence in 1982 but were out of business in 1987. The rest of the state lost 653,144 jobs, however, this was counterbalanced by 877,846 new jobs. Thus, firms not in existence in 1982 accounted for 22.7 percent of New York City jobs in 1987, and 23.5 percent of jobs in the rest of the state. Firms out of business by 1987 accounted for 22.8 percent of New York City 1982 employment contrasted with 20.7 percent of employment for the rest of the state for 1982. The disparity between the rest of the state and New York City would be modestly greater if employment change due to net firm migration from New York City to the rest of the state were deducted from the base years.

The migration numbers (see Table F) demonstrate that firms change size as they move. On balance, New York City lost employment to the rest of the state.

Table B lists the components of net change for large firms in New York city: those with 100 or more employees. Table C lists the components of net change for small firms in New York City: those with less than 100 employees. Table D lists the components of net change for large firms in the rest of the state, and Table E lists the components of net change for small firms in the rest of the state.

The 78,048 new small firms in New York City added 421,630 jobs, while the 784 new large firms in New York City added 262,869 jobs. New small firms with 26.4 percent of 1987 employment were identified as having a predecessor relationship.[2] This contrasts with new large firms with 38.5 percent of employment identified as having a predecessor relationship. Interestingly, the typical new small firm either in New York City or located in the rest of the state without a predecessor had 4.9 employees in 1987 contrasted with 7.6 employees for the small new firms with a predecessor.

Looking only at firms in existence in 1982 and still in existence in 1987, large firms in New York City had added 40,410 jobs while small firms in New York City had added 76,737 jobs. This contrasts with the 106,692 jobs added by large firms in the rest of the state and the 174,793 jobs added by small firms. Dividing the state into two regions diluted the job generation impact of small firms because the data included firms with locations in both New York City and the rest of the state. Firms with locations in both New York City and the rest of the state generally lost employment by 1987.

---

[1] Includes all private employment covered under the New York State Unemployment Insurance law for December 1982 and Decembers 1987. The employment count represents the number of full-time and part-time employees earnings wages or salaries for the payroll period including the 12th of the month. Included are persons on paid vacation and on paid sick leave. Workers temporarily earning no wage because of labor-management disputes, layoffs or others reasons are not reported as employed. Persons on the payrolls of more than one establishments during the same reference week are reported more than once.

[2] A newly liable employer who takes over the business of a previously liable employer.

For New York City, counting small firms in 1982 which have become large firms in 1987 with the rest of large firms overstates the employment contribution of large firms to New York City. For example, 459 large firms in 1982 had become small firms in 1987 with a net loss of 58,214 jobs while 806 small firms in 1982 had become large firms in 1987 with a net gain of 81,316 jobs.

Table F summarizes the components of 1987 employment change based upon firm size in 1982 with New York City contrasted with the rest of the state. Table F shows that for every net new job generated in New York City, 2.5 net new jobs were generated in the rest of the state.

In summary, it is small firms and small firms growing into large firms that provide the job growth in both New York City and the rest of the state. New York City's problem is that the rate of job loss is modestly higher than the rest of the state while the rate of generation of new jobs is slightly lower.

Table A. Insured Employment Data, New York State, New York City, and Remainder of State
December 1982 and December 1987

Size of firm	December 1982		December 1987	
	Number of firms	Total employment	Number of firms	Total employment
100 or more employees

MONTH IN REVIEW
April 1989

Civilian Labor Force

The household survey sample size in New York State is gradually being restored to its former level (5,000 households) by the U.S. Bureau of Labor Statistics. Until the sample restoration is completed, significant fluctuations in monthly employment and unemployment statistics may continue.

In contrast to the usual seasonal decline for this time of year, New York's unemployment rate increased sharply from 4.6 percent in March to 5.6 percent in April 1989. This year marked only the third time that the unemployment rate increased from March to April. (The historical series began in January 1970.) Furthermore, April 1989 was the first month since October 1984 that the New York State rate exceeded the comparable national rate (5.1 percent). The state unemployment rate was up 2.2 percentage points from a year ago.

The number of employed residents, which declined from March to April during the last three years, increased this year by 67,000 to 8,166,000. Compared with a year ago, resident employment in April 1989 was up 211,000 or 2.7 percent.

Total unemployment rose 88,000 over the month to 480,000 in April 1989 and was up 197,000 from April 1988.

Nonfarm Employment

Nonagricultural employment (which excludes agricultural workers, the self-employed, unpaid family workers and domestic workers in private households) advanced 50,100 from March 1989 to 8,233,100 in April, a record high for the month. Below normal hiring in trade and continued cutbacks in the security and banking industries moderated job growth.

Seasonal hires in services (+22,900) and construction (+18,600) led the nonfarm job gain. Services employment was at an all-time high as nearly all component industries reported higher levels. The rise in construction jobs was somewhat less than usual for April reflecting diminished construction activity in commercial and residential building.

Job gains in both trade and finance, insurance and real estate were minimal for this time of year. Unlike recent years, the job increase in trade (8,100) was virtually confined to restaurants (+8,500). The finance, insurance and real estate division (+1,300) continued to be undermined by cutbacks in the securities and banking industries. Nearly all of the job increase in the division reflected hiring by realtors.

The job levels in the government, and transportation and public utilities divisions showed little change from a month ago. The 1,900 increase in public employment mirrored job gains in local education, primarily in New York City. The gain in transportation and public utilities jobs (+1,500) was concentrated in the trucking and air transportation industries.

The only industry division to lose employment over the month was manufacturing, down 4,700. The largest portion of the downturn occurred in the apparel and printing and publishing industries.

Since April 1988, the number of jobs on the state's nonfarm payrolls has increased 96,500 or 1.2 percent--the slowest over-the-year growth for April since 1983 (0.2 percent). All industry divisions, except manufacturing, were above April job levels, with services accounting for two-thirds of the nonfarm employment growth.

Table B. Components of Net Change of Firms With 100 or More Employees, New York City, December 1982 and December 1987

Component	Effect on employment
In 1982, there were 3,373 firms in business with 100 or more employees	1,579,882
There were 766 firms in 1982 that were out of business by 1987	-237,061
A total of 459 firms that were large in 1982 were small by 1987	-83,441
A total of 13 firms that were large in 1982 and by 1987 moved out of New York City	-4,033
A total of 14 firms that were large in 1982 but small in 1987 moved out of New York City	-3,103
There was a net increase in employment for the 2,121 firms that were large in 1982 and 1987 and remained in New York City	+80,410
There were 784 new large firms in 1987	+262,869
308 of these firms had a predecessor firm	+101,305
476 did not have a predecessor firm	+161,564
A total of 806 firms that were small in 1982 were large in 1987	+131,154
A total of 7 firms that were large in 1982 and 1987 moved into New York City	+3,574
A total of 19 firms that were small in 1982 but large in 1987 moved into New York City	+2,528
In 1987, there were 3,737 firms in business with 100 or more employees	1,732,779

Table C. Components of Net Change of Firms With Less Than 100 Employees
New York City, December 1982 and December 1987

Component	Effect on employment
In 1982, there were 162,239 firms in business with less than 100 employeess	1,216,744
There were 69,369 firms in 1982 that were out of business by 1987	-399,323
A total of 806 firms that were small in 1982 were large by 1987	-49,838
A total of 2,014 firms that were small in 1982 and by 1987 moved out of New York City	-15,869
A total of 17 firms that were small in 1982 but large in 1987 moved out of New York City	-777
There was a net increase in employment for the 90,033 firms that were small in 1982 and 1987 and remained in New York City	+76,737
There were 78,048 new small firms in 1987	+421,630
14,660 of these firms had a predecessor firm	+111,104
6,338 did not have a predecessor firm	+310,526
A total of 459 firms that were large in 1982 were small in 1987	+25,227
A total of 987 firms that were small in 1982 and 1987 moved into New York City	+10,785
A total of 2 firms that were large in 1982 but small in 1987 moved into New York City	32
In 1987, there were 169,529 firms in business with less than 100 employees	1,285,378

Table D. Components of Net Change of Firms with 100 or More Employees
Remainder of State, December 1982 and December 1987

Component	Effect on employment
In 1982, there were 3,705 firms in business with less than 100 employeess	1,780,333
There were 817 firms in 1982 that were out of business by 1987	-256,272
A total of 348 firms that were large in 1982 were small by 1987	-59,625
A total of 7 firms that were large in 1982 and 1987 moved from the remainder of state into New York City	-2,015
A total of 2 firms that were large in 1982 but small in 1987 moved from the remainder of state into New York City	-422
There was a net increase in employment for the 2,531 firms that were large in 1982 and 1987 and stayed in the remainder of state	+106,692
There were 983 new firms in 1987	+301,832
356 of these firms had a predecessor firm	+95,493
627 did not have a predecessor firm	+206,339
A total of 1,052 firms that were small in 1982 were large in 1987	+162,242
A total of 13 firms that were large in 1982 and 1987 moved into remainder of state from New York City	+4,552
A total of 17 firms that were small in 1982 but large in 1987 moved into the remainder of state from New York City	+2,652
In 1987, there were 4,596 firms in business with 100 or more employees	2,039,969

Table E. Components of Net Change of Firms with Less than 100 Employees Remainder of State, December 1982 and December 1987

Component	Effect on employment
In 1982, there were 183,808 firms in business with less than 100 employeess	1,372,477
There were 71,488 firms in 1982 that were out of business by 1987	-396,872
A total of 1,052 firms that were small in 1982 were large by 1987	-66,667
A total of 987 firms that were small in 1982 and 1987 moved from the remainder of state into New York City	-8,104
A total of 19 firms that were small in 1982 but large in 1987 moved from the remainder of state into New York City	-645
There was a net increase in employment for the 110,262 firms that were small in 1982 and 1987 and stayed in the remainder of state	+174,793
There were 103,955 new firms in 1987	+576,014
25,782 of these firms had a predecessor firm	+194,998
78,173 did not have a predecessor firm	+381,016
A total of 348 firms that were large in 1982 were small in 1987	+20,922
A total of 2,014 firms that were small in 1982 and 1987 moved into the remainder of state from New York City	+18,328
A total of 14 firms that were large in 1982 but small in 1987 moved into the remainder of state from New York City	+667
In 1987, there were 216,593 firms in business with less than 100 employees	1,690,913

Table F. Components of Net Change in Employment, New York City and Remainder of State, December 1982 and December 1987

Component	Effect on employment New York City	 Remainder of State
Jobs lost by firms out of business	-636,384	-653,144
Jobs created by firms still in business	+180,249	+338,357
Jobs created by new firms	+684,499	+877,846
Jobs of firms with predecessor	+212,409	+290,491
Jobs of firms without predecessor	+472,090	+587,355
The effect on employment of jobs moving out (December 1982)	-23,782	-11,186
The effect on employment of jobs moving in (December 1987)	+16,919	+26,199
Employment net change	+221,501	+578,072

INSURED EMPLOYMENT AND PAYROLLS
THIRD QUARTER 1988

INSURED COVERAGE. Under the New York State Unemployment Insurance Law as a result of an amendment effective January 1960, an employer of individuals other than household workers becomes liable for the unemployment insurance tax if within a single calendar quarter he pays remuneration of $300 or more. As a result of an amendment effective January 1966, an employer who employs one or more household workers and pays them cash remuneration of $500 or more within a single calendar quarter becomes liable for the tax. In effect, employers of one or more workers become liable for the unemployment insurance tax on the first day of the calendar quarter in which remuneration is paid.

Most persons employed by nonprofit organizations were covered by unemployment insurance beginning January 1, 1971 as a result of "stand-by" legislation originally enacted in 1965 which became operative because of the federal amendments of 1970.

A nonprofit organization becomes liable when it makes cash payments to its employees of $1,000 or more in a calendar quarter. Effective January 1, 1972, liability also begins if the nonprofit organization employs four or more persons on each of 20 days in at least 20 different weeks during the current or preceding calendar year.

Effective January 1, 1978, the services of persons engaged in a teaching or other professional capacity at a nonprofit educational institution below the college level were covered by unemployment insurance.

Agricultural labor was also covered as of January 1, 1978. Exceptions exist for employers of fewer than 10 persons or those with a quarterly payroll of less than $20,000.

Effective with first quarter 1985 data, employees of the federal government, New York State, and local government units covered for unemployment compensation purposes are included in this series.

Certain groups continue to be excluded from coverage. Those excluded are interstate railroads, the self-employed, services of an individual employer's wife, husband or minor child and certain other small groups of workers.

Insured employment data are not intended to reflect a continuous series over the years. The data only represent experience within a specific calendar period. Significant factors which affect comparability are changes in the coverage provisions of the law, such as those mentioned above, as well as employment reclassification changes. The reclassification changes are occasioned by industrial and/or geographic classification code changes. They may be economic or noneconomic. Economic code changes are made in the quarter when the product or business activity of an establishment has changes (industry code) or whenever an employer moves from one location to another in New York State (geographic code). Noneconomic code changes are made effective in the first quarter of each year. Noneconomic code changes arise from (1) structural changes in the *Standard Industrial Classification Manual*, and (2) newly disclosed information affecting either the industrial or geographic location.

REPORTING UNIT. An establishment, or reporting unit, is usually a single place of business, engaged in a single business activity, and operated by a single employer. Business firms operating more than one establishment, in different counties, or different activities in one or more counties, usually submit a separate report for each unit unless the payrolls are not maintained separately. However, if an employer operates two or more establishments in a single county that are engaged in the same business activity, the establishments usually are reported together as a single unit. If two

or more units of a single employer are in a single physical location but maintain separate payroll records and engage in distinct or separate business activities, then each unit is treated as a separate reporting unit.

EMPLOYMENT. The tables in this report include all employment covered under the New York State Unemployment Insurance Law for each of the three months in the quarter. The employment count represents the number of full-time and part-time employees earnings wages or salaries for the payroll period including the 12th of the month. Included are persons on paid vacations and on paid sick leave. Workers temporarily earning no wages because of labor-management disputes, layoffs or other reasons are not reported as employed. Persons on the payroll of more than one establishment during the same reference week are reported more than once.

TOTAL QUARTERLY PAYROLLS. Total quarterly payrolls cover all wages and salaries paid to individuals in insured employment.

INDUSTRIAL CLASSIFICATION. Data are classified in accordance with the 1987 edition of the *Standard Industrial Classification Manual* prepared by the U.S. Office of Management and Budget. This edition replaces the 1972 edition.

When a 2-digit manufacturing industry has less than 100 employees or less than three reporting units, figures are combined in "all other durable goods" or "all other nondurable goods."

The category "all other" includes agriculture, forestry and fisheries, mining and unclassified establishments.

COUNTY CLASSIFICATION. County classification of employment and payroll data is based on the physical location of the establishment. The category "statewide" which appears at the end of the county listing covers all reporting units not classified by county. Included in this category are: reporting units without a fixed location within the state, those with a significant number of employees in more than one county for which separate data are not available, and those for which county location has not yet been determined.

LABOR AREA. A major labor area is a defined geographical section of New York State in which there is a major concentration of employment and economic activity. For purpose of labor statistics, a labor area includes a whole county or counties even though the economic activity may be centered in a segment of the whole. The composition of the major labor areas (which differ from the administrative jurisdictions of the unemployment insurance and employment service program) is given below:

- *Albany-Schenectady-Troy*. Albany, Montgomery, Greene, Rensselaer, Saratoga and Schenectady counties.
- *Binghamton*. Broome and Tioga counties.
- *Buffalo*. Erie and Niagara counties.
- *Nassau-Suffolk*. Nassau and Suffolk counties.
- *New York City*. Bronx, Kings, New York, Queens and Richmond counties.
- *Rochester*. Livingston, Monroe, Ontario, Orleans and Wayne counties.
- *Syracuse*. Madison, Onondaga and Oswego counties.
- *Utica-Rome*. Herkimer and Oneida counties.
- *Westchester*. Westchester County.

SOURCE OF DATA. Reports submitted quarterly by employers subject to the New York State Unemployment Insurance Law.

INSURED EMPLOYMENT IN SELECTED COUNTIES WITH EMPLOYMENT OF 100,000 OR MORE
THIRD QUARTER 1988

Data for 9 of the 10 counties in New York State in which average insured employment exceeds 100,000 or more are presented in the following tables. Westchester County is not included in this section as the industry detail for this county was shown in Table 4 in the preceding tables.

In order to safeguard the confidential nature of individual employer reports, data on some industries in some counties were consolidated into statistically valid groupings.

OTHER RECURRENT REPORTS

1. **Employment Trends.** Monthly for New York State. Highlights current developments in employment and unemployment.

2. **Labor Area Summary.** A monthly report which covers the 11 major labor areas of the state.

3. **Annual Labor Area Report.** Economic developments and outlook, population and labor force characteristics and trends, employment developments and outlook by industry and occupation, trends in employment and unemployment. Fiscal year reports are available for the state, selected major labor areas and New York City.

4. **Unemployment Insurance Tax Rates.** Annual. Rates by industry and size of firm and effects of factors that entered into determination of rates.

5. **Occupational Employment Statistics.** Series of individual triennial reports analyzing and detailing occupational patterns by industry sector: manufacturing, selected nonmanufacturing, wholesale and retail trade, regulated industries, and federal, state and local government.

6. **Occupational Needs, New York State, 1989-1991.** Projects the demand for workers in various jobs. The report is based on occupational employment statistics surveys which examine occupational distributions on a three-year cycle. The surveys involve a statistical sample of industries throughout the state to obtain their occupational staffing patterns.

7. **Collective Bargaining Settlements in New York State.** Quarterly. Summarizes changes in collective bargaining agreements covering wages that affect 250 or more workers. Covers wages and fringe benefits for agreements that affect 1,000 or more workers.

8. **Calendar of Collective Bargaining, New York State, 1988.** This report lists all agreements covering 500 or more workers known to the Division of Research that expire or are subject to a wage reopening in 1988. The report is organized by month of expiration or reopening and, within each month, by industry.

9. **Statistics on Work Stoppages, New York State.** Annual. Data on the number of strikes, the number of workers involved and man-days idle; describes major work stoppages.

10. **Work Stoppages in New York State.** Monthly. Listing gives parties, number of workers directly affected, locations and dates.

11. **Consumer Price Index, Selected Areas and Population Groups.** This bimonthly report presents tabular material on the Consumer Price Index for the United States, New York City SMSA, Buffalo SMSA, and by selected urban population size class. Data are presented for all urban consumers, and wage earners and clerical workers.

SPECIAL REPORTS

Special Reports 14, 15, 18 and/or 19 may be obtained by sending acheck or money order, payable to the New York State Department of Labor, to the Publications Unit.

12. **Occupational Brief.** Occupational briefs are available for: *Computer Programmer, Cosmetologist, General Duty (Registered) Nurse, Licensed Practical Nurse, Occupational Therapist and Assistant, Physical Therapist and Assistant, and Home Care Aide.* The booklets, intended primarily for use by youth and counselors, include typical job duties performed, earnings expected, typical hours and days worked, working conditions, educational requirements, job locations, opportunities for advancement, employment outlook, and other related information.

13. **Affirmative Action Data, Total, Female and Minority Population: 1980.** This booklet provides data from the 1980 Census for New York State, standard metropolitan statistical areas (SMSA's), counties, and subdivisions with population of 25,000 or more, for use in preparing or assessing affirmative actions plans. Tables show total population, and populations of females and minorities, with distributions by race and Hispanic origin. March 1982.

14. **High-Technology Industries in New York State.** Acting on a commission from the NYS Science and Technology Foundation, the Battelle Corporation identified 52 high-technology industries which are both desirable and feasible for New York State. The industries in which New York has the best competitive position are the subject of this report. The report includes information on employment and wages in these 52 industries, detailed by four-digit-SIC industry code and by area. Where possible, comparisons have been made with high-technology industries nationwide. April 1983. Price $5.00.

15. **Occupations in High-Technology Industries in New York State.** This report contains information on the occupations found in 52 high-technology industries selected for their potential for long-term growth in the state; it complements *High-Technology Industries in New York State.* The report includes sections covering occupational staffing patterns, significant occupations, apprenticeship occupations, assemblers, educational requirements, occupational supply and demand, and occupational outlook. July 1983. Price $5.00

16. **Total and Civilian Labor Force Summary, Selected Demographic Groups, New York State, Counties, and SMSA's, 1980.** This booklet contains labor force data from the 1980 Census for New York State, its standard metropolitan statistical areas, counties, and New York City, for use in developing and assessing affirmative action plans. Tables include: total and civilian labor force; employment, unemployment, and the unemployment rate for all persons 16 years of age and older and for females, blacks, American Indians, Eskimos, and Aleuts, Asians and Pacific Islanders, and persons of Hispanic origin. Percent distributions are also shown. March 1983.

17. **Civilian Labor Force by Occupation, Selected Demographic Groups, 1980.** These tables, which contain data from the 1980 Census, can be used in developing and assessing affirmative action plans. They show civilian labor force data by occupation for persons aged 16 and over. Data are also included for females, minorities, Hispanics, blacks, and other races. Tables are available for New York State, Standard Metropolitan Statistical Areas, and counties. February 1984.

keeping and other services closely associated with the above production operations. Excludes supervisory employees (above the working foremen level) and their clerical staffs, routemen, salesmen and force-account construction workers.

Reference Week of the Month. Employment, payrolls, hours, and earnings data are based on reports from firms covering a pay period, usually the week, including the 12th of the month.

METROPOLITAN STATISTICAL AREA

A metropolitan statistical area (MSA) is defined according to a set of detailed standards prepared by the Federal Committee on MSAs. Under these standards, which were revised in 1980, areas are designated as an MSA in one of two ways: If there is a city of at least 50,000 population, or an urbanized area of at least 50,000 with a total metropolitan population of at least 100,000. In New York State, MSAs are defined in terms of entire counties. In addition to the county containing the main city, an MSA also includes additional counties having strong economic and social ties to the central county.

Most MSA definitions are not subject to change until after the next national census. However, supplemental announcements of a few new MSAs may be issued in the spring of each year, generally because additional cities have reached the 50,000 level according to official population estimates.

If an area has more than 1 million population and meets certain other specified requirements, it will now be termed a Consolidated Metropolitan Statistical Area (CMSA), consisting of major components recognized as Primary Metropolitan Statistical Areas (PMSAs).

A number of areas in the state do not meet the criteria for recognition as an MSA but estimates are published for them. These areas are called Labor Market Areas (LMAs).

The geographic compostion of the areas (which differ from the administrative jurisdictions of the unemployment insurance and job service program) is given below.

Albany-Schenectady-Troy MSA. Albany, Montgomery, Greene, Rensselaer, Saratoga and Schenectady counties.
Binghamton MSA. Broome and Tioga counties.
Buffalo-Niagara Falls CMSA. Erie and Niagara counties.
Buffalo PMSA. Erie County.
Elmira MSA. Chemung County.
Nassau-Suffolk PMSA. Nassau and Suffolk counties.
New York City. Bronx, Kings, New York, Queens and Richmond counties.
New York Combined Area. Bronx, Kings, Nassau, New York, Queens, Richmond, Putnam, Rockland, Suffolk and Westchester counties.
New York PMSA. New York City and Putnam, Rockland and Westchester counties.
Niagara Falls PMSA. Niagara County.
Orange County PMSA. Orange County.
Poughkeepsie MSA. Dutchess County.
Rochester MSA. Livingston, Monroe, Ontario, Orleans and Wayne Counties.
Rockland LMA. Rockland County.
Syracuse MSA. Madison, Onondaga and Oswego counties.
Utica-Rome MSA. Herkimer and Oneida counties.
Westchester LMA. Westchester County.

INDUSTRIAL CLASSIFICATION

Data are classified in accordance with the 1972 edition of the *Standard Industrial Classification (SIC) Manual* prepared by the U.S. Office of Management and Budget. Coverage of the classification *services and miscellaneous* varies geographically. For New York State and New York City, this classification includes: the services industry division; forestry, fisheries and selected services relating to agriculture; and nonclassifiable establishments. For space requirements on the statistical tables, the formal SIC title for most of the industry groups have been replaced by the short SIC title as contained in Appendix B of the 1972 edition of the *SIC Manual-List of short SIC titles*. SIC titles used for groupings of two or more two-digit manufacturing industries reflect, to the extent possible, the respective components.

MISCELLANEOUS EXPLANATIONS

Effect of rounding. Detail figures may not add to total because of rounding.

Revisions. Revised figures are preceded by an "r" when first published.

KEY

Blank or-	Series not available due to inadequate sample size or other technical reasons.
n.a.	Data not available at date of publication.
n.c.	Not comparable with current data due to a break in series.
d	Figures withheld to avoid disclosure of data of individual reporting units.
*	Less than 0.05 percent.
r	Revised.

18. **The Jobseeker.** A 106-page guide designed primarily to assist young people entering the job market. Contains sections on the explanation of the job market/labor force, kinds of employers, kinds of occupations, how to choose an occupation, chances of finding a job, what to do to find a job, how to prepare a resume, how to complete an employment application, how to do well at a job interview. Also contains occupational profiles on 133 occupations of interest to youth, with information on each regarding: number of employed, where found, job outlook, education needed, personal characteristics, and earnings. (First copy is free. Additional copies are available at 50 cents per copy.) February 1986.

19. **Occupations Licensed or Certified by New York State.** This publication contains licensing requirements for 65 occupations (training, tests and fees) as well as information on employment outlook, earnings, and working conditions for these occupations. The report also includes a list of apprenticable occupations. May 1987. Price $10.00.

B-PUBLICATIONS

235. **A History of Unemployment Insurance Legislation in the United States and New York State, 1935-1983.** A report on the background of the unemployment insurance system and changes in federal and state legislation from 1935 to 1983.

SPECIAL BULLETINS

Special Bulletins may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Office of Communications, New York State Department of Labor, W. Averell Harriman State Office Building Campus, Albany, New York 12240.

254. **Directory of Labor Unions and Employee Organizations in New York State, 1987-88.** This edition lists names and addresses of principal or executive officers of over 5,000 local, state and national or international employee organizations representing workers in New York State. Both public employee and private industry unions are included in the directory. Price $10.00.

LABOR RESEARCH REPORTS

88-4. **Occupational Injuries and Illnesses Survey, State and Local Government, New York State, 1987.** An annual survey by the Labor Department of work-related fatalities, injuries and illnesses in the public sector. The survey is required by the New York Public Employee Safety and Health Act of 1980.

88-5. **Unemployment Insurance Beneficiaries in New York State, Benefit Year Ending in 1986.** Describes personal characteristics, work background, and benefit experience of unemployed workers who drew benefits in 1985.

Insurance Law. Benchmark data for the remainder are obtained from the records of other private and governmental agencies. Employment estimates for the latest benchmark year and for the previous year are normally subject to revision annually. Current estimates are based on the March 1988 benchmark level for each industry.

Hours and earnings data are analyzed each year to maintain continuity of series.

Earnings, Average. For manufacturing, the averages cover production and related workers only. For the remaining industries, averages cover all nonsupervisory employees and working supervisors unless otherwise specified.

--**Earnings, Average Hourly.** Represents payrolls divided by total number of hours worked or paid for (including paid holiday, vacation, sick leave hours) during period reported. Total payroll includes both straight-time and premium pay. The averages are influenced by the amount of premium pay, as well as by changes in composition of labor force, changes in wage rates, upgrading of employees, etc., and consequently should not be interpreted as wage rates.

--**Earnings, Average Weekly.** Derived by multiplying average weekly hours by average hourly earnings. Includes premium wages for overtime and night shift work and payments made on piecework or incentive basis. The averages are affected by changes in length of workweek, part-time work, stoppages for varying causes, labor turnover, and absenteeism.

Employment, Nonfarm. Estimates include all nonfarm wage and salary workers who received pay for any part of the pay period including the 12th of the month. Persons on paid sick leave, paid holiday or paid vacation are included, but those on leave without pay for the entire payroll period are excluded. Persons on the payroll of more than one establishment during the period are counted each time reported. Self-employed persons, unpaid family workers, and domestics are excluded.

Historical Continuity. Historical continuity of statistics of average hours and earnings of manufacturing production workers has been interrupted for a number of industry groups because of changes in the composition of reporting samples or changes in the relative weight of individual industries in group totals. The starting month of a revised series is identified in a footnote in the issue in which the revision is introduced. Some series have been discontinued pending improvement in the reporting samples.

Hours, Average Weekly. See *Earnings, Average* for description of workers covered. The averages represent total number of hours worked (including overtime) or paid for (including paid holiday, vacation, and sick leave hours) during week divided by number of employees. The averages are affected by amount of labor turnover during week, changes in amount of overtime hours, and by changes in ratio of full-time or part-time eployment.

--**Hours, Average Weekly Overtime.** Represents total number of overtime hours worked by production workers during the week divided by total number of production workers. Overtime hours include those for which premiums were paid because those hours were in excess of the number of hours of either the straight-time workday or the workweek. Hours worked on Saturday, Sunday or holidays are included only if premium wage rates were paid.

Nonagricultural Establishments. All employing units except commercial and noncommercial farms, international government and private households.

Production Workers. Includes working foremen and all nonsupervisory workers (including leadmen and trainees) engaged in fabricating, processing, assembling, inspection, receiving, storage, handling, packing, warehousing, shipping, maintenance, repair, janitorial and watchman services, product development, auxiliary production for plant's own use (e.g., power plant), and in record-

EXPLANATION OF DATA

EMPLOYED AND UNEMPLOYED

Employed and Unemployed. Employment and unemployment estimates prepared by the New York State Department of Labor are developed under a cooperative federal-state program administered by the Bureau of Labor Statistics (BLS) of the U.S. Department of Labor. The Current Population Survey (CPS)--the official survey instrument for measuring labor force attachment in the United States--is a monthly survey of about 54,000 households conducted throughout the nation by trained interviewers. Employment and unemployment data for New York State and New York City are based directly on responses of households within the state and city which are represented in the CPS sample.

The size of the CPS sample is not sufficient to provide reliable estimates for labor areas in the "balance of state" (state less New York City). In these areas, a series of factors are applied to administrative statistics from state unemployment insurance (UI) operations and to payroll statistics from establishment surveys to provide data on resident employment and unemployment. Data for these labor areas are adjusted so they add to "balance of state" totals.

These revised procedures, which were put into effect in January 1978, are designed to make the estimates more comparable from state to state and to incorporate more current data in the estimating process.

Employed. Employed persons are all those who during the week including the 12th of the month, (a) did any work at all as paid employees or in their own business or profession, or farm or who worked 15 hours or more as unpaid workers in an enterprise operated by a member of the family, or (b) did not work but who had jobs or businesses from which they were temporarily absent because of illness, bad weather, vacation, labor-management dispute, or personal reasons, whether or not they were paid by their employers for the time off, and whether or not they were seeking other jobs. Each employed person is counted only once.

Unemployed. Unemployed persons are all those persons who did not work during the week including the 12th of the month, who made specific efforts to find a job within the past four weeks, and who were available for work during the week except for temporary illness. Also included as unemployed are those who did not work at all, were available for work, and (a) were waiting to be called back to a job from which they had been laid off, or (b) were waiting to report to a new wage or salary job with 30 days.

Civilian Labor Force. The civilian labor force comprises all civilians classified as employed or unemployed in accordance with the criteria described above. The civilian labor force participation rate is the ratio of the civilian labor force to the civilian noninstitutional population.

Rate of Unemployment. The rate is the total number of unemployed persons expressed as a percentage of the employed and unemployed, i.e., as a percentage of the civilian labor force.

Not in the Labor Force. Not in the labor force includes all persons 16 years of age or older who are not classified as employed or unemployed.

NONAGRICULTURAL EMPLOYMENT, HOURS AND EARNINGS

Benchmark. Represents a comprehensive count of employment for the various nonagricultural industries as of the first quarter of each year. The primary source of benchmark information is employment data received from establishments covered by the New York State Unemployment

MONTH IN REVIEW
May 1989

Civilian Labor Force

The household survey sample size in New York State is gradually being restored to its former level (5,000 households) by the U.S. Bureau of Labor Statistics. Until the sample restoration is completed, significant fluctuations in monthly employment and unemployment statistics may continue.

Following an unusually large increase in April 1989, New York's unemployment rate moved down 0.4 percentage point in May to 5.2 percent. The over-the-month decline in the state rate was the sharpest April-May drop since 1983 (-0.5 percentage point). Nevertheless, this month's rate was the highest for May since 1986 (6.9 percent). Furthermore, the state rate exceeded the national rate for the second consecutive month. Prior to April 1989, the New York State rate (not seasonally adjusted) last exceeded the comparable national rate in October 1984. Over the year, the state unemployment rate was up 1.1 percentage points from 4.1 percent.

The number of employed residents decreased 27,000 from April to 8,139,000 in May 1989. The number, however, was up 196,000 or 2.5 percent from May 1988.

Total unemployment declined 32,000 over the month to 448,000 in May 1989. Unemployment was up 107,000 from May 1988.

Nonfarm Employment

New York State's nonfarm job count (which excludes agricultural workers, the self-employed, unpaid family workers and domestic workers in private households) increased moderately in May 1989, rising 44,100 from April to 8,277,200. Nearly all of the upturn could be attributed to seasonal factors--summer hiring by eating places, construction contractors, and vacation-related establishments. Most industry divisions experienced below-average job gains for this time of year, in part due to spot labor shortages. Over the year, the number of nonfarm jobs was up 99,200 or 1.2 percent--the slowest over-the-year increase for May since 1983 (less than 0.05 percent). Approximately two-thirds of the over-the-year expansion in nonfarm jobs occurred in the services division.

Trade and construction accounted for slightly more than two-thirds of the April-May job pickup. Seasonal hiring by eating places dominated the gain in trade (+ 16,300). Over half of the buildup in construction employment (+ 14,200) occurred in the special trade contractor industry.

Employment in services reached a new all-time high in May, following a 7,100 increase from April. The services job gain reflected seasonal hiring in the lodging, recreational services, and agricultural services industries. Government employment, which had established an all-time high in April 1989, remained unchanged in May--cutbacks in federal nondefense agencies and state and local education offset job gains in other government categories.

The number of jobs in finance, insurance and real estate rose moderately in May, up 1,700 from April. Continued cutbacks in the financial sector dampened gains elsewhere in the division.

Manufacturing employment was virtually unchanged from a month ago, advancing only 1,200, with seasonal hiring by nondurable goods manufacturers and a reduction in durable-goods sector workers. The advance in nondurable goods jobs was sparked by hiring in the textile and paper industries while the decline in durable goods jobs was centered in the electric and miscellaneous manufacturing industries.

The 3,400 rise in transportation and public utilities jobs was shared by nearly all component industries. The trucking and communications industries, both up 800, reported the largest job increases.

EXPLANATION OF DATA

EMPLOYED AND UNEMPLOYED

Employed and Unemployed. Employment and unemployment estimates prepared by the New York State Department of Labor are developed under a cooperative federal-state program administered by the Bureau of Labor Statistics (BLS) of the U.S. Department of Labor. The Current Population Survey (CPS)--the official survey instrument for measuring labor force attachment in the United States--is a monthly survey of about 54,000 households conducted throughout the nation by trained interviewers. Employment and unemployment data for New York State and New York City are based directly on responses of households within the state and city which are represented in the CPS sample.

The size of the CPS sample is not sufficient to provide reliable estimates for labor areas in the "balance of state" (state less New York City). In these areas, a series of factors are applied to administrative statistics from state unemployment insurance (UI) operations and to payroll statistics from establishment surveys to provide data on resident employment and unemployment. Data for these labor areas are adjusted so they add to "balance of state" totals.

These revised procedures, which were put into effect in January 1978, are designed to make the estimates more comparable from state to state and to incorporate more current data in the estimating process.

Employed. Employed persons are all those who during the week including the 12th of the month, (a) did any work at all as paid employees or in their own business or profession, or farm or who worked 15 hours or more as unpaid workers in an enterprise operated by a member of the family, or (b) did not work but who had jobs or businesses from which they were temporarily absent because of illness, bad weather, vacation, labor-management dispute, or personal reasons, whether or not they were paid by their employers for the time off, and whether or not they were seeking other jobs. Each employed person is counted only once.

Unemployed. Unemployed persons are all those persons who did not work during the week including the 12th of the month, who made specific efforts to find a job within the past four weeks, and who were available for work during the week except for temporary illness. Also included as unemployed are those who did not work at all, were available for work, and (a) were waiting to be called back to a job from which they had been laid off, or (b) were waiting to report to a new wage or salary job with 30 days.

Civilian Labor Force. The civilian labor force comprises all civilians classified as employed or unemployed in accordance with the criteria described above. The civilian labor force participation rate is the ratio of the civilian labor force to the civilian noninstitutional population.

Rate of Unemployment. The rate is the total number of unemployed persons expressed as a percentage of the employed and unemployed, i.e., as a percentage of the civilian labor force.

Not in the Labor Force. Not in the labor force includes all persons 16 years of age or older who are not classified as employed or unemployed.

NONAGRICULTURAL EMPLOYMENT, HOURS AND EARNINGS

Benchmark. Represents a comprehensive count of employment for the various nonagricultural industries as of the first quarter of each year. The primary source of benchmark information is employment data received from establishments covered by the New York State Unemployment

Insurance Law. Benchmark data for the remainder are obtained from the records of other private and governmental agencies. Employment estimates for the latest benchmark year and for the previous year are normally subject to revision annually. Current estimates are based on the March 1988 benchmark level for each industry.

Hours and earnings data are analyzed each year to maintain continuity of series.

Earnings, Average. For manufacturing, the averages cover production and related workers only. For the remaining industries, averages cover all nonsupervisory employees and working supervisors unless otherwise specified.

--**Earnings, Average Hourly.** Represents payrolls divided by total number of hours worked or paid for (including paid holiday, vacation, sick leave hours) during period reported. Total payroll includes both straight-time and premium pay. The averages are influenced by the amount of premium pay, as well as by changes in composition of labor force, changes in wage rates, upgrading of employees, etc., and consequently should not be interpreted as wage rates.

--**Earnings, Average Weekly.** Derived by multiplying average weekly hours by average hourly earnings. Includes premium wages for overtime and night shift work and payments made on piecework or incentive basis. The averages are affected by changes in length of workweek, part-time work, stoppages for varying causes, labor turnover, and absenteeism.

Employment, Nonfarm. Estimates include all nonfarm wage and salary workers who received pay for any part of the pay period including the 12th of the month. Persons on paid sick leave, paid holiday or paid vacation are included, but those on leave without pay for the entire payroll period are excluded. Persons on the payroll of more than one establishment during the period are counted each time reported. Self-employed persons, unpaid family workers, and domestics are excluded.

Historical Continuity. Historical continuity of statistics of average hours and earnings of manufacturing production workers has been interrupted for a number of industry groups because of changes in the composition of reporting samples or changes in the relative weight of individual industries in group totals. The starting month of a revised series is identified in a footnote in the issue in which the revision is introduced. Some series have been discontinued pending improvement in the reporting samples.

Hours, Average Weekly. See *Earnings, Average* for description of workers covered. The averages represent total number of hours worked (including overtime) or paid for (including paid holiday, vacation, and sick leave hours) during week divided by number of employees. The averages are affected by amount of labor turnover during week, changes in amount of overtime hours, and by changes in ratio of full-time or part-time eployment.

--**Hours, Average Weekly Overtime.** Represents total number of overtime hours worked by production workers during the week divided by total number of production workers. Overtime hours include those for which premiums were paid because those hours were in excess of the number of hours of either the straight-time workday or the workweek. Hours worked on Saturday, Sunday or holidays are included only if premium wage rates were paid.

Nonagricultural Establishments. All employing units except commercial and noncommercial farms, international government and private households.

Production Workers. Includes working foremen and all nonsupervisory workers (including leadmen and trainees) engaged in fabricating, processing, assembling, inspection, receiving, storage, handling, packing, warehousing, shipping, maintenance, repair, janitorial and watchman services, product development, auxiliary production for plant's own use (e.g., power plant), and in record-

keeping and other services closely associated with the above production operations. Excludes supervisory employees (above the working foremen level) and their clerical staffs, routemen, salesmen and force-account construction workers.

Reference Week of the Month. Employment, payrolls, hours, and earnings data are based on reports from firms covering a pay period, usually the week, including the 12th of the month.

METROPOLITAN STATISTICAL AREA

A metropolitan statistical area (MSA) is defined according to a set of detailed standards prepared by the Federal Committee on MSAs. Under these standards, which were revised in 1980, areas are designated as an MSA in one of two ways: If there is a city of at least 50,000 population, or an urbanized area of at least 50,000 with a total metropolitan population of at least 100,000. In New York State, MSAs are defined in terms of entire counties. In addition to the county containing the main city, an MSA also includes additional counties having strong economic and social ties to the central county.

Most MSA definitions are not subject to change until after the next national census. However, supplemental announcements of a few new MSAs may be issued in the spring of each year, generally because additional cities have reached the 50,000 level according to official population estimates.

If an area has more than 1 million population and meets certain other specified requirements, it will now be termed a Consolidated Metropolitan Statistical Area (CMSA), consisting of major components recognized as Primary Metropolitan Statistical Areas (PMSAs).

A number of areas in the state do not meet the criteria for recognition as an MSA but estimates are published for them. These areas are called Labor Market Areas (LMAs).

The geographic compostion of the areas (which differ from the administrative jurisdictions of the unemployment insurance and job service program) is given below.

Albany-Schenectady-Troy MSA. Albany, Montgomery, Greene, Rensselaer, Saratoga and Schenectady counties.
Binghamton MSA. Broome and Tioga counties.
Buffalo-Niagara Falls CMSA. Erie and Niagara counties.
Buffalo PMSA. Erie County.
Elmira MSA. Chemung County.
Nassau-Suffolk PMSA. Nassau and Suffolk counties.
New York City. Bronx, Kings, New York, Queens and Richmond counties.
New York Combined Area. Bronx, Kings, Nassau, New York, Queens, Richmond, Putnam, Rockland, Suffolk and Westchester counties.
New York PMSA. New York City and Putnam, Rockland and Westchester counties.
Niagara Falls PMSA. Niagara County.
Orange County PMSA. Orange County.
Poughkeepsie MSA. Dutchess County.
Rochester MSA. Livingston, Monroe, Ontario, Orleans and Wayne Counties.
Rockland LMA. Rockland County.
Syracuse MSA. Madison, Onondaga and Oswego counties.
Utica-Rome MSA. Herkimer and Oneida counties.
Westchester LMA. Westchester County.

INDUSTRIAL CLASSIFICATION

Data are classified in accordance with the 1972 edition of the *Standard Industrial Classification (SIC) Manual* prepared by the U.S. Office of Management and Budget. Coverage of the classification *services and miscellaneous* varies geographically. For New York State and New York City, this classification includes: the services industry division; forestry, fisheries and selected services relating to agriculture; and nonclassifiable establishments. For space requirements on the statistical tables, the formal SIC title for most of the industry groups have been replaced by the short SIC title as contained in Appendix B of the 1972 edition of the *SIC Manual-List of short SIC titles*. SIC titles used for groupings of two or more two-digit manufacturing industries reflect, to the extent possible, the respective components.

MISCELLANEOUS EXPLANATIONS

Effect of rounding. Detail figures may not add to total because of rounding.

Revisions. Revised figures are preceded by an "r" when first published.

KEY

Blank or-	Series not available due to inadequate sample size or other technical reasons.
n.a.	Data not available at date of publication.
n.c.	Not comparable with current data due to a break in series.
d	Figures withheld to avoid disclosure of data of individual reporting units.
*	Less than 0.05 percent.
r	Revised.

OTHER RECURRENT REPORTS

1. **Employment Trends.** Monthly for New York State. Highlights current developments in employment and unemployment.

2. **Labor Area Summary.** A monthly report which covers the 11 major labor areas of the state.

3. **Annual Labor Area Report.** Economic developments and outlook, population and labor force characteristics and trends, employment developments and outlook by industry and occupation, trends in employment and unemployment. Fiscal year reports are available for the state, selected major labor areas and New York City.

4. **Unemployment Insurance Tax Rates.** Annual. Rates by industry and size of firm and effects of factors that entered into determination of rates.

5. **Occupational Employment Statistics.** Series of individual triennial reports analyzing and detailing occupational patterns by industry sector: manufacturing, selected nonmanufacturing, wholesale and retail trade, regulated industries, and federal, state and local government.

6. **Occupational Needs, New York State, 1989-1991.** Projects the demand for workers in various jobs. The report is based on occupational employment statistics surveys which examine occupational distributions on a three-year cycle. The surveys involve a statistical sample of industries throughout the state to obtain their occupational staffing patterns.

7. **Collective Bargaining Settlements in New York State.** Quarterly. Summarizes changes in collective bargaining agreements covering wages that affect 250 or more workers. Covers wages and fringe benefits for agreements that affect 1,000 or more workers.

8. **Calendar of Collective Bargaining, New York State, 1988.** This report lists all agreements covering 500 or more workers known to the Division of Research that expire or are subject to a wage reopening in 1988. The report is organized by month of expiration or reopening and, within each month, by industry.

9. **Statistics on Work Stoppages, New York State.** Annual. Data on the number of strikes, the number of workers involved and man-days idle; describes major work stoppages.

10. **Work Stoppages in New York State.** Monthly. Listing gives parties, number of workers directly affected, locations and dates.

11. **Consumer Price Index, Selected Areas and Population Groups.** This bimonthly report presents tabular material on the Consumer Price Index for the United States, New York City SMSA, Buffalo SMSA, and by selected urban population size class. Data are presented for all urban consumers, and wage earners and clerical workers.

SPECIAL REPORTS

Special Reports 14, 15, 18 and/or 19 may be obtained by sending acheck or money order, payable to the New York State Department of Labor, to the Publications Unit.

12. **Occupational Brief.** Occupational briefs are available for: *Computer Programmer, Cosmetologist, General Duty (Registered) Nurse, Licensed Practical Nurse, Occupational Therapist and Assistant, Physical Therapist and Assistant, and Home Care Aide*. The booklets, intended primarily for use by youth and counselors, include typical job duties performed, earnings expected, typical hours and days worked, working conditions, educational requirements, job locations, opportunities for advancement, employment outlook, and other related information.

13. **Affirmative Action Data, Total, Female and Minority Population: 1980.** This booklet provides data from the 1980 Census for New York State, standard metropolitan statistical areas (SMSA's), counties, and subdivisions with population of 25,000 or more, for use in preparing or assessing affirmative actions plans. Tables show total population, and populations of females and minorities, with distributions by race and Hispanic origin. March 1982.

14. **High-Technology Industries in New York State.** Acting on a commission from the NYS Science and Technology Foundation, the Battelle Corporation identified 52 high-technology industries which are both desirable and feasible for New York State. The industries in which New York has the best competitive position are the subject of this report. The report includes information on employment and wages in these 52 industries, detailed by four-digit-SIC industry code and by area. Where possible, comparisons have been made with high-technology industries nationwide. April 1983. Price $5.00.

15. **Occupations in High-Technology Industries in New York State.** This report contains information on the occupations found in 52 high-technology industries selected for their potential for long-term growth in the state; it complements *High-Technology Industries in New York State*. The report includes sections covering occupational staffing patterns, significant occupations, apprenticeship occupations, assemblers, educational requirements, occupational supply and demand, and occupational outlook. July 1983. Price $5.00

16. **Total and Civilian Labor Force Summary, Selected Demographic Groups, New York State, Counties, and SMSA's, 1980.** This booklet contains labor force data from the 1980 Census for New York State, its standard metropolitan statistical areas, counties, and New York City, for use in developing and assessing affirmative action plans. Tables include: total and civilian labor force; employment, unemployment, and the unemployment rate for all persons 16 years of age and older and for females, blacks, American Indians, Eskimos, and Aleuts, Asians and Pacific Islanders, and persons of Hispanic origin. Percent distributions are also shown. March 1983.

17. **Civilian Labor Force by Occupation, Selected Demographic Groups, 1980.** These tables, which contain data from the 1980 Census, can be used in developing and assessing affirmative action plans. They show civilian labor force data by occupation for persons aged 16 and over. Data are also included for females, minorities, Hispanics, blacks, and other races. Tables are available for New York State, Standard Metropolitan Statistical Areas, and counties. February 1984.

18. **The Jobseeker.** A 106-page guide designed primarily to assist young people entering the job market Contains sections on the explanation of the job market/labor force, kinds of employers, kinds of occupations, how to choose an occupation, chances of finding a job, what to do to find a job, how to prepare a resume, how to complete an employment application, how to do well at a job interview. Also contains occupational profiles on 133 occupations of interest to youth, with information on each regarding: number of employed, where found, job outlook, education needed, personal characteristics, and earnings. (First copy is free. Additional copies are available at 50 cents per copy.) February 1986.

19. **Occupations Licensed or Certified by New York State.** This publication contains licensing requirements for 65 occupations (training, tests and fees) as well as information on employment outlook, earnings, and working conditions for these occupations. The report also includes a list of apprenticeable occupations. May 1987. Price $10.00.

B-PUBLICATIONS

235. **A History of Unemployment Insurance Legislation in the United States and New York State, 1935-1983.** A report on the background of the unemployment insurance system and changes in federal and state legislation from 1935 to 1983.

SPECIAL BULLETINS

Special Bulletins may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Office of Communications, New York State Department of Labor, W. Averell Harriman State Office Building Campus, Albany, New York 12240.

254. **Directory of Labor Unions and Employee Organizations in New York State, 1987-88.** This edition lists names and addresses of principal or executive officers of over 5,000 local, state and national or international employee organizations representing workers in New York State. Both public employee and private industry unions are included in the directory. Price $10.00.

LABOR RESEARCH REPORTS

88-4. **Occupational Injuries and Illnesses Survey, State and Local Government, New York State, 1987.** An annual survey by the Labor Department of work-related fatalities, injuries and illnesses in the public sector. The survey is required by the New York Public Employee Safety and Health Act of 1980.

88-5. **Unemployment Insurance Beneficiaries in New York State, Benefit Year Ending in 1986.** Describes personal characteristics, work background, and benefit experience of unemployed workers who drew benefits in 1985.

MONTH IN REVIEW
June 1989

Civilian Labor Force

The household survey sample size in New York State is gradually being restored to its former level (5,000 households) by the U.S. Bureau of Labor Statistics. Until the sample restoration is completed, significant fluctuations in monthly employment and unemployment statistics may continue

The unemployment rate in New York State declined 0.5 of a percentage point from May 1989 to 4.7 percent in June, reflecting abundant summer job opportunities. The state rate dropped below the national rate (5.5 percent) after exceeding it for two consecutive months. Over the year, the unemployment rate was up 1.3 percentage points from 3.4 percent--the lowest unemployment rate on record. (Records extend back to 1970.)

The number of employed residents increased 221,000 from May to 8,360,000 in June 1989, primarily the result of hiring of workers for the summer. June employment, however, was up only 80,000 or 1.0 percent over the year.

Total unemployment declined 37,000 over the month to 411,000 in June 1989. Unemployment was up 121,000 from June 1988. The over-the-year rise in unemployment was confirmed by a rise in the number of persons filing claims for unemployment insurance.

Nonfarm Employment

The state's nonagricultural job count (which excludes agricultural workers, the self-employed, unpaid family workers and domestic workers in private households) rose 74,900 from May 1989 to 8,352,100 in June--a new all-time high. The over-the-month gain was in line with comparable increases over the last five years and reflected the hiring of summer workers in many industries.

Notable summer hiring occurred in trade, services, and construction. Employment of students on summer vacation resulted in job gains in all wholesale and retail trade industries (+ 22,600), with hires by eating places comprising over 60 percent of the upturn. In services, job gains (+ 13,700) were widespread with the largest increases in recreational services and the lodging industries. Summer cutbacks in private education dampened the services upturn. After a slow start this spring, the construction industry met seasonal expectations for June, rising 13,100.

Employment was up moderately in the remaining industry divisions. In the finance, insurance and real estate group (+ 8,100), all industries experienced an over-the-month increase, with hiring by realtors accounting for the largest employment gain. In manufacturing, job gains by both nondurable (+ 4,300) and durable goods (+ 2,800) payrolls resulted in 7,200 additional manufacturing jobs. Seasonal hiring in the food industry led the increase in nondurable goods employment, while the hiring of students on summer vacation in the photographic equipment industry dominated the nondurable goods upturn. In the public sector (+ 5,200), summer hiring by local noneducation agencies was partially offset by the normal vacation-related cutbacks in state and local education. In the transportation and public utilities group (+ 5,000), trucking and air transportation employers reported the largest job gains.

Since June 1988, the number of nonfarm jobs in the state was up 89,200 or 1.1 percent. The over-the-year rate of growth for the first six months of 1989 has been around 1.0 percent compared with a 1.3 percent growth rate for a comparable period in 1988. The services (+ 59,400) and trade (+ 21,900) divisions accounted for the lion's share of the June 1988-June 1989 increase in jobs.

Table 3. LABOR FORCE STATUS OF THE CIVILIAN NONINSTITUTIONAL POPULATION 16 YEARS AND OVER
NEW YORK STATE, 1970 TO DATE
(Numbers in thousands)

Year and month		Civilian noninstitutional population	Civilian labor force					Not in labor force

1/ EARNINGS AND HOURS DATA REFER TO PRODUCTION AND RELATED WORKERS IN MANUFACTURING, TO ON-SITE WORKERS AND SHOP AND YARD EMPLOYEES ENGAGED IN CONSTRUCTION, AND TO NONSUPERVISORY IN ALL OTHER INDUSTRIES.

NOTE: HOURS AND EARNINGS DATA ARE NOT SHOWN FOR PREVIOUS YEAR IF NONCOMPARABLE WITH CURRENT YEAR DATA.

Insurance Law. Benchmark data for the remainder are obtained from the records of other private and governmental agencies. Employment estimates for the latest benchmark year and for the previous year are normally subject to revision annually. Current estimates are based on the March 1988 benchmark level for each industry.

Hours and earnings data are analyzed each year to maintain continuity of series.

Earnings, Average. For manufacturing, the averages cover production and related workers only. For the remaining industries, averages cover all nonsupervisory employees and working supervisors unless otherwise specified.

--**Earnings, Average Hourly.** Represents payrolls divided by total number of hours worked or paid for (including paid holiday, vacation, sick leave hours) during period reported. Total payroll includes both straight-time and premium pay. The averages are influenced by the amount of premium pay, as well as by changes in composition of labor force, changes in wage rates, upgrading of employees, etc., and consequently should not be interpreted as wage rates.

--**Earnings, Average Weekly.** Derived by multiplying average weekly hours by average hourly earnings. Includes premium wages for overtime and night shift work and payments made on piecework or incentive basis. The averages are affected by changes in length of workweek, part-time work, stoppages for varying causes, labor turnover, and absenteeism.

Employment, Nonfarm. Estimates include all nonfarm wage and salary workers who received pay for any part of the pay period including the 12th of the month. Persons on paid sick leave, paid holiday or paid vacation are included, but those on leave without pay for the entire payroll period are excluded. Persons on the payroll of more than one establishment during the period are counted each time reported. Self-employed persons, unpaid family workers, and domestics are excluded.

Historical Continuity. Historical continuity of statistics of average hours and earnings of manufacturing production workers has been interrupted for a number of industry groups because of changes in the composition of reporting samples or changes in the relative weight of individual industries in group totals. The starting month of a revised series is identified in a footnote in the issue in which the revision is introduced. Some series have been discontinued pending improvement in the reporting samples.

Hours, Average Weekly. See *Earnings, Average* for description of workers covered. The averages represent total number of hours worked (including overtime) or paid for (including paid holiday, vacation, and sick leave hours) during week divided by number of employees. The averages are affected by amount of labor turnover during week, changes in amount of overtime hours, and by changes in ratio of full-time or part-time eployment.

--**Hours, Average Weekly Overtime.** Represents total number of overtime hours worked by production workers during the week divided by total number of production workers. Overtime hours include those for which premiums were paid because those hours were in excess of the number of hours of either the straight-time workday or the workweek. Hours worked on Saturday, Sunday or holidays are included only if premium wage rates were paid.

Nonagricultural Establishments. All employing units except commercial and noncommercial farms, international government and private households.

Production Workers. Includes working foremen and all nonsupervisory workers (including leadmen and trainees) engaged in fabricating, processing, assembling, inspection, receiving, storage, handling, packing, warehousing, shipping, maintenance, repair, janitorial and watchman services, product development, auxiliary production for plant's own use (e.g., power plant), and in record-

keeping and other services closely associated with the above production operations. Excludes supervisory employees (above the working foremen level) and their clerical staffs, routemen, salesmen and force-account construction workers.

Reference Week of the Month. Employment, payrolls, hours, and earnings data are based on reports from firms covering a pay period, usually the week, including the 12th of the month.

METROPOLITAN STATISTICAL AREA

A metropolitan statistical area (MSA) is defined according to a set of detailed standards prepared by the Federal Committee on MSAs. Under these standards, which were revised in 1980, areas are designated as an MSA in one of two ways: If there is a city of at least 50,000 population, or an urbanized area of at least 50,000 with a total metropolitan population of at least 100,000. In New York State, MSAs are defined in terms of entire counties. In addition to the county containing the main city, an MSA also includes additional counties having strong economic and social ties to the central county.

Most MSA definitions are not subject to change until after the next national census. However, supplemental announcements of a few new MSAs may be issued in the spring of each year, generally because additional cities have reached the 50,000 level according to official population estimates.

If an area has more than 1 million population and meets certain other specified requirements, it will now be termed a Consolidated Metropolitan Statistical Area (CMSA), consisting of major components recognized as Primary Metropolitan Statistical Areas (PMSAs).

A number of areas in the state do not meet the criteria for recognition as an MSA but estimates are published for them. These areas are called Labor Market Areas (LMAs).

The geographic compostion of the areas (which differ from the administrative jurisdictions of the unemployment insurance and job service program) is given below.

Albany-Schenectady-Troy MSA. Albany, Montgomery, Greene, Rensselaer, Saratoga and Schenectady counties.
Binghamton MSA. Broome and Tioga counties.
Buffalo-Niagara Falls CMSA. Erie and Niagara counties.
Buffalo PMSA. Erie County.
Elmira MSA. Chemung County.
Nassau-Suffolk PMSA. Nassau and Suffolk counties.
New York City. Bronx, Kings, New York, Queens and Richmond counties.
New York Combined Area. Bronx, Kings, Nassau, New York, Queens, Richmond, Putnam, Rockland, Suffolk and Westchester counties.
New York PMSA. New York City and Putnam, Rockland and Westchester counties.
Niagara Falls PMSA. Niagara County.
Orange County PMSA. Orange County.
Poughkeepsie MSA. Dutchess County.
Rochester MSA. Livingston, Monroe, Ontario, Orleans and Wayne Counties.
Rockland LMA. Rockland County.
Syracuse MSA. Madison, Onondaga and Oswego counties.
Utica-Rome MSA. Herkimer and Oneida counties.
Westchester LMA. Westchester County.

EXPLANATION OF DATA

EMPLOYED AND UNEMPLOYED

Employed and Unemployed. Employment and unemployment estimates prepared by the New York State Department of Labor are developed under a cooperative federal-state program administered by the Bureau of Labor Statistics (BLS) of the U.S. Department of Labor. The Current Population Survey (CPS)--the official survey instrument for measuring labor force attachment in the United States--is a monthly survey of about 54,000 households conducted throughout the nation by trained interviewers. Employment and unemployment data for New York State and New York City are based directly on responses of households within the state and city which are represented in the CPS sample.

The size of the CPS sample is not sufficient to provide reliable estimates for labor areas in the "balance of state" (state less New York City). In these areas, a series of factors are applied to administrative statistics from state unemployment insurance (UI) operations and to payroll statistics from establishment surveys to provide data on resident employment and unemployment. Data for these labor areas are adjusted so they add to "balance of state" totals.

These revised procedures, which were put into effect in January 1978, are designed to make the estimates more comparable from state to state and to incorporate more current data in the estimating process.

Employed. Employed persons are all those who during the week including the 12th of the month, (a) did any work at all as paid employees or in their own business or profession, or farm or who worked 15 hours or more as unpaid workers in an enterprise operated by a member of the family, or (b) did not work but who had jobs or businesses from which they were temporarily absent because of illness, bad weather, vacation, labor-management dispute, or personal reasons, whether or not they were paid by their employers for the time off, and whether or not they were seeking other jobs. Each employed person is counted only once.

Unemployed. Unemployed persons are all those persons who did not work during the week including the 12th of the month, who made specific efforts to find a job within the past four weeks, and who were available for work during the week except for temporary illness. Also included as unemployed are those who did not work at all, were available for work, and (a) were waiting to be called back to a job from which they had been laid off, or (b) were waiting to report to a new wage or salary job with 30 days.

Civilian Labor Force. The civilian labor force comprises all civilians classified as employed or unemployed in accordance with the criteria described above. The civilian labor force participation rate is the ratio of the civilian labor force to the civilian noninstitutional population.

Rate of Unemployment. The rate is the total number of unemployed persons expressed as a percentage of the employed and unemployed, i.e., as a percentage of the civilian labor force.

Not in the Labor Force. Not in the labor force includes all persons 16 years of age or older who are not classified as employed or unemployed.

NONAGRICULTURAL EMPLOYMENT, HOURS AND EARNINGS

Benchmark. Represents a comprehensive count of employment for the various nonagricultural industries as of the first quarter of each year. The primary source of benchmark information is employment data received from establishments covered by the New York State Unemployment

INDUSTRIAL CLASSIFICATION

Data are classified in accordance with the 1972 edition of the *Standard Industrial Classification (SIC) Manual* prepared by the U.S. Office of Management and Budget. Coverage of the classification *services and miscellaneous* varies geographically. For New York State and New York City, this classification includes: the services industry division; forestry, fisheries and selected services relating to agriculture; and nonclassifiable establishments. For space requirements on the statistical tables, the formal SIC title for most of the industry groups have been replaced by the short SIC title as contained in Appendix B of the 1972 edition of the *SIC Manual-List of short SIC titles*. SIC titles used for groupings of two or more two-digit manufacturing industries reflect, to the extent possible, the respective components.

MISCELLANEOUS EXPLANATIONS

Effect of rounding. Detail figures may not add to total because of rounding.

Revisions. Revised figures are preceded by an "r" when first published.

KEY

Blank or-	Series not available due to inadequate sample size or other technical reasons.
n.a.	Data not available at date of publication.
n.c.	Not comparable with current data due to a break in series.
d	Figures withheld to avoid disclosure of data of individual reporting units.
*	Less than 0.05 percent.
r	Revised.

OTHER RECURRENT REPORTS

1. **Employment Trends.** Monthly for New York State. Highlights current developments in employment and unemployment.

2. **Labor Area Summary.** A monthly report which covers the 11 major labor areas of the state.

3. **Annual Labor Area Report.** Economic developments and outlook, population and labor force characteristics and trends, employment developments and outlook by industry and occupation, trends in employment and unemployment. Fiscal year reports are available for the state, selected major labor areas and New York City.

4. **Unemployment Insurance Tax Rates.** Annual. Rates by industry and size of firm and effects of factors that entered into determination of rates.

5. **Occupational Employment Statistics.** Series of individual triennial reports analyzing and detailing occupational patterns by industry sector: manufacturing, selected nonmanufacturing, wholesale and retail trade, regulated industries, and federal, state and local government.

6. **Occupational Needs, New York State, 1989-1991.** Projects the demand for workers in various jobs. The report is based on occupational employment statistics surveys which examine occupational distributions on a three-year cycle. The surveys involve a statistical sample of industries throughout the state to obtain their occupational staffing patterns.

7. **Collective Bargaining Settlements in New York State.** Quarterly. Summarizes changes in collective bargaining agreements covering wages that affect 250 or more workers. Covers wages and fringe benefits for agreements that affect 1,000 or more workers.

8. **Calendar of Collective Bargaining, New York State, 1988.** This report lists all agreements covering 500 or more workers known to the Division of Research that expire or are subject to a wage reopening in 1988. The report is organized by month of expiration or reopening and, within each month, by industry.

9. **Statistics on Work Stoppages, New York State.** Annual. Data on the number of strikes, the number of workers involved and man-days idle; describes major work stoppages.

10. **Work Stoppages in New York State.** Monthly. Listing gives parties, number of workers directly affected, locations and dates.

11. **Consumer Price Index, Selected Areas and Population Groups.** This bimonthly report presents tabular material on the Consumer Price Index for the United States, New York City SMSA, Buffalo SMSA, and by selected urban population size class. Data are presented for all urban consumers, and wage earners and clerical workers.

SPECIAL REPORTS

Special Reports 14, 15, 18 and/or 19 may be obtained by sending acheck or money order, payable to the New York State Department of Labor, to the Publications Unit.

12. **Occupational Brief.** Occupational briefs are available for: *Computer Programmer, Cosmetologist, General Duty (Registered) Nurse, Licensed Practical Nurse, Occupational Therapist and Assistant, Physical Therapist and Assistant, and Home Care Aide*. The booklets, intended primarily for use by youth and counselors, include typical job duties performed, earnings expected, typical hours and days worked, working conditions, educational requirements, job locations, opportunities for advancement, employment outlook, and other related information.

13. **Affirmative Action Data, Total, Female and Minority Population: 1980.** This booklet provides data from the 1980 Census for New York State, standard metropolitan statistical areas (SMSA's), counties, and subdivisions with population of 25,000 or more, for use in preparing or assessing affirmative actions plans. Tables show total population, and popula-tions of females and minorities, with distributions by race and Hispanic origin. March 1982.

14. **High-Technology Industries in New York State.** Acting on a commission from the NYS Science and Technology Foundation, the Battelle Corporation identified 52 high-technology industries which are both desirable and feasible for New York State. The industries in which New York has the best competitive position are the subject of this report. The report includes information on employment and wages in these 52 industries, detailed by four-digit-SIC industry code and by area. Where possible, comparisons have been made with high-technology industries nationwide. April 1983. Price $5.00.

15. **Occupations in High-Technology Industries in New York State.** This report contains information on the occupations found in 52 high-technology industries selected for their potential for long-term growth in the state; it complements *High-Technology Industries in New York State*. The report includes sections covering occupational staffing patterns, significant occupations, apprenticeship occupations, assemblers, educational requirements, occupational supply and demand, and occupational outlook. July 1983. Price $5.00

16. **Total and Civilian Labor Force Summary, Selected Demographic Groups, New York State, Counties, and SMSA's, 1980.** This booklet contains labor force data from the 1980 Census for New York State, its standard metropolitan statistical areas, counties, and New York City, for use in developing and assessing affirmative action plans. Tables include: total and civilian labor force; employment, unemployment, and the unemployment rate for all persons 16 years of age and older and for females, blacks, American Indians, Eskimos, and Aleuts, Asians and Pacific Islanders, and persons of Hispanic origin. Percent distributions are also shown. March 1983.

17. **Civilian Labor Force by Occupation, Selected Demographic Groups, 1980.** These tables, which contain data from the 1980 Census, can be used in developing and assessing affirmative action plans. They show civilian labor force data by occupation for persons aged 16 and over. Data are also included for females, minorities, Hispanics, blacks, and other races. Tables are available for New York State, Standard Metropolitan Statistical Areas, and counties. February 1984.

18. **The Jobseeker.** A 106-page guide designed primarily to assist young people entering the job market. Contains sections on the explanation of the job market/labor force, kinds of employers, kinds of occupations, how to choose an occupation, chances of finding a job, what to do to find a job, how to prepare a resume, how to complete an employment application, how to do well at a job interview. Also contains occupational profiles on 133 occupations of interest to youth, with information on each regarding: number of employed, where found, job outlook, education needed, personal characteristics, and earnings. (First copy is free. Additional copies are available at 50 cents per copy.) February 1986.

19. **Occupations Licensed or Certified by New York State.** This publication contains licensing requirements for 65 occupations (training, tests and fees) as well as information on employment outlook, earnings, and working conditions for these occupations. The report also includes a list of apprenticable occupations. May 1987. Price $10.00.

B-PUBLICATIONS

235. **A History of Unemployment Insurance Legislation in the United States and New York State, 1935-1983.** A report on the background of the unemployment insurance system and changes in federal and state legislation from 1935 to 1983.

SPECIAL BULLETINS

Special Bulletins may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Office of Communications, New York State Department of Labor, W. Averell Harriman State Office Building Campus, Albany, New York 12240.

254. **Directory of Labor Unions and Employee Organizations in New York State, 1987-88.** This edition lists names and addresses of principal or executive officers of over 5,000 local, state and national or international employee organizations representing workers in New York State. Both public employee and private industry unions are included in the directory. Price $10.00.

LABOR RESEARCH REPORTS

88-4. **Occupational Injuries and Illnesses Survey, State and Local Government, New York State, 1987.** An annual survey by the Labor Department of work-related fatalities, injuries and illnesses in the public sector. The survey is required by the New York Public Employee Safety and Health Act of 1980.

89-2. **Unemployment Insurance Beneficiaries in New York State, Benefit Year Ending in 1987.** Describes personal characteristics, work background, and benefit experience of unemployed workers who drew benefits in 1986.
